Preface	xi
Acknowledgements	xv
Part 1	1
1 Linguistics from Antiquity till the seventeenth century	3
1.0 Preamble	3
1.1 The tradition of Plato and the Stoa	5
1.2 The Aristotelian tradition	12
1.2.1 Aristotle's theory of truth: where things went wrong	12
1.2.2 The Alexandrian philologists	18
1.3 Anomalism and Analogism, or Ecologism and Formalism	23
1.4 Late Antiquity and the Middle Ages	27
1.4.1 Apollonius Dyscolus, Donatus and Priscian	27
1.4.2 The Middle Ages: Speculative Grammar	30
1.5 The Renaissance and later	37
1.5.1 Linacre and Scaliger	39
1.5.2 Sanctius and the <i>Minerva</i>	41
1.5.3 Port Royal and after	46
2 The eighteenth and nineteenth centuries	49
2.0 Preamble	49
2.1 The running up: Romanticism	51
2.2 Rationalism versus Romanticism in philosophy	54
2.2.1 The paradox of knowledge: two approaches	55
2.2.2 Leibniz and the rationalist tradition	56
2.2.3 Vico as a precursor of the Enlightenment	58
2.3 Linguistics in the eighteenth century	60
2.3.1 Dictionary making in the eighteenth century	61
2.3.2 Romanticist interest in exotic languages	61
2.3.3 The expansion of grammar in eighteenth century France	63
2.3.4 Speculation about the origin of language	74
2.4 The beginnings of comparative philology	79
2.5 The Young Grammarians	89
2.6 The psychological aspect	104
2.6.1 Psychological grammar	104
2.6.2 Wilhelm von Humboldt	108
2.6.3 The confusion around subject and predicate	120
2.6.4 Logic, thought and language: the eternal triangle	133

3 The twentieth century: Europe	140
3.0 Preamble	140
3.1 Structuralism and the problem of mind	141
3.2 Baudouin de Courtenay and de Saussure	144
3.3 The Prague School	157
3.4 The Copenhagen School	160
3.5 The London School	167
4 The twentieth century: America	178
4.0 Preamble	178
4.1 Some early history; Whitney, Boas	179
4.2 Edward Sapir	183
4.3 Leonard Bloomfield	190
4.4 Diversification after Bloomfield	207
4.4.1 American linguistics after World War II	207
4.4.2 The traditionalists: Kenneth L. Pike	211
4.4.3 The formalists: Zellig S. Harris	213
4.4.4 A linguist in the middle ground: Charles F. Hockett	215
4.4.5 Tree diagrams in linguistics: from Wundt to TGG	219
4.5 Generative and early Transformational Grammar	227
4.5.1 Generative Grammar: Zellig S. Harris	227
4.5.2 Early TGG: Zellig S. Harris	231
4.5.3 Early TGG: Noam Chomsky	242
4.6 Consensus on metatheoretical questions?	253
4.6.1 Realism in linguistics: psychological plausibility	253
4.6.2 Criteria of adequacy	256
4.6.3 Empirical access: data, causal question, hypothesis	258
4.7 Formal aspects of grammars	267
4.7.1 The Chomsky hierarchy of grammars and languages	267
4.7.2 The parsing problem	276
4.7.3 The constraints problem and post-1970 Chomskyan theory	279
4.8 Linguistic typology	285
4.8.1 The geographical dimension neglected	285
4.8.2 Greenberg's work on typology and universals	286
4.8.3 The relation between Greenberg's universals and typology	288
4.8.4 Areal and historical universals	289
4.8.5 Problems in language typology	293
4.8.6 Typological versus theoretical universals	296

Part 2	297
5 Predicate calculus: from Aristotle to generalized quantifiers	299
5.0 Preamble	299
5.1 Aristotelian logic	300
5.1.1 Semantic and logical consequence	300
5.1.2 Aristotelian sentence analysis	303
5.1.3 Aristotelian Predicate Calculus and syllogistics	306
5.1.4 Propositional Calculus	309
5.1.5 The defects of Aristotelian Predicate Calculus	312
5.1.6 Truth and the axioms of Aristotelian logic	315
5.2 Nineteenth century formalization	320
5.3 The first wave: the application of algebra to logic	322
5.3.1 Boole algebra as a formal system	323
5.3.2 Application to APC and syllogisms	325
5.3.3 Application to propositional calculus	328
5.3.4 Application to valuation spaces	330
5.4 The second wave: the formalization of logical language	333
5.4.1 Gottlob Frege	333
5.4.2 Bertrand Arthur William Russell	336
5.5 Modern predicate calculus: quantification theory	338
5.5.1 Variables, functions and some model theory	339
5.5.2 The notion of quantifier and more model theory	345
5.5.3 Restricted quantification theory (RQT)	352
5.5.4 Unrestricted quantification theory (UQT)	355
5.5.5 Generalized quantification theory (GQT)	362
6. The study of meaning	367
6.0 Preamble	367
6.1 Logical and model-theoretic semantics	368
6.1.1 Leibniz's <i>Characteristica Universalis</i>	368
6.1.1.1 Proof theory in linguistics?	369
6.1.2 Frege and Russell at the cradle of modern semantics	372
6.1.2.1 Frege's first problem: identity statements	372
6.1.2.1.1 Kripke's theory of proper names	378
6.1.2.2 Frege's second problem: intensional contexts	381
6.1.2.3 Russell's Theory of Descriptions	383
6.1.2.3.1 The problem of identification	383
6.1.2.3.2 The problem of non-existing referents	384
6.1.2.3.3 The problem of reifications	385
6.1.2.3.4 The untenability of the Theory of Descriptions	386
6.1.3 Logical model theory: problems with possible worlds	388
6.1.3.1 Problems with the set of all possible worlds	389
6.1.3.2 Reifications again	390

6.1.3.3	Identity across worlds	391
6.1.3.4	Intensional entities	391
6.1.4	The model-theoretic treatment of intensionality	393
6.1.5	Where model theoretic semantics comes to grief	397
6.1.5.1	Predicates of propositional attitude	398
6.1.5.2	Lexical dependency on a knowledge base	400
6.1.5.3	Topic-comment modulation and information structure	401
6.1.5.4	Viewpoint	401
6.2	Cognitive semantics: discourse-dependency	404
6.2.1	Semantics and pragmatics	405
6.2.2	Ordinary Language Philosophy	411
6.2.2.1	Ludwig Wittgenstein	411
6.2.2.2	The Oxford School: Ryle, Austin, Strawson	419
6.2.3	Presuppositions	426
6.2.3.1	History of the presupposition problem	426
6.2.3.1.1	Eubulides of Megara	426
6.2.3.1.2	Peter of Spain and Walter Burley	429
6.2.3.1.3	Frege's approach to presuppositions	430
6.2.3.1.4	Geach on presuppositions	431
6.2.3.1.5	Strawson's analysis of presuppositions	432
6.2.3.2	The projection problem and the entailment analysis	436
6.2.3.3	The discourse nature of presupposition	439
6.2.4	Speech acts	441
6.2.5	Anaphora	446
6.2.6	Discourse-oriented theories of meaning	451
6.2.6.1	The reality of non-existing intensional entities	452
6.2.6.2	Intensional contexts	453
7.	Meaning and grammar	459
7.0	Preamble	459
7.1	Until 1900: all linguistic structure is meaningful	461
7.1.1	The Platonic tradition: Stoa, Sanctius, Port Royal	462
7.1.2	The Aristotelian tradition: Priscian and the Modists	464
7.1.3	The Subject-Predicate debate revisited	467
7.2	After 1900: the autonomy of linguistic structure	468
7.2.1	European structuralism: structure still with 'meaning'	468
7.2.2	American structuralism: structure without meaning	469
7.2.3	Surface semantics and deep structure semantics	471
7.3	Deep structure in Transformational Grammar	474
7.3.1	No competence without meaning: the semantic component	476
7.3.1.1	Katz and Fodor (1963)	476
7.3.1.2	Katz and Postal (1964)	479
7.3.1.3	The <i>Aspects</i> model (1965)	487

7.3.2	Generative semantics	493
7.3.2.1	The untenability of the <i>Aspects</i> model	493
7.3.2.2	Predicate calculus as the language of deep structure	495
7.3.2.3	The generative semantics movement	502
7.3.2.4	The generative semantics model of syntax	510
7.3.2.5	The counterpart: autonomous syntax	511
7.3.3	An analysis of the episode	512
7.4	Epilogue	527
	Bibliography	528
	Index	560
