

Contents

Preface ix

Chapter 1 Introduction 2

- | | | | |
|------------|--------------------|------------|----------------------------|
| 1-1 | Approximations | 1-5 | Norton's Theorem |
| 1-2 | Voltage Sources | 1-6 | DC Circuit Troubleshooting |
| 1-3 | Current Sources | 1-7 | AC Circuit Troubleshooting |
| 1-4 | Thevenin's Theorem | | |

Chapter 2 Semiconductors 30

- | | | | |
|------------|---------------------------------------|-------------|-----------------------------------|
| 2-1 | Conductors | 2-8 | The Unbiased Diode |
| 2-2 | Semiconductors | 2-9 | Forward Bias |
| 2-3 | Silicon Crystals | 2-10 | Reverse Bias |
| 2-4 | Intrinsic Semiconductors | 2-11 | Breakdown |
| 2-5 | Two Types of Flow | 2-12 | Energy Levels |
| 2-6 | Doping a Semiconductor | 2-13 | Barrier Potential and Temperature |
| 2-7 | Two Types of Extrinsic Semiconductors | 2-14 | Reverse-Biased Diode |

Chapter 3 Diode Theory 58

- | | | | |
|------------|--------------------------|-------------|------------------------------------|
| 3-1 | Basic Ideas | 3-7 | How to Calculate Bulk Resistance |
| 3-2 | The Ideal Diode | 3-8 | DC Resistance of a Diode |
| 3-3 | The Second Approximation | 3-9 | Load Lines |
| 3-4 | The Third Approximation | 3-10 | Surface-Mount Diodes |
| 3-5 | Troubleshooting | 3-11 | Introduction to Electronic Systems |
| 3-6 | Reading a Data Sheet | | |

Chapter 4 Diode Circuits 88

- | | | | |
|------------|----------------------------|-------------|--|
| 4-1 | The Half-Wave Rectifier | 4-7 | Peak Inverse Voltage and Surge Current |
| 4-2 | The Transformer | 4-8 | Other Power-Supply Topics |
| 4-3 | The Full-Wave Rectifier | 4-9 | Troubleshooting |
| 4-4 | The Bridge Rectifier | 4-10 | Clippers and Limiters |
| 4-5 | The Choke-Input Filter | 4-11 | Clampers |
| 4-6 | The Capacitor-Input Filter | 4-12 | Voltage Multipliers |

Chapter 5

Special-Purpose Diodes 142

- | | | | |
|------------|---------------------------------------|-------------|------------------------------|
| 5-1 | The Zener Diode | 5-7 | Load Lines |
| 5-2 | The Loaded Zener Regulator | 5-8 | Light-Emitting Diodes (LEDs) |
| 5-3 | Second Approximation of a Zener Diode | 5-9 | Other Optoelectronic Devices |
| 5-4 | Zener Drop-Out Point | 5-10 | The Schottky Diode |
| 5-5 | Reading a Data Sheet | 5-11 | The Varactor |
| 5-6 | Troubleshooting | 5-12 | Other Diodes |

Chapter 6

BJT Fundamentals 190

- | | | | |
|------------|---------------------------|-------------|----------------------------|
| 6-1 | The Unbiased Transistor | 6-9 | Surface-Mount Transistors |
| 6-2 | The Biased Transistor | 6-10 | Variations in Current Gain |
| 6-3 | Transistor Currents | 6-11 | The Load Line |
| 6-4 | The CE Connection | 6-12 | The Operating Point |
| 6-5 | The Base Curve | 6-13 | Recognizing Saturation |
| 6-6 | Collector Curves | 6-14 | The Transistor Switch |
| 6-7 | Transistor Approximations | 6-15 | Troubleshooting |
| 6-8 | Reading Data Sheets | | |

Chapter 7

BJT Biasing 242

- | | | | |
|------------|---------------------------------------|-------------|------------------------------|
| 7-1 | Emitter Bias | 7-6 | Accurate VDB Analysis |
| 7-2 | LED Drivers | 7-7 | VDB Load Line and Q Point |
| 7-3 | Troubleshooting Emitter Bias Circuits | 7-8 | Two-Supply Emitter Bias |
| 7-4 | More Optoelectronic Devices | 7-9 | Other Types of Bias |
| 7-5 | Voltage-Divider Bias | 7-10 | Troubleshooting VDB Circuits |
| | | 7-11 | PNP Transistors |

Chapter 8

Basic BJT Amplifiers 282

- | | | | |
|------------|------------------------------------|-------------|---------------------------------------|
| 8-1 | Base-Biased Amplifier | 8-7 | Analyzing an Amplifier |
| 8-2 | Emitter-Biased Amplifier | 8-8 | AC Quantities on the Data Sheet |
| 8-3 | Small-Signal Operation | 8-9 | Voltage Gain |
| 8-4 | AC Beta | 8-10 | The Loading Effect of Input Impedance |
| 8-5 | AC Resistance of the Emitter Diode | 8-11 | Swamped Amplifier |
| 8-6 | Two Transistor Models | 8-12 | Troubleshooting |

Chapter 9

Multistage, CC, and CB Amplifiers 328

- | | | | |
|------------|-----------------------|------------|---------------------------------------|
| 9-1 | Multistage Amplifiers | 9-6 | Darlington Connections |
| 9-2 | Two-Stage Feedback | 9-7 | Voltage Regulation |
| 9-3 | CC Amplifier | 9-8 | The Common-Base Amplifier |
| 9-4 | Output Impedance | 9-9 | Troubleshooting Multistage Amplifiers |
| 9-5 | Cascading CE and CC | | |

Chapter 10

Power Amplifiers 368

- | | | | |
|-------------|------------------------------------|--------------|------------------------------|
| 10-1 | Amplifier Terms | 10-6 | Biassing Class-AB Amplifiers |
| 10-2 | Two Load Lines | 10-7 | Class-AB Driver |
| 10-3 | Class-A Operation | 10-8 | Class-C Operation |
| 10-4 | Class-B Operation | 10-9 | Class-C Formulas |
| 10-5 | Class-B Push-Pull Emitter Follower | 10-10 | Transistor Power Rating |

Chapter 11

JFETs 416

- | | | | |
|-------------|-------------------------------|--------------|-------------------------|
| 11-1 | Basic Ideas | 11-6 | Transconductance |
| 11-2 | Drain Curves | 11-7 | JFET Amplifiers |
| 11-3 | The Transconductance Curve | 11-8 | The JFET Analog Switch |
| 11-4 | Biassing in the Ohmic Region | 11-9 | Other JFET Applications |
| 11-5 | Biassing in the Active Region | 11-10 | Reading Data Sheets |
| | | 11-11 | JFET Testing |

Chapter 12

MOSFETs 472

- | | | | |
|-------------|----------------------------------|--------------|--------------------------------|
| 12-1 | The Depletion-Mode MOSFET | 12-7 | CMOS |
| 12-2 | D-MOSFET Curves | 12-8 | Power FETs |
| 12-3 | Depletion-Mode MOSFET Amplifiers | 12-9 | High-Side MOSFET Load Switches |
| 12-4 | The Enhancement-Mode MOSFET | 12-10 | MOSFET H-Bridge |
| 12-5 | The Ohmic Region | 12-11 | E-MOSFET Amplifiers |
| 12-6 | Digital Switching | 12-12 | Wide Bandgap (WBG) MOSFETs |
| | | 12-13 | MOSFET Testing |

Chapter 13

Thyristors 530

- | | | | |
|-------------|----------------------------------|-------------|--------------------------|
| 13-1 | The Four-Layer Diode | 13-5 | Bidirectional Thyristors |
| 13-2 | The Silicon Controlled Rectifier | 13-6 | IGBTs |
| 13-3 | The SCR Crowbar | 13-7 | Other Thyristors |
| 13-4 | SCR Phase Control | 13-8 | Troubleshooting |

Chapter 14

Frequency Effects 574

- | | | | |
|-------------|------------------------------------|--------------|----------------------------------|
| 14-1 | Frequency Response of an Amplifier | 14-7 | More Bode Plots |
| 14-2 | Decibel Power Gain | 14-8 | The Miller Effect |
| 14-3 | Decibel Voltage Gain | 14-9 | Risetime-Bandwidth Relationship |
| 14-4 | Impedance Matching | 14-10 | Frequency Analysis of BJT Stages |
| 14-5 | Decibels above a Reference | 14-11 | Frequency Analysis of FET Stages |
| 14-6 | Bode Plots | | |

Chapter 15

Differential Amplifiers 630

- | | | | |
|-------------|------------------------------------|-------------|---------------------|
| 15-1 | The Differential Amplifier | 15-5 | Common-Mode Gain |
| 15-2 | DC Analysis of a Diff Amp | 15-6 | Integrated Circuits |
| 15-3 | AC Analysis of a Diff Amp | 15-7 | The Current Mirror |
| 15-4 | Input Characteristics of an Op Amp | 15-8 | The Loaded Diff Amp |

The ninth edition of *Electronic Principles* continues its tradition as a clearly explained, nontechnical introduction to electronic semiconductor devices, circuits, and their applications. This textbook is intended for students who are new to electronics but have some basic knowledge of state electronics

Chapter 16

Operational Amplifiers 672

- | | | | |
|-------------|----------------------------|-------------|----------------------------------|
| 16-1 | Introduction to Op Amps | 16-5 | Two Op-Amp Applications |
| 16-2 | The 741 Op Amp | 16-6 | Linear ICs |
| 16-3 | The Inverting Amplifier | 16-7 | Op Amps as Surface-Mount Devices |
| 16-4 | The Noninverting Amplifier | | |

provides clearly explained concepts—written in an easy-to-read conversational style—that are essential to understanding the operation and troubleshooting of operational amplifiers. Practical circuit examples, applications, and troubleshooting techniques are included in each chapter. Multisim circuit simulation files can be found and downloaded at www.EngineeringBooksPdf.com.

Chapter 17

Negative Feedback 716

- | | | | |
|-------------|---------------------------------|-------------|--------------------|
| 17-1 | Four Types of Negative Feedback | 17-4 | The ICVS Amplifier |
| 17-2 | VCVS Voltage Gain | 17-5 | The VCIS Amplifier |
| 17-3 | Other VCVS Equations | 17-6 | The ICIS Amplifier |
| | | 17-7 | Bandwidth |

This chapter provides the framework for the rest of the textbook. While some topics are introduced here, such as dependent sources, current sources, Thevenin's theorem, and Norton's theorem, the use of approximations as applied to negative feedback is examined.

Chapter 18

Linear Op-Amp Circuit Applications 746

- | | | | |
|-------------|---------------------------------|--------------|------------------------------------|
| 18-1 | Inverting-Amplifier Circuits | 18-6 | Summing Amplifier Circuits |
| 18-2 | Noninverting-Amplifier Circuits | 18-7 | Current Boosters |
| 18-3 | Inverter/Noninverter Circuits | 18-8 | Voltage-Controlled Current Sources |
| 18-4 | Differential Amplifiers | 18-9 | Automatic Gain Control |
| 18-5 | Instrumentation Amplifiers | 18-10 | Single-Supply Operation |

wide bandgap (WBG) power transistors using gallium nitride (GaN) and silicon carbide (SiC). Half-bridge and full-bridge circuits are also covered. Other topics are SCRs, diacs, triacs, UJT, and

Chapter 19

Active Filters 794

- | | | | |
|-------------|---|--------------|--|
| 19-1 | Ideal Responses | 19-7 | VCVS Equal-Component Low-Pass Filters |
| 19-2 | Approximate Responses | 19-8 | VCVS High-Pass Filters |
| 19-3 | Passive Filters | 19-9 | MFB Bandpass Filters |
| 19-4 | First-Order Stages | 19-10 | Bandstop Filters |
| 19-5 | VCVS Unity-Gain Second-Order Low-Pass Filters | 19-11 | The All-Pass Filter |
| 19-6 | Higher-Order Filters | 19-12 | Biquadratic and State-Variable Filters |

Chapter 20

Nonlinear Op-Amp Circuit Applications 856

- | | | | |
|-------------|-------------------------------------|--------------|------------------------------|
| 20-1 | Comparators with Zero Reference | 20-6 | Waveform Conversion |
| 20-2 | Comparators with Nonzero References | 20-7 | Waveform Generation |
| 20-3 | Comparators with Hysteresis | 20-8 | Another Triangular Generator |
| 20-4 | Window Comparator | 20-9 | Active-Diode Circuits |
| 20-5 | The Integrator | 20-10 | The Differentiator |
| | | 20-11 | Class-D Amplifier |

Chapter 21

Oscillators 908

- | | | | |
|-------------|----------------------------------|--------------|------------------------------------|
| 21-1 | Theory of Sinusoidal Oscillation | 21-7 | The 555 Timer |
| 21-2 | The Wien-Bridge Oscillator | 21-8 | Astable Operation of the 555 Timer |
| 21-3 | Other RC Oscillators | 21-9 | 555 Circuit Applications |
| 21-4 | The Colpitts Oscillator | 21-10 | The Phase-Locked Loop |
| 21-5 | Other LC Oscillators | 21-11 | Function Generator ICs |
| 21-6 | Quartz Crystals | | |

Chapter 22

Regulated Power Supplies 964

- | | | | |
|-------------|------------------------------|-------------|----------------------|
| 22-1 | Supply Characteristics | 22-5 | Current Boosters |
| 22-2 | Shunt Regulators | 22-6 | DC-to-DC Converters |
| 22-3 | Series Regulators | 22-7 | Switching Regulators |
| 22-4 | Monolithic Linear Regulators | | |

Chapter 23

Industry 4.0 1016

- | | | | |
|-------------|----------------------------|-------------|-----------------|
| 23-1 | Industry 4.0: An Overview | 23-5 | Active Sensors |
| 23-2 | Smart Sensors | 23-6 | Data Conversion |
| 23-3 | Different Types of Sensors | 23-7 | Data Exchange |
| 23-4 | Passive Sensors | | |
