

CONTENTS

INTRODUCTION	7
1. IMPORTANCE OF FISH IN HUMAN NUTRITION	8
2. CHEMICAL COMPOSITION OF FISH	10
2.1 MAJOR COMPONENTS OF FISH MUSCLE	11
2.1.1 Water	12
2.1.2 Proteins	13
2.1.3 Nitrogenous compounds	14
2.1.4 Lipids	15
2.1.5 Carbohydrates	17
2.1.6 Vitamins	17
2.1.7 Minerals	19
3. FISH MEAT QUALITY	21
3.1 FISH MEAT QUALITY PARAMETERS	22
3.1.1 Sensory properties	22
3.1.2 Freshness	23
3.1.3 Nutritional parameters	23
3.1.4 Hygienic safety	23
4. SELECTED FACTORS AFFECTING THE QUALITY OF FISH MEAT	25
4.1 FACTORS AFFECTING THE QUALITY OF FISH MEAT	25
4.2 FISH NUTRITION FACTORS	28
4.3 THE EFFECT OF PROCESSING ON THE FISH MEAT TEXTURE	29
4.4 PHYSICAL, CHEMICAL AND MICROBIOLOGICAL CHANGES IN FISH MEAT	31
4.4.1 Post-mortem changes in fish meat	32
4.4.2 Oxidation process	35
4.4.3 Formation of biogenic amines	37
4.4.4 Microbial activity in fish meat	37
5. PRESERVATION TECHNIQUES OF EXTENDING THE SHELF LIFE OF FISH PRODUCTS	40
5.1 TEMPERATURE CONDITIONS	40
5.1.1 Cooling.....	40
5.1.2 Supercooling	41
5.1.3 Freezing	41
5.2 DRYING	43
5.3 SMOKING.....	43
5.4 CANNING	44
5.5 SALTING	44
5.6 MARINATING	45
5.7 PRESERVATION TECHNIQUES	45
5.7.1 High pressure protection	45
5.7.2 Modified atmosphere	46
5.7.3 Antioxidants	46
6. MATERIAL AND METHODS	48
6.1 DETERMINATION OF SELECTED CHEMICAL PARAMETERS.....	48
6.1.1 Fourier transform near-infrared spectroscopy	48
6.1.2 Gas chromatography with flame-ionization detection	50
6.1.3 Kjeldahl technique	51
6.1.4 Gravimetric method	52

6.2 DETERMINATION OF SELECTED PHYSICAL PARAMETERS.....	53
6.2.1 Texture measurement	53
6.3 EXPERIMENT 1: DETERMINATION OF TEXTURAL PROPERTIES OF COD FISH (<i>GADIFORMES</i> SP).....	55
6.3.1 Biological material	55
6.3.2 Determination of textural properties	56
6.3.3 Statistic evaluation	57
6.4 EXPERIMENT 2: ANALYSIS OF THE FISH FILLET CHEMICAL COMPOSITION BY FT-NIR	58
6.4.1 Biological material	58
6.4.2 Determination of the chemical composition of fish samples	59
6.4.3 Statistic evaluation	59
6.5 EXPERIMENT 3: FATTY ACID PROFILE IN RAINBOW TROUT SAMPLES FROM INTENSIVE AQUACULTURES IN SLOVAKIA.....	60
6.5.1 Biological material	60
6.5.2 Determination of fatty acid composition.....	60
6.5.3 Statistic evaluation	61
6.6 EXPERIMENT 4: DETERMINATION OF FATTY ACID PROFILE IN THAWED AND HEAT-TREATED SAMPLES OF SELECTED FISH SPECIES	61
6.6.1 Biological material	61
6.6.2 Determination of fatty acid composition.....	62
6.6.3 Statistic evaluation	63
6.7 EXPERIMENT 5: DETERMINATION OF BASIC CHEMICAL COMPOSITION IN VARIOUS SPECIES OF FISH CONSUMED IN SLOVAKIA	63
6.7.1 Biological material	63
6.7.2 Determination of protein, fat after hydrolysis and fatty acid composition	63
6.7.3 Statistic evaluation	64
7. RESULTS AND DISCUSSION.....	65
7.1 EXPERIMENT 1: DETERMINATION OF TEXTURAL PROPERTIES OF COD FISH (<i>GADIFORMES</i> SP)	65
7.2 EXPERIMENT 2: ANALYSIS OF THE FISH FILLET CHEMICAL COMPOSITION BY FT-NIR	70
7.3 EXPERIMENT 3: FATTY ACID PROFILE IN RAINBOW TROUT SAMPLES FROM INTENSIVE AQUACULTURES IN SLOVAKIA.....	75
7.4 EXPERIMENT 4: DETERMINATION OF FATTY ACID PROFILE IN THAWED AND HEAT-TREATED SAMPLES	78
7.5 EXPERIMENT 5: DETERMINATION OF BASIC CHEMICAL COMPOSITION IN VARIOUS SPECIES OF FISH CONSUMED IN SLOVAKIA	82
8. CONCLUSIONS	91
9. REFERENCIES	93
