<i>Preface</i>	xi
Part 1 Getting your bearings	1
1 What is a case study?	3
Is the case study scientific?	7
Some definitions	9
What is a case?	11
What is and is <i>not</i> a case?	14
What is the case study good and not good for?	17
If you take only one thing from this chapter, take this ...	23
Further reading	23
2 Case study and research design	25
Doing the right kind of research	25
What is design?	26
First things first: your purpose	27
Next, your question	28
How to go from idea to question to case study	31
Questions and different approaches to research	35
Design frames and methods	37
Using storyboards to help you design your case study	38
If you take only one thing from this chapter, take this ...	43
Further reading	44
3 Models of the whole	45
Why am I reading this chapter?	45
Break things down or see them as wholes?	45
Gestalt psychology	49
Dramas, theatres and stages	50
Ecological psychology	52
Systems thinking	55
If you take only one thing from this chapter, take this ...	59
Further reading	59

4 Ensuring quality in your case study: what's important?	61
Is the 'sample' important?	61
Do I have to worry about reliability and validity in a case study?	62
Quality	66
Ethics	68
If you take only one thing from this chapter, take this ...	71
Further reading	71
Part 2 Getting down to doing it	73
5 Kinds of case studies: finding your case	75
How do you find your case?	75
Same starting points, different paths – there's no <i>right</i> way	89
Kinds of case studies	90
If you take only one thing from this chapter, take this ...	95
Further reading	96
6 Your purpose	97
Intrinsic	98
Instrumental	98
Evaluative	99
Explanatory	101
Exploratory	104
If you take only one thing from this chapter, take this ...	109
Further reading	109
7 Your approach	111
Building a theory	112
Testing a theory	115
Drawing a picture – illustrative–demonstrative	118
Interpretative	124
Experimental	129
If you take only one thing from this chapter, take this ...	134
Further reading	135
8 Your process	137
The single case	138
The multiple or collective or comparative case (or cross-case analysis)	141
Retrospective	145
The snapshot	146
Diachronic studies	149
Nested case studies	152

Parallel and sequential studies	155
If you take only one thing from this chapter, take this ...	157
Further reading	158
Part 3 Getting on with it and finishing	159
9 Out in the field: some ways to collect data and evidence	161
Interviews	162
Accounts	163
Diaries	164
Group interviews and focus groups	164
Interrogating documents	164
Questionnaires	165
Observation	165
Image-based methods	166
Measurements and tests	167
Official statistics and other numerical data	167
If you take only one thing from this chapter, take this ...	168
Further reading	168
10 A toolkit for analysing and thinking	170
Constant comparative method: eliciting themes	171
Systems thinking	173
Drawing storyboards – the nuts and bolts	176
Developing your theory	178
Using narrative	184
Think drama	188
Being intuitive and imaginative	190
If you take only one thing from this chapter, take this ...	192
Further reading	193
11 Writing your study	194
Structure	194
Writing up your case study	196
Some rules for writers	202
If you take only one thing from this chapter, take this ...	205
Further reading	205
12 The fancy stuff: generalisation, induction, abduction, phronesis and theory	206
What can the case study tell us?	206
Generalisation – is the case study really all that bad?	210

Finding or regularising	215
If you take only one thing from this chapter, take this ...	216
... and this – a final final thought	217
Further reading	217
Other reading	218
