

## CONTENTS

CONTRIBUTORS TO VOLUME XII .....	v
PREFACE .....	vii

### The Fibrinogen-Fibrin Conversion

BY HAROLD A. SCHERAGA AND MICHAEL LASKOWSKI, JR.

*Department of Chemistry, Cornell University, Ithaca, New York*

I. Introduction.....	2
II. Thrombin.....	4
III. Fibrinogen.....	18
IV. General Observations on the Thrombin-Fibrinogen Reaction.....	38
V. Reaction Scheme.....	42
VI. Step 1.....	45
VII. Step 2.....	72
VIII. Step 3.....	104
IX. Concluding Remarks.....	119
References.....	123

### X-Ray Analysis and Protein Structure

BY F. H. C. CRICK AND J. C. KENDREW

*The Medical Research Council Unit for the Study of the Molecular Structure of Biological Systems, Cavendish Laboratory, Cambridge, England*

I. Introduction.....	134
II. The Nature of X-Ray Diffraction.....	135
III. Fibrous Proteins and Synthetic Polypeptides.....	154
IV. Crystalline Proteins.....	170
V. Viruses.....	199
References.....	210

### The Human Hemoglobins: Their Properties and Genetic Control

BY HARVEY A. ITANO

*The National Institute of Arthritis and Metabolic Diseases of the National Institutes of Health, Bethesda, Maryland*

I. Introduction.....	216
II. Bases for Differences among Hemoglobins.....	221
III. Methods.....	225
IV. The Human Hemoglobins.....	241
V. Individual Differences in Hemoglobin Metabolism.....	246
VI. Genetic Control of Hemoglobin Synthesis.....	249
VII. Summary.....	262
References.....	264

**Hormones of the Anterior Pituitary Gland. Part II.  
Melanocyte-Stimulating and Lactogenic Hormones**

BY CHO HAO LI

*Hormone Research Laboratory and the Department of Biochemistry, University of California, Berkeley, California*

I. Melanocyte-Stimulating Hormone (MSH, Melanotropin) . . . . .	270
II. Lactogenic Hormone (Prolactin, Luteotropin) . . . . .	295
References . . . . .	312

**The Activation of Zymogens**

BY HANS NEURATH

*Department of Biochemistry, University of Washington, Seattle, Washington*

I. Introduction . . . . .	320
II. Experimental Methods Involved in the Study of Activation Processes . . . . .	321
III. The Activation of Trypsinogen . . . . .	324
IV. The Activation of Chymotrypsinogen . . . . .	335
V. General Considerations of the Mechanism of Activation of Trypsinogen and Chymotrypsinogen . . . . .	362
VI. The Activation of Procarboxypeptidase . . . . .	372
VII. The Activation of Pepsinogen . . . . .	376
References . . . . .	382

**The Chemical Nature of Antibodies**

BY HENRY C. ISLIKER

*Institute of Medical Chemistry, Berne, Switzerland*

I. Introduction . . . . .	388
II. The Purification of Antibodies by Physicochemical Methods . . . . .	390
III. The Purification of Antibodies by Specific Immunochemical Methods . . . . .	401
IV. Physicochemical Properties of Antibodies . . . . .	413
V. Immunochemical Properties of Antibodies . . . . .	428
VI. Heterogeneity of Antibodies and Related Compounds . . . . .	436
VII. Conclusions . . . . .	449
References . . . . .	451

**The Synthesis of Peptides**

BY MURRAY GOODMAN AND G. W. KENNER

*Department of Chemistry, Polytechnic Institute of Brooklyn, Brooklyn, New York and University Chemical Laboratory, University of Cambridge, Cambridge, England*

I. Introduction . . . . .	466
II. General Aspects of Peptide Synthesis . . . . .	468
III. Special Aspects of Peptide Synthesis . . . . .	497
IV. Organization of the Tables . . . . .	509
References . . . . .	627
AUTHOR INDEX . . . . .	639
SUBJECT INDEX . . . . .	673
