

CONTENTS

Editor's Introduction 5

1. The Exploratory Perspective 9

2. Looking at Data: Distributions of Single Variables 13

Introduction 13

Displaying Data: The Stem-and-Leaf 16

Summarizing Data 19

Resistant Statistics and Number Summaries 19

The Box-and-Whisker 23

Understanding Data 25

Skewness 26

Outliers 27

Gaps and Multiple Peaks 29

Summary 30

3. Looking at Data: Relationships Between Variables 31

Introduction 31

Displaying Relationships: The Scatter Plot 32

Summarizing Relationships 34

Fitting a Line 34

Smoothing the Data 36

Median and Hinge Traces 39

Examining Residuals 42

Understanding Relationships 46

Outliers 46

Nonlinear Monotonic Relationships 48

Nonmonotonic Relationships 50

Summary 51

4. Looking for Structure: Reexpression 52

Introduction 52

Choosing Reexpressions 58

Nonlinear Monotonic Functions 59

Nonmonotonic Functions 65

Summary 66

5. Multivariate Analysis: Putting It All Together 69

Step 1: Univariate Analysis 70

Step 2: Bivariate Analysis 71

Step 3: Multivariate Analysis 71

Step 4: Causal Analysis 72

6. The Exploratory Perspective Revisited 76
