## ACKNOWLEDGEMENTS

ix

## 1 Introduction

1

## THE VIRUS

2 How did the pandemic develop?

15

3 How infectious is SARS-CoV-2?

25

4 What is the risk from new variants?

35

## DIAGNOSIS AND CASES

5 How good are diagnostic tests?

41

6 How many cases have been found?

49

7 How many people have been infected with SARS-CoV-2?

59

## DISEASE AND ILLNESS

8 How ill do people get with Covid-19?

69

9 What happened in hospitals?

77

10 How good are the treatments for Covid-19?

87

## DEATH

---

- |    |  |     |
|----|--|-----|
| 11 | How many people have died from Covid-19?                             | 95  |
| 12 | How lethal is SARS-CoV-2?  | 109 |
| 13 | Who has been most at risk from Covid-19?                             | 121 |
| 14 | How do we compare countries?   | 133 |
| 15 | How does the impact of Covid-19 compare with other historical harms? | 147 |

## INTERVENTIONS AND REACTIONS

---

- |    |   |     |
|----|---|-----|
| 16 | What is the effect of measures against the spread of SARS-CoV-2?        | 155 |
| 17 | What have been the collateral effects of the measures against Covid-19? | 169 |
| 18 | How has behaviour changed during the pandemic?                          | 177 |
| 19 | What has happened to mental health and well-being?                      | 187 |
| 20 | What have been people's attitudes and beliefs about the pandemic?       | 193 |
| 21 | What has been the effect on the economy?                                | 199 |

## VACCINES

---

- |    |   |     |
|----|---|-----|
| 22 | How effective are the vaccines?             | 209 |
| 23 | How safe are the vaccines?                  | 221 |
| 24 | Who has been getting the vaccines?          | 231 |
| 25 | How far apart should the vaccines be given? | 239 |

## LOOKING FORWARD AND BACK

---

- |    |  |     |
|----|--|-----|
| 26 | How good are the projections from epidemic models? | 245 |
| 27 | What is going to happen in the future?             | 253 |
| 28 | Postscript   | 255 |
