

# Table of Contents

<b>1. Introduction</b> .....	<b>9</b>
1.1. Aims of the project .....	9
1.2. Theoretical basis of the study .....	10
1.3. Project staff .....	10
<b>2. Alkaline complexes – diamond implication</b> .....	<b>11</b>
2.1. Introduction .....	11
2.2. The nomenclature of alkaline igneous rocks .....	11
2.2.1. Terminology .....	11
2.2.2. Syenitic rocks .....	11
2.2.3. Ijolitic rocks .....	12
2.2.4. Mafic intrusive rocks .....	12
2.2.5. Carbonatite .....	12
2.3. Structural setting of peralkaline rocks .....	12
2.4. Cyclicity of continental alkaline magmatism in the geological record (TAYLOR – BRISTOW 1998) .....	12
2.5. Anorthosites and related alkaline rocks .....	13
2.5.1. Precambrian anorthosites from Peninsular India (LEELANANDAM – REDDY 1998) .....	13
2.5.2. The Oddanchathram anorthosite .....	13
2.6. A comparison of the carbonatite-nephelinite igneous complexes with kimberlite occurrences .....	13
2.6.1. America .....	14
2.6.2. Europe .....	14
2.6.3. Asia .....	14
2.6.4. Africa .....	14
2.7. Alkaline magmatism in Peninsular India (RAJESH – SANTOSH 1996) .....	14
2.7.1. Petrology of the alkaline plutons from the Eastern and Southern Peninsular India (RAJNAKAR – LEELANANDAM 1989) .....	15
2.7.1.1. Alkaline plutons of the Kerala region, South India (SANTOSH 1989) .....	16
2.7.1.2. The Alkaline gneisses of Khariar, Orissa .....	16
<b>3. Mafic dykes – diamond implications</b> .....	<b>16</b>
3.1. Introduction .....	17
3.2. Giant radiating dyke swarms, large igneous provinces and mantle plumes (ERNST – BUCHAN 1997) .....	18
3.3. Global mafic magmatism at 2.45 Ga (HEAMAN 1997) .....	19
3.4. Direction of dyke propagation .....	19
3.5. Dyke intrusions in shear fractures: stress orientation and depth of emplacement (WILSON – LARSEN 1985) .....	20
3.6. Intrusion and crystallisation features in Proterozoic dyke swarms (CADMAN et al. 1990) .....	20
3.7. Geochemistry of mafic dykes .....	21
3.8. Tectonic applications and implications .....	21
3.9. Post-cratonisation mafic and ultramafic dykes of the Yilgarn Block (HALLBERG 1987) .....	22
3.9.1. Distribution of the dykes .....	22
3.9.2. Age .....	22
3.9.3. Basic dykes of the Yilgarn Block and their palaeomagnetic ages (GIDDING 1976) .....	23
3.9.4. Magnetic dykes in the Yilgarn Craton .....	23
3.10. Mafic dyke swarms of the Indian shield .....	24
3.10.1. Dharwar Craton .....	24
3.10.2. Singhbhum Craton .....	24
3.10.3. Early Precambrian Singhbhum granite .....	25
3.10.4. Aravalli Craton .....	25
3.10.5. Gondwana Basins .....	25
3.10.6. Deccan Traps .....	25
3.10.7. Dolerite dykes around the Proterozoic Cuddapah Basin in South India .....	25
3.10.7.1. Time of early sedimentation and volcanism in the Proterozoic Cuddapah Basin (BHASKAR RAO et al. 1995) .....	26
3.10.8. Bhanupratappur-Keskal mafic dyke swarm (BK-MDS) .....	26
3.10.9. Neo-Proterozoic dyke swarms (NPDS) of Southern Karnataka .....	26
3.10.10. Mafic dykes in western crust of India (POWAR – VADETWAR 1995) .....	26

3.10.11. Mafic dykes in Aravalli mountain, Rajasthan (ROY et al. 1995) .....	27
3.10.12. Mafic dykes in the Bastar Precambrian (RAMACHANDRA et al. 1995) .....	27
<b>4. Kimberlites and lamproites – diamond implications .....</b>	<b>27</b>
4.1. African kimberlites (LUBALA 1991) .....	27
4.1.1. Peridotite xenoliths .....	29
4.1.1.1. Low-temperature peridotites .....	29
4.1.1.2. High temperature peridotites .....	29
4.1.1.3. Modal metasomatised peridotites .....	29
4.1.2. Thermobarometry (from kimberlite xenoliths and mineral concentrates) .....	29
4.1.3. Mineral inclusion in diamonds – diamond origin implications (WANG 1998) .....	30
4.1.4. Synopsis .....	30
4.2. Lamproites and kimberlites in India (SCOTT SMITH 1989) .....	31
4.2.1. Majhgawan and Hinota .....	31
4.2.2. Gondwana Coalfields .....	31
4.2.3. Wajrakarur and Lattavaram – kimberlites .....	31
4.2.4. Chelima .....	32
4.2.5. Maddur and Narayanpet – Mahbubnabar District .....	31
4.2.6. Intra-crustal structure inferred from aeromagnetics in a part of the Eastern Dharwar Craton and its significance in kimberlite exploration (ATCHUTA RAO 1996) .....	32
4.2.7. Secondary diamond deposits in India .....	32
4.2.7.1. Upper Proterozoic conglomerates .....	32
4.2.7.2. Quarternary deposits .....	33
4.3. Diamondiferous kimberlites in Slave Craton (CARLSON et al. 1998) .....	33
4.4. “Kimberlites” in the Yilgarn Craton and its environs .....	34
<b>5. Proterozoic super continent – Gondwanaland .....</b>	<b>35</b>
5.1. Tectonic evolution of Proterozoic Australia (MYERS et al. 1996) .....	35
5.2. Correlation between the Albany, Fraser and Darling mobile belts of Western Australia (HARRIS 1995) .....	35
5.2.1. Albany Mobile Belt .....	36
5.2.2. The Fraser Mobile Belt .....	36
5.2.3. The Darling Mobile Belt .....	36
5.2.4. Synopsis .....	36
5.3. Australian Albany Fraser Mobile Belt: gross geometry, age relationship and tectonics in Precambrian Gondwanaland (KATZ 1989) .....	37
5.4. Southern India as an integral part of East Gondwana super continent .....	37
<b>6. Tectono-stratigraphic terrane elements in the Indian subcontinent (RADHAKRISHNA 1990) .....</b>	<b>37</b>
6.1. Archaean gneiss-granulitic terrane of Tamil Nadu – Kerala .....	37
6.2. Early Proterozoic magmatic terrane – “Southern Peninsular Block” .....	37
6.3. Late Archaean – Early Proterozoic reworking .....	38
6.4. Early Proterozoic magmatic terrane – “Northern Bundelkhand Block” .....	38
6.4.1. Bundelkhand granite batholith .....	38
6.5. Early Proterozoic Chhotanagpur terrane .....	38
6.6. Early Proterozoic metamorphic belts of Central and Eastern India .....	38
6.7. Precambrian granitoids of Southern India .....	39
6.8. Archaean Dharwar Craton .....	39
6.8.1. Metamorphism in the Dharwar Craton .....	39
6.8.2. Closepet granite batholith .....	40
6.9. Mid to late Proterozoic Eastern Ghats terrane (1600–970 Ma) .....	40
6.9.1. Progressive metamorphism from greenschist to granulite facies in the Dharwar Craton .....	40
6.10. The late Proterozoic magmatic activity in West Indian Craton (BHUSHAN 1995) .....	40
<b>7. Sutures, rifts, shear zones – diamond implications .....</b>	<b>41</b>
7.1. Introduction .....	41
7.2. Suture Zones (MOORES 1941) .....	41
7.3. Shear zones and their significance .....	42
7.4. Proterozoic shear zones in southern granulite terrains of India .....	42

7.5. Proterozoic ductile shear zones in the Eastern Ghats Granulite Belt (CHETTY 1995) .....	42
7.6. Lineament fabric of Central India (RAJURKAR et al. 1990) .....	42
7.7. Thermal and crustal structure of “Sonata” – a zone of mid continental rifting in Indian shield (SHANKER 1991) .....	43
7.8. The Central Indian Tectonic Zone .....	43
7.8.1. The Satpura Mobile Belts .....	43
7.8.2. Central Indian Suture .....	44
7.8.3. Singhbhum Shear Belt .....	44
7.8.4. Late Archaean thermotectonic events in the Dharwar Craton (BHASKAR RAO et al. 1992) .....	44
7.9. Neotectonic reactivation of the Yilgarn Craton .....	44
<b>8. Radioactivity heat, heat flow and rifting .....</b>	<b>45</b>
8.1. Archaean crustal heat and cratonisation .....	45
8.2. Radioactivity heat, heat flow and rifting of the Indian continental crust (ROGERS – CALLAHAN 1987) .....	45
8.3. Heat flow, heat generation and crustal thermal structure of the northern block of the South Indian Craton (GUPTA et al. 1988) .....	45
<b>9. Lithosphere mapping methodologies .....</b>	<b>46</b>
9.1. 4D Lithosphere Mapping: methodology and examples (O'REILLY – GRIFFIN 1996) .....	46
9.2. Heat flux of the Earth .....	46
9.3. Mantle-derived intraplate volcanics (basalts and kimberlites) .....	46
9.4. Geotherms (from xenoliths and mineral concentrates) .....	47
9.5. Lithosphere stratigraphy .....	47
9.6. Lithosphere evolution .....	47
9.7. The crust-mantle boundary .....	48
9.8. The lithosphere/asthenosphere boundary .....	48
9.9. Lithospheres are not forever (GRIFFIN et al. 1994) .....	48
9.10. Lithospheric evolution through geological time (GREEN 1995) .....	49
9.11. Architecture of the Indian Shield (MAHADEVAN 1996) .....	49
9.11.1. Crustal thickness .....	49
9.11.2. Lithospheric thickness .....	50
9.11.3. Granulite evolution in South India – a seismic tomographic prospective (SHYAM RAI 1996) .....	50
9.11.4. Geological implications .....	50
9.12. Upper mantle structure beneath Western Australia (HILST et al. 1988) .....	51
9.12.1. P-Wave tomography .....	51
9.13. Lithosphere structure of Slave Craton (GRIFFIN et al. 1998) .....	51
9.14. Application of geophysical mapping using gravity magnetic and thermal methods to study the structure of the crust and lithosphere.....	52
9.14.1. Geophysical correlation of the Slave, India and Yilgarn Cratons .....	53
<b>10. Diamond prospectivity of Cratons .....</b>	<b>53</b>
10.1. Overview .....	53
10.2. Temporal and spatial control of the measurable diamond prospectivity parameters in the Craton profile .....	53
10.3. Diamond prospectivity modelling .....	55
10.3.1. Previous work .....	55
10.3.2. Limitation .....	55
10.3.3. Exploration model .....	55
10.3.4. Methodology .....	55
10.3.5. Measurable diamond prospectivity parameters .....	56
10.3.6. Production of prospectivity maps .....	58
10.3.7. Maps of diamond prospectivity parameters .....	58
10.3.7.1. Semi-quantified maps of the diamond prospectivity parameters .....	58
10.3.7.2. Quantified maps of the diamond prospectivity parameters .....	59
10.4. Diamond prospectivity maps of the Cratons .....	59
10.5. Interpretation of diamond prospectivity maps of Slave, Peninsular India and Yilgarn Cratons .....	59
10.5.1. Slave Craton diamond prospectivity maps .....	60
10.5.1.1. Unweighted diamond proximity model of the Slave Craton .....	60
10.5.1.2. Weighted diamond proximity model of the Slave Craton .....	61

10.5.2. The Peninsular India diamond prospectivity maps .....	61
10.5.2.1. Weighted diamond proximity model of the Peninsular India .....	61
10.5.3. Yilgarn diamond prospectivity maps .....	61
10.5.3.1. Weighted diamond proximity model (Model 4) of the Yilgarn Craton (Map 19) .....	61
10.6. Diamond prospectivity models comparison .....	61
<b>11. Conclusions .....</b>	<b>61</b>
<b>12. Recommendations and future work .....</b>	<b>62</b>
<b>References .....</b>	<b>62</b>
<b>Maps .....</b>	<b>65</b>
