

Author		4
1 Introduction		5
1.1 The splendors and miseries of nanostructures		5
1.2 Fabrication		6
1.3 Characterization		7
1.4 Semiconductor quantum dots		9
1.4.1 Fabrication		9
1.4.2 Quantum confinement		10
1.4.3 Characterization		11
1.4.4 Theoretical methods		11
1.5 Plasmonic antennas		12
2 Quantum dot properties		13
2.1 Quantum dots with tunable thickness of the wetting layer		13
2.2 External strain as a tool for tuning QD properties		15
2.3 Quantum dots between type I and type II confinement		17
3 Excitonic fine structure		19
3.1 Fine structure splitting of AlGaAs quantum dots		20
3.2 Fine structure splitting of type-II quantum dots		21
3.3 Spontaneous brightening of dark exciton		21
4 Quantum dot molecules		22
4.1 Entanglement in lateral quantum dot molecules		23
4.2 Active tuning of coherent tunneling in quantum dot molecules		23
5 Plasmonic nanostructures		24
5.1 Imaging of the plasmon resonances		24
6 Summary and Outlook		25
References		27
