

INDEX

LECTURE

- R. W. Baloh** Assymetries in vertical visual-vestibular interaction. Causes and implications. 16

ANATOMIE

- U. Büttner** Pioneers of mesencephalic research: Forel, Darkschewitsch and Cajal. 24

PHYSIOLOGY

- W. Becker** Perception of motion in space during vestibular and neck 30
T. Mergner stimulation.
- Z. Bohdanecký** Spatial factors in visual – manual coordination 33
- AM. Bronstein** Visual responses: head oscillation modifies spatial but not temporal 35
responses in a patient lacking vestibular reflexes.
- I. S. Curthoys** High acceleration horizontal impulsive head rotations show 39
unilateral vestibular loss: evidence from single neuron recordings
in the guinea-pig medial vestibular nucleus (MVN)
- E. Černý** Influence of calorisation on spontaneous direction–alternating 41
somato–autokinesis
- M. Fetter** Three–dimensional properties of the human vestibulo–ocular reflex 44
- S. Glasauer** Human spatial orientation during centrifuge experiments: 48
non–linear interaction of semicircular canals and otoliths
- M. A. Gresty** Comparative dynamics of visual versus non–visual head 53
stabilisation in roll and pitch
- S. Glasauer** Linear path integration during locomotion: I. normal subjects 57
- S. Glasauer** Linear path integration during locomotion: II. 61
labyrinthine–defective subjects

K. F. Hamann	Dependence of visual straight ahead on vestibular influences	65
I. Israël	Three-dimensional whole-body rotation intergration in humans	67
R. Jell	Human optokinetic afternystagmus with restricted visual field stimulation	73
M. Juhola	Computer analysis of vestibulo-ocular reflex	79
R. Kanayama	Effect of aging on smooth pursuit eye movement	82
K. Kitamura	Morphological findings of the vestibular nerve in Meniere's disease	88
E. Koenig	The transfer of vestibular habituation to optokinetic aftereffects in humans - evidence of a common velocity storage.	91
I. Koizuka	High-resolution MRI of the human inner ear	96
T. Mergner	Neck proprioception after loss of vestibular function	99
M. L. Mittelstaedt	The contribution of inertial and substratal information to the perception of linear displacement	102
K. Mizuta	Studies on optokinetic nystagmus in the elderly Japanese	106
N. Ohashi	Prediction and visual feedback of smooth pursuit in normal subjects	110
I. Pyykkö	Eye tracking during random pursuit test	114
E. Isotalo	Predictive and random saccades in the evaluation of the saccadic eye movement system in man	117
M. Sázel	Galvanic vestibular stimulation of a pilot in a flight simulator	120
M. Selhamer	Saccade trajectories with different head orientations	122
H. Shojaku	Effect of a three month sea voyage on vestibular system in humans	127
S. Steddin	Benign paroxysmal positioning vertigo: cupulolithiasis or a clot-induced endolymph-flow mechanism	130
C. Wall	The vertical eye movement response to visual and vestibular z-axis linear motion in humans	134

EXPERIMENTAL PHYSIOLOGY

T. Haslwanter	3D compensatory nystagmus elicited by rotations about off-vertical axes	140
----------------------	---	-----

H. Cohen	Vestibulo-ocular reflex modification in primates	145
V. E. Pettorossi	Anticompensatory fast phases of the vestibuloocular reflex in cats	150
D. M. Merfeld	Horizontal and vertical eye movements in humans during inter-aural linear acceleration	156
K. Fukushima	Impairment of vertical eye movement produced by chemical deactivation of the interstitial nucleus of Cajal and activity of eye movement-related neurons in chronically labyrinthectomized cats	161
A. Horii	Effect of caloric stimulation on the histaminergic neuron system of rats	167
I. Kato	Protectofugal pathways from the nucleus of the optic tract in the monkey	170
P. Lapeyre	Local orientations of hair bundles in guinea pig sacculle follow two to three major directions	173
S. Matsuo	Axonal trajectories in mesodiencephalon of cat posterior canal activated excitatory secondary vestibular neurons	176
A. M. Meyer	Glycerol effect on the healthy and hydropic guinea pig inner ear	182
S. Nakao	Vertical saccade or head rotation-related cat mesodiencephalic neurons: input from and output to the vestibular nucleus	186
K. Ohno	Cholinergic innervation in the rat vestibular end-organs	194
T. Saika	Changes in gene expression of neuropeptides after unilateral labyrinthectomy in the rat brainstem	196
M. Sakagami	Comparison of strial vascular permeability in endolymphatic hydrops between endolymphatic sac obliteration model and immunologically induced model	198
T. Takeda	Antidiuretic hormone (ADH) in patients with Meniere's disease	201

CLINICAL STUDIES

G. Agus	Atypical paroxysmal nystagmus patterns in paroxysmal positioning vertigo: importance of diagnostic and therapeutic physical manoeuvres	206

E. Nagymajtényi	The vestibular function of deaf children	250
T. Nakamura	Remembered saccades in response to neck stimulation	253
M. E. Norré	Results of six tests—posturography in patients with benign paroxysmal positioning vertigo and Meniere's disease	259
M. E. Norré	Posturography in head retroflexed position in patients with benign paroxysmal positional vertigo (BPPV)	262
M. Ohki	Ocular abnormalities in amyotrophic lateral sclerosis	264
I. Pyykkö	Human spumaretrovirus is often causing the sudden hearing loss with or without vertigo	271
D. Schneider	Vestibular evoked potentials in acoustic neurinoma patients	274
I. Šejna	Cochleovestibular symptoms in patients with tyme borreliosis	278
N. Takeda	Pharmacology of motion-induced emesis in rats	281
J. A. Waterston	Head-free and head-fixed pursuit in patients with vestibular, cerebellar and parkinsonian disorders	284
S. L. Wearne	Deviation of the axis of eye rotation during rotation in yaw following unilateral vestibular deafferentation	289
S. Wolf	First results of ambulatory „Telemetric“ electronystagmography	292

L. Yardley	Contribution of anxiety to handicap in patient with vertigo	296
L. Yardley	Autonomic nervous system responses to head movement in patients with vertigo: relationship between symptoms, anxiety and psychophysiologic arousal	300
Yi-Ho Young	Caloric irregularity: a new term associated with floating labyrinth	304
G. M. Halmagyi	Torsional nystagmus in patients with unilateral meso-diencephalic lesions	308
G. M. Halmagyi	The human vertical vestibulo-ocular reflex in response to high acceleration stimulation after unilateral vestibular neurotomy	310
G. M. Halmagyi	Aminoglycoside vestibulotoxicity	312
R. Černý	Nicotergoline efficacy in dizzy patient	314

CLINICAL CASES

M. Arai	Nasal encephalocele with see-saw nystagmus	318
B. Büki	Acute changes of the cochlear function during haemodialysis therapy	322
R. Kohut	Predicted perilymphatic fistula: Menieres disease, cochlear Meniere's disease, and Kearn-Sayres syndrome revisited	326
S. Ogino	Role of central and peripheral retinal lesions on optokinetic nystagmus and smooth pursuit eye movements	331
K. Takahashi	A clinicopathological study of an autopsy case with probable Machado-Joseph Disease in Japan	333
T. Tsuzuku	Neuropathology of two sisters with sudanophilic leukodystrophy manifesting downbeat nystagmus	335

PHYSICAL TREATMENT

H. Cohen	Purposeful activity for vestibular rehabilitation	314
Y. Ito	Equilibrium training for patients with vestibular disorders	345
K. Tokumasu	Physical training for dizzy patients	349

THERAPY

C. T. Haid	New trends in surgical treatment of vertigo via the enlarged middle cranial fossa approach	356
T. Huang	Endolymphatic sac ballooning surgery for Meniere's disease running title: Ballooning surgery	361
D. Ireland	The Sémont maneuver	367
H. Jenkins	Long-term compensation following vestibular nerve section	371

KAMPO MEDICINE

L. Beneš	Studies on the antioxidant activity of Kampo medicines in vitro	376
T. Ishida	Treatment of Meniere's disease with Sairei-to (TJ-114)	379
T. Ishii	Clinical experience with Tsumura hange-byakujutsu-tenma-to (TJ-37) on peripheral vertigo	383
A. Koda	Immunopharmacological effects of Oren-gedoku-to and its component	386
H. Mayerová	Antivertiginous effect of Oren-gedoku-to in comparison with cinnarizine	388
H. Miyata	Clinical experience with Sairei-to (TJ-114) and Oren-gedoku-to (TJ-15) in the treatment of vertigo	391
K. Mizukoshi	Clinical use of Kampo medicine in patients with vertigo	395
H. Nishida	Clinical study of Saiboku-to (TJ-98) on subjective idiopathic tinnitus	402
H. Krejčová	The influence of Oren-gedoku-to (TJ-15) on vascular vertigo in hypertension	405
T. Saito	Clinical experience with Oren-gedoku-to }TJ-15) in vertigo	408
M. Tei	Pharmacology of some Kampo formulae applied to vertigo	410
K. Terasava	Effects of the Kampo formulation (keishibukuryo-gan) on patients with cerebrospinal vascular disease	412
H. Yamaguchi	Suppressive effect of Sairei-to (TJ-114), Sho-saiko-to (TJ-9) and their common component, orgon (scutellaria root) on production of tumor necrosis factor in murine macrophages	415

MENIERE'S DISEASE

I. Pyykkö	Pitfalls in treatment of Meniere's disease with gentamicin	420
M. Novotný	Time dynamics of biopsychosocial factors in Meniere's disease	423
E. Szabados	Procaine-hci therapy in Meniere's disease	427
K. Mizukoshi	Epidemiological study on Meniere's disease in Japan, 1975-1990	430

POSTUROGRAPHY

T. Ledin	Perturbed posturography - a means to study postural reactions to external disturbances	440
T. Ledin	Modified dynamic posturography and the rattle test: effects of alcohol	442

CLOSING REMARKS

V. Henn	The vestibular system - a historical perspective	448
