Introduction What This Book is For, and How to Use It	xiii

PART I EXPERIMENTAL APPROACHES

Exemplar Chapters

Chapter 1 Experimental Methods and Simple Interventions: Bandages for Leg Ulcers	3
Introduction	3
Exemplar: Wilkinson, I., Buttfield, S., Cooper, S. and Young, E. (1997) 'Trial of two bandaging systems for chronic venous leg ulcers', <i>Journal of Wound Care</i> , 6 (7): 339-40	5
What you might do now	8
Chapter 2 Experimental Methods and Complex Interventions: Case Management in Mental Health Care	9
Introduction	10
Exemplar: Marshall, M., Lockwood, A. and Gath, D. (1995) 'Social Services case-management for long-term mental disorders: a randomised controlled trial', <i>The Lancet</i> , 345: 409-12	12
What you might do now	20
Chapter 3 From Effectiveness to Cost-effectiveness: a Trial of a Hospital at Home Scheme	21
Introduction	22
Exemplar: Shepperd, S., Harwood, D., Gray, A., Vessey, M. and Morgan, P. (1998) 'Randomised controlled trial comparing hospital at home care with inpatient hospital care. II: cost minimisation analysis', <i>British Medical Journal</i> , 316: 1791-6	24
What you might do now	35
Chapter 4 Comparing Like with Like: a Systematic Review and Meta-analysis of Home Visiting Schemes and Childhood Injury	36
Introduction	37
Exemplar: Roberts, I., Kramer, M.S. and Suissa, S. (1996)	

'Does home visiting prevent childhood injury? A systematic review of randomised controlled trials', <i>British Medical Journal</i> , 312: 29–33	38
What you might do now	46

Resource Chapters

Chapter 5 The Basics of Experimental Design	47
Introduction 47	
1 Experiments as systems of safeguards 48	
2 Double-blinded, randomised controlled experiments or trials and other experimental designs 48	
3 Forming comparison groups – creating controls 49	
4 Sampling units 53	
5 Subject reactions, researcher bias and blinding 55	
6 Regression to the mean 56	
7 Replicability 57	
8 Intention to treat 57	
9 Simple and complex interventions 58	
10 Reliable and sensitive measurements 59	
11 The internal validity of experiments 59	
12 The external validity of experiments 60	
13 Single subject experiments 62	
14 Questions to ask about controlled experiments 68	
15 Further reading on controlled experiments in health and social care and cost-effectiveness studies 69	
References and further reading 69	
Chapter 6 Research Instruments in Experimental Research	71
Introduction 71	
1 The use of standard instruments 73	
2 Cultural specificity and instruments 74	
3 Data levels and qualities 74	
4 Instruments and data distributions, data transformations, floor and ceiling effects 76	
5 Validating instruments for their reliability 78	
6 Reliability tests 79	
7 Validating the validity of instruments 80	
8 Questions to ask about research instruments 83	
9 Further reading on research instruments 83	
References and further reading 84	
Chapter 7 Reading the Results of Experimental Research	86
Introduction 86	
1 Statistical significance 86	
2 χ^2 as a example of a statistical significance test 87	
3 Tests, questions and hypotheses 89	
4 Confidence intervals 89	
5 Confidence intervals and meta-analyses 90	
6 Non-parametric and parametric statistics 92	
7 Sample size 93	
8 Statistical power 94	
9 Measures of central tendency, dispersion and diversity: modes, medians, means, variance and standard deviation 96	
10 Expressions of effect size 98	
11 Counting costs 102	
12 Sensitivity analysis 102	
13 Further reading on understanding the results of research 104	
References and further reading 104	

PART 2 SURVEY RESEARCH

Exemplar Chapters

Chapter 8 Surveys, Samples and Questions: Consumer Satisfaction with the NHS	109
Introduction	109
Exemplar: Cohen, G., Forbes, J. and Garraway, M. (1996) 'Can different patient satisfaction survey methods yield consistent results? Comparison of three surveys', <i>British Medical Journal</i> , 313: 841-4	110
What you might do now	117
Chapter 9 An Equity Audit in Coronary Care	118
Introduction	118
Exemplar: Payne, N. and Saul, C. (1997) 'Variations in use of cardiology services in a health authority: comparison of coronary artery revascularisation rates with prevalence of angina and coronary mortality', <i>British Medical Journal</i> , 314: 257-61	120
What you might do now	130

Resource Chapters

Chapter 10 Surveys and Case Control Studies	131
Introduction 131	
1 Sampling and representativeness 132	
2 Sampling frames 136	
3 Stratified (or non-proportional) samples 136	
4 Cluster sampling 138	
5 Staged sampling and phased sampling 140	
6 Confidence intervals and surveys 141	
7 Selecting a stratified sample of adequate size: an example 144	
8 Under- and over-representation and their management 148	
9 Case control (or case comparison) studies 151	
10 Correlation, co-efficients, regression and scatterplots 152	
11 Correlation, causes and statistical control 155	
12 Contemporaneous and longitudinal surveys 158	
13 The ecological fallacy in interpreting survey results 163	
14 Questionnaires, reliability and meaningfulness 164	
15 Questions to ask about surveys 167	
16 Further reading on surveys and case control studies 167	
References and further reading 168	
Chapter 11 Controlling for age and socio-economic circumstances	170
Introduction 170	
1 Age standardisation 172	
2 Denominator problems in standardisation 178	
3 Standardised mortality ratios 180	
4 Deprivation indices 183	
5 Further reading on age standardisation and deprivation indices 192	
References and further reading 193	

PART 3 QUALITATIVE RESEARCH

Exemplar Chapters

Chapter 12 Loosely Structured Interviews: the Stories Behind the Statistics	199
Introduction	199
Exemplar: Blaxter, M. 1993 'Why do the victims blame themselves?' from Radley, A. (ed.) <i>Worlds of Illness: Biographical and Cultural Perspectives on Health and Disease</i> . London: Routledge. pp. 124–42	200
What you might do now	209
Chapter 13 Naturalistic Observation: Midwives' Ethnic Stereotyping of their Patients	210
Introduction	210
Exemplar: Bowler, I. (1993) '“They're not the same as us”: midwives' stereotypes of South Asian descent maternity patients', <i>Sociology of Health and Illness</i> , 15 (2): 157–78	211
What you might do now	227
Chapter 14 Understanding Language in Context: Professional Uncertainty	228
Introduction	228
Exemplar: Gomm, R. 'Uncertain minds or uncertain times? Expressions of uncertainty in professional discourse' (written for this volume)	230
What you might do now	238
Chapter 15 Action Research: Applied Qualitative Methods in the Family Centre	239
Introduction	239
Exemplar: Winter, Celia (1996) 'Creating quality care for children in the family centre', <i>Educational Action Research</i> 4 (1): 49–57	240
What you might do now	247

Resource Chapter

Chapter 16 Collecting and Analysing Qualitative Data	249
Introduction 249	
1 Forcing the answers in the Health and Lifestyle Survey 250	
2 Thematic analysis: structuring data after collecting them 252	
3 Loosely structured interviews contrasted with naturalistic observation 256	
4 Grounded theory research: structuring theory and data together 260	
5 The linguistic turn in qualitative research 262	
6 Thematic analysis and linguistic analysis compared 264	
7 The objectivity of qualitative research 268	
8 Generalisability and qualitative research 270	
9 Action research 272	
10 Further reading on qualitative research and action research 274	
References and further reading 274	

PART 4 RESEARCH APPRAISAL QUESTIONS

Questions to Ask about Data Collection Instruments	281
Questions to Ask about Experiments	284
Questions to Ask about Systematic Reviews and Meta-analyses	294
Questions to Ask about Cost-effectiveness Studies	297
Questions to Ask about Surveys, Case finding (or 'Clinical Epidemiological') Studies and Case Control Studies	299
Questions to Ask about Qualitative Research	306
Questions to Ask about Action Research	311
APPENDIX FINDING PUBLISHED RESEARCH IN HEALTH AND SOCIAL CARE	315
Index	327
