

## CONTENTS

CONTRIBUTORS TO VOLUME VI . . . . .	v
EDITORS' PREFACE . . . . .	vii

### The Electron Microscopy of Macromolecules

BY RALPH W. G. WYCKOFF, *Experimental Biology and Medicine Institute, National Institutes of Health, Bethesda, Maryland*

I. Introduction . . . . .	1
II. Factors Determining Macromolecular Visibility . . . . .	2
III. Visualization of Macromolecules . . . . .	5
IV. Macromolecular Morphology . . . . .	6
V. Structure of Macromolecular Solids . . . . .	15
VI. Formation of Macromolecules . . . . .	29
References . . . . .	32

### Light Scattering in Protein Solutions

BY PAUL DOTY, *Department of Chemistry, Gibbs Memorial Laboratory, Harvard University, Cambridge, Massachusetts*

AND

JOHN T. EDSALL, *University Laboratory of Physical Chemistry Related to Medicine and Public Health, Harvard University, Boston, Massachusetts*

I. General Introduction: Two-Component Systems . . . . .	37
II. Multicomponent Systems of Small Molecules: Effects of Net Charge and of Ionic Strength on Turbidity in Protein Solutions . . . . .	55
III. Internal Interference and the Determination of Size . . . . .	73
IV. Study of Reactions Involving Macromolecules by Light Scattering . . . . .	90
V. Light Scattering in Dilute Solutions of Charged Macromolecules . . . . .	96
VI. Experimental Methods . . . . .	107
List of Principal Symbols Employed . . . . .	116
References . . . . .	118

### Poly- $\alpha$ -Amino Acids

BY EPHRAIM KATCHALSKI, *Weizmann Institute of Science, Rehovoth, Israel*

I. Introduction . . . . .	123
II. Synthesis of Poly- $\alpha$ -Amino Acids . . . . .	125
III. Water-Soluble Poly- $\alpha$ -Amino Acids . . . . .	153
IV. Behavior of Poly- $\alpha$ -Amino Acids towards Proteolytic Enzymes . . . . .	160
V. Average Molecular Weight of Poly- $\alpha$ -Amino Acids . . . . .	164
VI. Physical Properties of Poly- $\alpha$ -Amino Acids . . . . .	167
VII. Speculation on the Role of Polypeptides in the Living Cell . . . . .	179
References . . . . .	181

### Egg Proteins

BY HARRY L. FEVOLD, *Food Research Division, Quartermaster Food and Container Institute for the Armed Forces, Chicago, Illinois*

I. Introduction . . . . .	188
---------------------------	-----

II. Egg White Proteins . . . . .	189
III. Proteins of Egg Yolk . . . . .	237
IV. Proteins of Vitelline and Shell Membranes . . . . .	246
V. Concluding Statements . . . . .	246
References . . . . .	246

### Natural and Artificial Iodoproteins

BY JEAN ROCHE AND RAYMOND MICHEL, *Collège de France, Paris, France*

I. Introduction and General Plan . . . . .	253
II. Iodinated Amino Acids and the Mechanism of Formation of Thyroxine . . . . .	255
III. Thyroglobulins . . . . .	265
IV. Artificially Iodinated Proteins . . . . .	272
V. Iodinated Scleroproteins of Invertebrates . . . . .	284
VI. General Conclusions . . . . .	289
References . . . . .	290
Addendum . . . . .	297

### Glutamic Acid and Cerebral Function

BY HEINRICH WAELSCH, *Departments of Biochemistry, New York State Psychiatric Institute, and Columbia University, New York, New York*

I. Introduction . . . . .	301
II. The Determination of Glutamic Acid and Glutamine in Biological Material . . . . .	303
III. The Concentration of Glutamic Acid and Glutamine in Blood and Tissue . . . . .	305
IV. Glutamic Acid and Glutamine Metabolism in Preparation of Nervous Tissue . . . . .	308
V. Glutamic Acid and Glutamine Metabolism in Isolated Brain Preparations (Brain Perfusion) . . . . .	317
VI. Metabolism of Glutamic Acid and Glutamine in the Central System of Intact Animals . . . . .	321
VII. Effects of Glutamic Acid Administration in Man and Animals . . . . .	326
VIII. Pharmacological Effects . . . . .	334
IX. The Role of Glutamic Acid and Glutamine in Brain Metabolism . . . . .	335
References . . . . .	339

### Cross Linkages in Protein Chemistry

BY JOHAN BJORKSTEN, *Bjorksten Laboratories for Sponsored Industrial Research, Madison, Wisconsin*

I. Introduction . . . . .	343
II. Outline of Types of Industrial Problems Handled by Cross-Linking Reactions . . . . .	345
III. Cross-Linking Processes Indicated in the Patent Literature . . . . .	347
IV. Conclusion . . . . .	357
Annotated References . . . . .	358

### The Relation of Protein Metabolism to Disease

BY HERBERT POLLACK AND SEYMOUR LIONEL HALPERN, *Mount Sinai Hospital, New York, New York*

I. Introduction . . . . .	385
---------------------------	-----

## CONTENTS

xi

II. Protein Metabolism . . . . .	388
III. Evaluation of Methods Used in Determining Protein Status . . . . .	394
IV. Factors Influencing Protein Metabolism . . . . .	401
V. Protein Disequilibrium . . . . .	411
VI. Consequences of Prolonged Protein Disequilibrium and of Protein Deficiency . . . . .	423
VII. Correction of Abnormal Protein Metabolic States . . . . .	430
References . . . . .	443
Cumulative Subject Index for Volumes I-V . . . . .	455
Author Index . . . . .	513
Subject Index . . . . .	537
