

CONTENTS

CONTRIBUTORS TO VOLUME VII	v
--------------------------------------	---

The Arrangement of Amino Acids in Proteins

BY F. SANGER, *Sir William Dunn Institute of Biochemistry, University of Cambridge,
Cambridge, England*

I. Introduction	2
II. Nomenclature.	3
III. Determination of the Position of Individual Residues in Proteins	5
IV. Methods for the Degradation of Proteins.	11
V. Fractionation of Peptides.	29
VI. Determination of Peptide Structure	41
VII. Results of Investigations on Various Proteins.	44
VIII. General Conclusions.	59

The Structure of Collagen Fibrils

BY RICHARD S. BEAR, *Department of Biology, Massachusetts Institute of Technology,
Cambridge, Massachusetts*

I. Introduction	69
II. Identification and Distribution of Collagens.	76
III. Colloidal Structure of Collagen Fibrils	97
IV. The Collagen Protofibril	112
V. The Collagen Molecule.	135
VI. Conclusion	150

Muscle Contraction and Fibrous Muscle Proteins

BY HANS H. WEBER AND HILDEGARD PORTZEHL, *Physiological Institute, University of
Tübingen, Germany*

I. Introduction	162
II. The Contractile Models	163
III. The Proteins of the Myofibril and Their Reactions.	193
IV. The Proteins of the Myofibril and the Fine Structure of Skeletal Muscle. .	237
V. General Conclusion	246

The Proteins of the Mammalian Epidermis

BY K. M. RUDALL, *Department of Biomolecular Structure, The University,
Leeds, England*

I. Introduction	253
II. Properties of the Epidermis as a Whole	254
III. The Extraction of Epidermal Proteins.	264
IV. Some Physical Properties of Epidermal Proteins.	270
V. Infrared Absorption Studies	279
VI. Summary	286

Infrared Analysis of the Structure of Amino Acids, Polypeptides and Proteins

By G. B. B. M. SUTHERLAND, *Physics Department, University of Michigan,
Ann Arbor, Michigan*

I. Introduction	291
II. Amino Acids	297
III. Amides	299
IV. Polypeptides	304
V. Proteins	306
VI. Some General Observations	312

Ultraviolet Absorption Spectra of Proteins and Amino Acids

By G. H. BEAVEN AND E. R. HOLIDAY, *Medical Research Council Spectrographic
Research Unit, London Hospital, London, England*

I. Introduction	320
II. Methods and Experimental Aspects	321
III. Absorption Constants of the Aromatic and the Sulfur-Containing Amino Acids	323
IV. The Vibrational Fine Structure of the Absorption Spectra of the Aromatic Amino Acids and of Proteins	329
V. Low Temperature Spectra of Amino Acids and Proteins	331
VI. Fine-Structure Shifts in Protein Spectra-Structural Implications	336
VII. The Absorption Spectra of the Aromatic Amino Acids and Proteins in Strongly Alkaline Solution (pH 12-13)	343
VIII. The Ultraviolet Absorption Spectrum of the Peptide Bond and of the Poly- peptide Fabric	352
AUTHOR INDEX	387
SUBJECT INDEX	400
