

CONTENTS

I. INTRODUCTION	1
1. Prerequisites	
2. Positive and Negative Quantities	
8. Points at Infinity	
13. Notation	
16. Directed Angles	
II. SIMILAR FIGURES	16
21. Homothetic Figures	
25. Centers of Similitude of Two Circles	
31. Similar Figures in General	
III. COAXAL CIRCLES AND INVERSION	28
40. The Radical Axis	
50. Coaxal Circles	
63. Inversion	
IV. TRIANGLES AND POLYGONS	58
84. Ratios in the Triangle	
89. Quadrangles and Quadrilaterals	
92. The Theorem of Ptolemy	
96. Triangle and Quadrangle Theorems	
101. Polygon Theorems and Exercises	
107. Theorems concerning Areas	
V. GEOMETRY OF CIRCLES	86
113. The Power Theorem of Casey	
126. Circles of Antisimilitude	
134. Poles and Polars	
144. Stereographic Projection	

VI. TANGENT CIRCLES	110
150. Circles Tangent to Two Circles	
158. Steiner Chains; the Arbelos	
166. The Problem of Apollonius	
172. Four Circles Touching a Circle	
VII. THE THEOREM OF MIQUEL	131
184. The Miquel Theorem	
189. Pedal Triangles and Circles; Simson Lines	
VIII. THEOREMS OF CEVA AND MENELAUS	145
213. The Theorems of Ceva and Menelaus; Applications	
231. Isogonal Conjugates	
IX. THREE NOTABLE POINTS	161
249. Fundamental Properties of Orthocenter and Circumcenter	
259. The Orthocentric System	
271. Properties of the Median Point	
278. The Polar Circle	
X. INSCRIBED AND ESCRIBED CIRCLES	182
287. Fundamental Properties	
298. Algebraic Formulas; Principle of Transformation	
XI. THE NINE POINT CIRCLE	195
308. Properties of the Nine Point Circle	
320. The Theorem of Feuerbach	
326. Further Properties of Simson Lines	
XII. SYMMEDIAN POINT AND OTHER NOTABLE POINTS	213
341. Symmedians and the Symmedian Point	
352. The Isogonic Centers	
361. Nagel Point, Spieker Circle, Fuhrmann Circle	

CONTENTS

xiii

XIII. TRIANGLES IN PERSPECTIVE 230

373. The Theorem of Desargues

385. The Theorems of Pascal and Brianchon

XIV. PEDAL TRIANGLES AND CIRCLES 240

394. Pedal Triangles and Circles of a Quadrangle

401. Fontené's Theorems; the Theorem of Feuerbach

406. The Orthopole

XV. SHORTER TOPICS 248

408. Statical Theorems: Center of Gravity, Resultant of Vectors

417. The Cyclic Quadrangle and its Orthocenters

420. The Theorem of Morley

424. Circles of Droz-Farny

428. Miscellaneous Exercises

XVI. THE BROCARD CONFIGURATION 263

433. The Brocard Points and their Properties

448. The Tucker Circles

461. The Brocard Triangles and the Brocard Circle

469. Steiner Point and Tarry Point

473. Related Triangles

XVII. EQUIBROCARDAL TRIANGLES 287

480. The Neuberg Circles

486. Vertical Projection of Triangles

490. Circles of Apollonius and Isodynamic Points

497. The Circles of Schoute

499. Generalizations of Brocard Geometry

XVIII. THREE SIMILAR FIGURES 302

508. Similar Figures on the Sides of a Triangle

516. Three Similar Figures in General

INDEX 313
