

CONTENTS

1 HISTORY OF OCEANOGRAPHY 1

Early History 2

- Early Human Interaction with the Ocean •
- Contributions of the Greeks and Romans •
- The Middle Ages • Age of Discovery

The Formative Years of Marine Science 4

- Captain James Cook • Benjamin Franklin and the Gulf Stream • Matthew Fontaine Maury • Darwin, Coral Reefs, and Biological Evolution • The Rosses, Edward Forbes, and Life in the Sea

The Ocean as a Laboratory 6

- The Challenger Expedition • Alexander Agassiz • Victor Hensen and Marine Ecology • Polar Oceanography Begins with the Voyage of the *Fram*

Twentieth-Century Oceanography 10

- Voyage of the *Meteor* • The Expansion of Oceanography • Large-Scale Oceanographic Research • Technology Invades the Deep Ocean • Remote Sensing

The Sea Beam/Argo-Jason Remote System 12

Summary 21

2 THE ORIGIN OF THE EARTH, ITS OCEANS, AND LIFE IN THE OCEANS 25

The Universe We See 26

Origin of the Earth 26

Origin of the Atmosphere and Oceans 29

- The Atmosphere Forms • The Oceans Evolve

The Source 32

- An Alternate Theory—Ocean Water from Space

The Chemical Balance Sheet 32

- Excess Volatiles

Development of the Oceans and Their Basins 34

A Chemical Background 35

- A Look at the Atom • Chemical Bonds

Life Forms in the Ocean 37

- Ozone Formation • The First “Organic” Substances • Carbon: The Organizer of Life • Acidity and Alkalinity • Plants and Animals Evolve

Summary 41

3

GLOBAL PLATE TECTONICS 45

Development of the Theory 46

Isostasy 46

Supporting Evidence 48

Continental Jigsaw

Continental Geology 48

The Fossil Record • Ancient Life and
Climates • Continental Paleomagnetism

Marine Geology 54

Paleomagnetism • Sea-Floor Spreading

Plate Boundaries 60

Constructive Boundaries • Destructive
Boundaries • Shear Boundaries

Ophiolites 68

The Growth of Ocean Basins 72

Age of the Ocean Floor 72

Summary 75

4

MARINE PROVINCES 79

Techniques of Determining Bathymetry 80

Marine Provinces 82

Continental Margin 82

Continental Shelf • Continental Slope •
Continental Rise

Deep-Ocean Basin 90

Oceanic Ridges and Rises • Intraplate Features •
Subduction Zones • Mariana Island Arc

Summary 102

5

MARINE SEDIMENTS 107

Sediment Texture 108

Sediment Transport 108

Classification of Marine Sediment 109

Lithogenous Sediment • Biogenous Sediment •
Hydrogenous Sediment • Cosmogenous Sediment

Types of Sedimentary Deposits 116

Neritic Sediments (Sediments of the Continental
Margin) 116

Turbidites • Glacial Deposits • Stromatolites •
Blake Plateau

Evidence for the Oceanic Impact of a Meteorite
118

Oceanic Sediments (Sediments of the Deep-Ocean
Basin) 122

Abyssal Clay • Oozes • Manganese Nodules •
Cobalt-Rich Ocean Crusts

Distribution of Oceanic Sediments 126

Fecal Pellets • Calcareous Ooze • Siliceous
Ooze • Abyssal Clay

How Fast Are the Continents Growing? 132

Summary 132

6

PROPERTIES OF WATER 137

The Water Molecule 138

Solvent Properties 138

Thermal Properties 138

Freezing and Boiling Points of Water • Heat
Capacity • Latent Heats of Melting and
Vaporization

Surface Tension 143

Salinity of Ocean Water 143

Hurricanes—Nature's Safety Valves 144

Water Density 151

Residence Time 152

GEOSECS (Geochemical Ocean Sections) 153

Summary 154

7

AIR-SEA INTERACTION 157

Physical Properties of Ocean Water 158

Light Transmission • Density • Sound
Transmission

El Niño—Southern Oscillation Events 160

Solar Energy 168

Distribution of Solar Energy • Oceanic Heat Flow
and Atmospheric Circulation

Coriolis Effect 171**Heat Budget of the World Ocean 172****The Ocean's Weather and Climate 173**

Climate Patterns in the Ocean • Sea
Ice • Icebergs

Renewable Source of Energy 181**Summary 182****8****OCEAN CIRCULATION 185****Horizontal Circulation 186**

Ekman Spiral • Geostrophic Currents • Westward
Intensification

Ocean Acoustic Tomography 190**Vertical Circulation 192**

Wind-Induced Circulation • Thermohaline
Circulation

Antarctic Circulation 196**Atlantic Ocean Circulation 200**

Surface Circulation • Deep-Water Masses •
Changes in the Deep Ocean

Pacific Ocean Circulation 204

Surface Circulation • Deep-Water Masses

Indian Ocean Circulation 206

Surface Circulation • Deep-Water Masses

Power from Winds and Currents 208**Summary 209****9****WAVES 213****Wave Characteristics 214**

Deep-Water Waves • Shallow-Water Waves •
Transitional Waves

Wind-Generated Waves 217

Sea • Swell • Surf • Wave Refraction • Wave
Diffraction • Wave Reflection • Storm Surge

SEASAT Measures the Ocean Surface 220**Tsunami 232****Internal Waves 235****Power from Waves 236****Summary 236****10****TIDES 241****Tide-Generating Forces 242**

Law of Gravitation

Equilibrium Theory of Tides 244

The Rotating Earth • Combined Effects of Sun
and Moon • Effects of Declination • Effects of
Distance • Equilibrium Tide Prediction

Grunion and the Tides 248**Dynamical Theory of Tides 255**

Types of Tides • Tides in Lakes • Tides in Narrow
Open Basins • Tides in Broad Open Basins •
Coastal Tide Currents

Tides Observed Throughout the World 261

Bay of Fundy • North Sea • Tides in Rivers

Tides as a Source of Power 264

Some Basic Considerations • La Rance Power
Plant

Summary 266**11****THE SHORE 269****Classification of Coasts 270****General Description of the Coastal Region 271**

Wave Erosion Coasts • Marine Depositional
Coasts

Changing Levels of the Shoreline 280

Tectonic and Isostatic Movements • Eustatic
Movements

The United States Coasts 281

Atlantic-Type (Passive) Margins • Pacific-Type
(Active) Margins

**Can We Learn to Live with Our Changing
Shores? 282**

United States Coastal Conditions 285

The Atlantic Coast • The Gulf Coast • The Pacific Coast • Erosion Rates and Landform Types • Effects of Artificial Barriers

Summary 290

12**THE COASTAL WATERS AND MARGINAL SEAS 295****Coastal Waters 296**

Salinity • Temperature • Coastal Geostrophic Currents

Estuaries 298

Origin of Estuaries • Water Mixing in Estuaries • Estuaries and Human Activities • Estuaries and the Continental Shelf Plankton Community

Wetlands 302**Lagoons 302****Marginal Seas 306**

Marginal Seas of the Atlantic Ocean • Marginal Seas of the Pacific Ocean • Marginal Seas of the Indian Ocean

PROBES: Marine Science Steps Forward 314

Summary 319

13**THE MARINE ENVIRONMENT 323****General Conditions 324**

Support • Effects of Salinity • Availability of Nutrients • Availability of Solar Radiation • Margins of the Continents • Water Color and Life in the Oceans • Size • Viscosity • Temperature

Divisions of the Marine Environment 333

Pelagic Environment • Benthic Environment

Gulf Stream Rings and Marine Life 336**Distribution of Life in the Ocean 339**

Plankton • Nekton • Benthos

Summary 346

14**BIOLOGICAL PRODUCTIVITY—ENERGY TRANSFER 349****Taxonomic Classification 350****Macroscopic Plants 350**

Phylum Phaeophyta (Brown Algae) • Phylum Chlorophyta (Green Algae) • Phylum Rhodophyta (Red Algae) • Phylum Spermatophyta (Seed-Bearing Plants)

Microscopic Plants 354

Phylum Chrysophyta (Golden Algae) • Phylum Pyrrophyta (Dinoflagellate Algae)

Primary Productivity 355

Photosynthetic Productivity • Distribution of Photosynthetic Productivity • Temperature Stratification and Nutrient Supply • Chemosynthetic Productivity

Energy Transfer 362

Marine Ecosystem • Energy Flow • Composition of Organic Matter • Biogeochemical Cycling

Comparison of Spring Blooms in Shelf, Slope, Warm-Core Rings, and Gulf Stream Waters 364**Trophic Levels and Biomass Pyramids 372**

Trophic Levels • Transfer Efficiency • Biomass Pyramid

Summary 374

15**ANIMALS OF THE PELAGIC ENVIRONMENT 379****Staying Above the Ocean Floor 380**

Gas Containers • Floating Forms • Swimming Forms • Modifications in Swimming Behavior

Marine Mammals 388

Cetaceans

Group Behavior 394

Schooling • Migration • Reproduction

Summary 400

16

ANIMALS OF THE BENTHIC ENVIRONMENT 405

Rocky Shores 406

Supralittoral (Spray) Zone • High-Tide Zone • Middle-Tide Zone • Low-Tide Zone

Sediment-Covered Shore

The Sediment • Life in the Sediment • The Sandy Beach • The Mud Flat

Shallow Offshore Ocean Floor (Sublittoral) 419

The Rocky Bottom • Coral Reefs

Deep-Ocean Floor 427

The Physical Environment • Deep-Sea Hydrothermal Vent Biocommunities • Low-Temperature Seep Biocommunities

Life on the Deep-Ocean Floor 430

Summary 435

17

EXPLOITATION OF MARINE RESOURCES 439

Law of the Sea 441

Fisheries 442

Fisheries and Marine Biology • The Ecosystem Approach to Fishery Assessment • Upwelling and Fisheries • New Technologies Useful in Studying Fisheries Ecology • The Future of Fisheries Management • Regulation

Peruvian Anchoveta Fishery 450

Physical Conditions • Biological Conditions • A Natural Hazard • An Artificial Hazard

Mariculture 453

Algae • Bivalves • Crustaceans • Fish

What Lies Ahead? 455

Nonliving Resources 455

Petroleum • Minerals

Desalination 457

Summary 459

18

MARINE POLLUTION 463

Capacity of the Oceans for Accepting Society's Wastes 464

Predicting the Effects of Pollution on Marine Organisms 464

Marine Pollution Control in the United States 466

Areas of Concern 466

Plastics • Petroleum • Sewage • Radioactive Waste • Halogenated Hydrocarbons (DDT and PCBs) • Mercury

Subsea Disposal of High-Level Nuclear Waste 476

International Efforts to Protect the Marine Environment 479

Summary 479

APPENDIXES

I Scientific Notation 483

II The Metric System and Conversion Factors 484

III Periodic Table of the Elements 485

IV The Geologic Time Table 486

V The Phylogenetic Tree 487

VI Taxonomic Classification of Common Marine Organisms 488

VII Calculations Relative to Source of Ocean Water 491

VIII Roots, Prefixes, and Suffixes 492

IX Latitude and Longitude Determination 494

GLOSSARY 497
