Introduction	1
---------------------	----------

PART I Historical and Doctrinal Background

1	Innovating in China's Entrepreneurial Ecosystem	21
2	The Extent of Fuzzy Logic: The Tech Giants and Their 'Illegal' Legal Structure	36
3	China's Cyber Policies: Conflict between Innovation and Restriction	62
4	China's Data Security Policies Leading to the Cyber Security Law	80
5	The Cyber Security Law: Fuzzy Logic in a Touchstone Law	94

PART II Impact on Artificial Intelligence

6	The Impacts of Data Localisation on Globalised Ecosystems and Chinese Tech	129
7	Data Protection but Not Data Privacy: 'Data Protection Shall Not Hinder AI'	154
8	The Current State of AI Research Is Perfectly Suited to China's Fuzzy Logic System	209
9	Open-Source AI Platforms and the Cyber Security Law	260

Conclusion: Effect of Data Localisation on Chinese AI Innovation	329

DETAILED CONTENTS

<i>Acknowledgements</i>	xiii
<i>List of Abbreviations</i>	xiv

Introduction 1

0.1	Innovation versus Restriction	4
0.1.1	Internet Plus	4
0.1.2	Network Sovereignty	5
0.2	Fuzzy Logic: The Chinese Approach to Innovation Regulation	7
0.2.1	Policy Petri Dishes in Chinese Innovation	9
0.2.2	Fuzzy Logic	11
0.3	Significance of Data Localisation	15
0.4	Research Methodology	18

PART I Historical and Doctrinal Background

1	Innovating in China's Entrepreneurial Ecosystem	21
1.1	'China Cannot Innovate'	21
1.2	The Origin of China's Policy Petri Dishes	24
1.3	China's Unique Ecosystem: Adept at Catching Up	26
1.4	Top-Down or Bottom-Up Innovation?	29
1.5	Entrepreneurial Ecosystems with Chinese Characteristics	32
1.6	Conclusion: Assumptions on Chinese Innovation Challenges	35
2	The Extent of Fuzzy Logic: The Tech Giants and Their 'Illegal' Legal Structure	36
2.1	'Fuzzy Logic' Laws	37
2.1.1	What Is Meant by a 'Fuzzy Logic' Law in China?	38
2.2	Offshore Legal Structures: The Variable-Interest Entity (VIE)	39
2.2.1	The VIE Structure	40
2.2.2	Evading China's Investment Laws	42
2.2.3	Paradoxical Side Effects of Fuzzy Logic on VIEs	43

2.2.4	Disputes between Chinese Tech Firms and Activist VIE Investors	46
2.3	The End of VIEs or a False Alarm?	50
2.3.1	Future Legal Implications and Risks	51
2.4	China Unable to Lure the Champions Home: 2018	52
2.4.1	Maintaining the Fuzzy Logic: CDRs and the 2019 Foreign Investment Law	53
2.5	US Blacklistings in 2019–2020: Are VIEs Still Relevant?	56
2.6	Conclusion: Still Too Big to Fail	59
3	China's Cyber Policies: Conflict between Innovation and Restriction	62
3.1	Internet Plus versus Network Sovereignty	62
3.2	Internet Plus	63
3.2.1	Background to Internet Plus: China's Informatisation Strategy	64
3.3	China's Cyber Institutions	65
3.4	The Language of Internet Plus: Promoting Global Cooperation	70
3.5	Network Sovereignty	72
3.6	Network Sovereignty, Content Censorship, Internet Plus and the Influence of the BATs	77
3.7	Conclusion: Unresolved Questions	78
4	China's Data Security Policies Leading to the Cyber Security Law	80
4.1	Planning for China's Cyber Regime: 'Cyber Security and Informatisation Are Two Wings of One Body'	81
4.2	The Critical Need for a Cyber Security Regime in China	83
4.3	Network Sovereignty Laws Prior to the Cyber Security Law	85
4.4	China's Anti-Terrorism Law	87
4.4.1	Data Encryption and Backdoor Keys in the United States	89
4.5	Conclusion: Policy Indicators?	92
5	The Cyber Security Law: Fuzzy Logic in a Touchstone Law	94
5.1	Background: Initial Drafting, Consultation then Delayed Implementation	96
5.2	The Law: Vague Regulations Make Compliance Difficult	98
5.2.1	Vague Rules: To Whom Does the Law Apply?	98

5.2.2	Vague Rules: Data Localisation (Data Storage Requirements and Data Exits)	102
5.2.3	Vague Rules: Unclear Product Review Requirements	105
5.3	Backdoors under the Cyber Security Law?	107
5.4	Third Parties in Security Reviews under the Cyber Security Law	110
5.5	Evolving and Contradictory Subordinate Regulations on Data Transfers and Network Security	115
5.6	Unresolved Issues: The Current Status of Cross-Border Data Flows under Article 37 of the Cyber Security Law	118
5.6.1	‘Important Data’	121
5.6.2	‘Network Operators’ Remains Broad and Undefined	122
5.7	Conclusion: Fuzzy Logic, Even in a Touchstone Law	124

PART II Impact on Artificial Intelligence

6	The Impacts of Data Localisation on Globalised Ecosystems and Chinese Tech	129
6.1	Background	130
6.2	What Is Data Localisation?	133
6.3	Two Major Motivations for Data Localisation: Protecting Personal Data and Ensuring Government Control over Data	133
6.4	Existing Theories about Data Localisation Laws	137
6.4.1	Arguments against Data Localisation Laws: Protectionism versus Data Protection	138
6.4.2	Data Localisation Is ‘Technically Unviable’ and Counterproductive to Data Protection Goals and National Security Concerns	141
6.4.3	Increased Costs for Companies and Consumers	144
6.5	Implications of the Rise of AI: Fuzzy Logic Masks Motivations for Data Localisation	147
6.6	Conclusion: Costs–Benefits Can Change	152
7	Data Protection but Not Data Privacy: ‘Data Protection Shall Not Hinder AI’	154
7.1	Background: New Data Protection Regime Still Emerging	155
7.1.1	Increased Data Protection under the Cyber Security Law	159
7.2	Enforced Real-Name User Registration	159
7.2.1	Real-Name User Registration	161
7.2.2	Data Protection, not Privacy	164

7.3	Data Protection a Key Social Issue, among Many ‘Trust’ Scandals	166
7.4	Polling: Growing Awareness of Data Privacy Issues	175
7.5	BATs and Other Tech Firms Face Regular Data Protection Penalties, but Push Back against Authorities	177
7.6	Privacy Standards Follow the Cyber Security Law on ‘Data Protection’	180
7.6.1	What Is Protected Personal Information?	185
7.6.2	What Were the Drafters of the Original Privacy Standards Intending?	186
7.7	Definitional Fuzzy Logic in the Privacy Standards: Fuzzy Logic for <i>Applying</i> the standards	187
7.7.1	‘Sensitive Personal Information’ and ‘Core Business Functions’	189
7.8	Periodic Data Protection Impact Assessments	192
7.9	2021: China’s Data Security Law and Personal Information Protection Law to Become Fuzzy Logic Law?	194
7.9.1	Consent and Storage of ‘Sensitive Personal Information’	196
7.9.2	Data Localisation Expanded in 2021 and Beyond?	197
7.10	Real-Name Registration, AI Development and Why Private Companies Control China’s Datasets	201
7.11	Conclusion: Inherent Fuzzy Logic Leading to Data Privacy Contradictions That May Benefit AI Development	207

8 The Current State of AI Research Is Perfectly Suited to China’s Fuzzy Logic System 209

8.1	Why Has AI Developed So Quickly in China? The Current State of AI	213
8.2	An AI ‘Sputnik Moment’ for China	221
8.3	AI Research Is Collaborative, Providing the Ideal Environment for China to Establish Pilot Rollouts	223
8.4	Why Has AI Developed So Quickly in China? Private Firm/Government Symbiosis and Public–Private Petri Dishes	227
8.5	Smart Cities as Petri Dishes for AI Development	232
8.6	Incorporation of AI into Smart City and Innovation Policies: The AI Plan	238
8.7	The AI Plan and Smart City Policies as Top-Down Signalling	243
8.8	The Role of Public–Private Partnerships in China’s National AI Platforms	247

8.9	Public–Private Standard Setting and Interoperability	251
8.9.1	Questions Remain Regarding the AI National Team	252
8.10	Local Government Responses to Central Top-Down Signalling	254
8.11	Will Network Sovereignty Threaten AI Development in China?	256
8.12	Conclusion: Public–Private Symbiosis	258

9 Open-Source AI Platforms and the Cyber Security Law 260

9.1	What Are Open-Source AI Platforms?	262
9.2	History of Open-Source Platforms in China	265
9.3	Benefits of Open-Source Platforms for Innovation in AI	275
9.3.1	Attracting Talent through Open Innovation	276
9.3.2	Transparency: Researchers Demand Repeatability	278
9.3.3	Cloud Computing Onboarding	282
9.3.4	Maintenance and Crowdsourced Innovations	285
9.4	Global Nature of Open-Source AI Platforms and Role of Global R&D Centres in AI Development in China	286
9.4.1	Global R&D Centres	289
9.5	Chinese Government Approach to Open-Source AI Platforms: Public–Private Platforms for Domestic Open Innovation	293
9.5.1	The ‘Open-Source’ Aspects of the National AI Platforms	293
9.6	Key Features of Open-Source AI Relevant to Applying the Cyber Security Law	301
9.7	Case Studies of Open-Source AI Platforms in China	306
9.7.1	Apollo: ‘Android for Automated Vehicles’	313
9.7.2	Apollo’s Data-Sharing Policies	318
9.7.3	GPS Mapping Laws: Network Sovereignty as Economic Protectionism?	322
9.8	Conclusion: Linked Open-Source Ecosystems?	326

Conclusion: Effect of Data Localisation on Chinese AI Innovation 329

10.1	Fuzzy Logic	330
10.1.1	‘Important Data’ Remains Undefined in 2021	330
10.1.2	Concluding Remark: Fuzzy Logic Is Intentional	332
10.2	Future Uncertainties	335
10.2.1	Potential Future Developments in AI Policymaking	336
10.2.2	Future Impact of Fuzzy Logic Regulatory Practice on Tech Firms and Entrepreneurs	338
