

CONTENTS

CONTRIBUTORS TO VOLUME X.....	v
-------------------------------	---

The Nature of Phosphorus Linkages in Phosphoproteins

BY GERTRUDE E. PERLMANN, *The Rockefeller Institute for Medical Research,
New York, N. Y.*

I. Introduction.....	1
II. Phosphoamino Acids Derived from Phosphoproteins.....	2
III. Phosphoproteins and Phosphopeptides.....	4
IV. Enzymatic Dephosphorylation of Phosphoproteins.....	9
V. Possible Biological Function of Phosphoproteins.....	25
VI. Summary.....	26
References.....	27

Metabolism of the Aromatic Amino Acids

By C. E. DALGLIESH, *Postgraduate Medical School, Ducane Road, London, England*

I. Introduction.....	33
II. Biosynthesis of the Aromatic Amino Acids.....	36
III. Degradation of Phenylalanine and Tyrosine to Acetoacetate; the Principal Route Used by Mammals.....	46
IIIA. Evidence Derived from Inborn Errors of Metabolism.....	46
IIIB. Enzymic Experiments on the Normal Pathway in Mammals.....	55
IV. Tyrosine Degradation by the Catechol Pathway.....	65
V. Tyrosine Metabolism via Thyroid Hormones and Other Halogenated De- rivatives.....	71
VI. Pathways of Phenylalanine and Tyrosine Metabolism Utilized Principally by Microorganisms.....	76
VII. Tryptophan Degradation by the Kynurenine-Nicotinic Acid Pathway...	79
VIII. Tryptophan Degradation by the Enteramine-Serotonin Pathway.....	103
IX. Routes for Tryptophan Degradation Used Principally by Microorganisms.	108
X. Tryptophan Metabolism in Plants. Heteroauxin.....	113
XI. Natural Products Probably Related to the Aromatic Amino Acids.....	115
XII. Future Problems.....	121
XIII. Summary.....	122
References.....	124

Hydrogen Ion Equilibria in Native and Denatured Proteins

BY JACINTO STEINHARDT AND ETHEL M. ZAISER, *Department of Chemistry,
Massachusetts Institute of Technology, Cambridge, Massachusetts*

I. Introduction.....	152
II. Acid-Base Dissociations of Native Proteins.....	153
III. Unreactive Prototropic Groups in Native Proteins.....	180
References.....	221

Fish Proteins

BY G. HAMOIR, *Laboratory of General Biology, University of Liège, Belgium*

I. Introduction.....	227
II. Proteins from Skeletal Muscle.....	228
III. Fish Enzymes.....	269
IV. Fish Blood Proteins.....	273
V. Fish Protamines.....	274
VI. Connective Tissue Proteins.....	277
VII. Conclusion: The Comparative Biochemistry of Fish Proteins.....	279
References.....	282

The Sea as a Potential Source of Protein Food

BY LIONEL A. WALFORD AND CHARLES G. WILBER, *Fish and Wildlife Service, United States Department of the Interior, Washington, D. C. and Chemical Corps Medical Laboratories, Army Chemical Center, Md.*

I. World Protein Problem.....	289
II. Proteins in Marine Organisms.....	303
III. Variations in Protein Content.....	312
IV. The Biological Value of Marine Proteins.....	313
References.....	315

Zinc and Metalloenzymes

BY BERT L. VALLEE, *The Biophysics Research Laboratory of the Department of Medicine, Harvard Medical School, and Peter Bent Brigham Hospital, Boston, Massachusetts*

A. General.....	318
I. Introduction.....	318
II. Metalloproteins and Metal-Protein Complexes.....	320
III. Characteristics of Metalloenzymes.....	321
IV. Characteristics of Metal-Enzyme Complexes.....	325
V. Empirical Formulas for Metalloenzymes.....	327
VI. Instrumental Methods for the Detection of Metals.....	328
VII. References to Metalloenzymes Containing Copper, Iron, and Molybdenum.....	332
B. Zinc Metalloproteins.....	333
VIII. Introduction.....	333
IX. Carbonic Anhydrase.....	333
X. Experimental Approach for Studies on the Leukocyte Zinc Protein, Carboxypeptidase, and Yeast Alcohol Dehydrogenase.....	337
XI. The Zinc-Containing Protein from Human Leukocytes.....	339
XII. Pancreatic Carboxypeptidase.....	343
XIII. Yeast Alcohol Dehydrogenase.....	353
XIV. Coordination Chemistry of Zinc.....	370
References.....	378
AUTHOR INDEX.....	385
SUBJECT INDEX.....	409
