<b>Preface</b> .....	<b>9</b>
<b>1 Energy Autarky for Austria in 2050</b> .....	<b>13</b>
1.1 Introduction .....	13
1.2 Boundary conditions for the study .....	13
1.2.1 General assumptions for the study .....	13
1.2.2 Potentials of renewable energy sources .....	14
1.2.3 Technologies to convert primary into secondary energy sources considered in the study .....	15
1.2.4 Structures of energy demand and efficiency .....	15
1.2.5 Scenarios of the energy demand and their basic assumptions .....	16
1.3 Results .....	16
1.3.1 Results per Sector .....	16
1.3.2 Energy system 2050 for the constant scenario and the growth scenario ..	18
1.4 Measures .....	21
References .....	26
<b>2 Interlinkages and effective coordination of clean air, climate protection and energy efficiency policies using the abatement cost concept</b> .....	<b>27</b>
2.1 Households: existing climate protection instruments .....	28
2.2 Households: existing air protection instruments .....	30
2.3 Transport: climate protection policy .....	43
2.4 Transport: air protection policy .....	44
Conclusion .....	49
References .....	50
<b>3 Increasing the energy efficiency in the Czech Republic: subsidy schemes and their evaluation</b> .....	<b>53</b>
3.1 The importance of increasing energy efficiency .....	53
3.2 The importance of increasing energy efficiency .....	54
3.2.1 OPE, Priority axis 3: Sustainable energy uses .....	54
3.2.2 OPEI–ECO ENERGY Programme .....	56
3.3 The importance of increasing energy efficiency .....	58
3.3.1 Ex-ante evaluation of OPE, Priority axis 3 .....	59
3.3.2 Ex-ante evaluation of the ECO ENERGY programme .....	59
3.3.3 Ex-ante evaluation of OPE, Priority axis 3 .....	61
3.4 Other energy saving options .....	63
Conclusion .....	64
References .....	65

<b>4 Comprehensive economic evaluation of support to energy savings projects</b> .....	<b>67</b>
4.1 Energy savings and energy policy .....	67
4.2 Ex-ante evaluation of investments into energy savings projects .....	68
4.3 Transaction costs of energy savings projects .....	70
4.4 Support to savings in the form of subsidies .....	72
Conclusion .....	73
References .....	74
<b>5 Effective policies to reach the 20-20-20 target: biomass use for energy purposes in the Czech Republic</b> .....	<b>75</b>
5.1 Introduction .....	75
5.2 Current status of biomass use for energy purposes in the Czech Republic ...	76
5.3 Strategic goals for renewable energy sources in the Czech Republic, focusing on biomass .....	79
5.4 Use of agricultural land for energy purposes .....	86
5.5 Support scheme for development of energy biomass use .....	87
5.6 Use of agricultural land for energy purposes .....	88
5.6.1 Specific effect method .....	89
5.7 Conclusions and further research .....	93
References .....	93

**List of authors:**

Erik Geuss – chapter 4  
Miroslav Honzík – chapter 3  
Jiřina Jílková – chapter 2  
Jaroslav Knápek – preface and chapter 5  
Tomáš Králík – chapter 5  
Ladislav Sobotka – chapter 2  
Wolfgang Streicher – chapter 1  
Michaela Valentová – chapters 3 and 5  
Ondřej Vojáček – chapter 2
