

Content

Nanomaterials and Biological Systems	4
Nanomaterial Toxicity and Qualitative Risk Assessment of Nanomaterials	12
Application of Toxicology for Investigation of Biological Effects of Exposure to Nanomaterials	23
Traffic Related Nanoparticles and Their Toxicity	33
Particle Emissions from Gasoline Engines – a Preliminary Comparison Between Direct and Port Fuel Injection and Across Driving Cycles	41
Miniature Full-flow Dilution Tunnel for Small Engine Emissions Tests	49
The Impact of Air Pollution to Central Nervous System in Children	59
The Impact of a Long-term Continuous Inhalation of Nanoparticles on Cells and Functions of the Immune System	72
The Use of Nanofiber Scaffolds for the Transfer of Stem Cells for the Treatment of Damaged Ocular Surface	79
Blood Derivatives in Regenerative Medicine	87
A Comparison of Platelet Lysate and Lyophilisate in Cell Culture	99
Biomolecules for Osteogenesis Induction	115
