	<i>Contributor contact details</i>	<i>xiii</i>
	<i>Woodhead Publishing Series in Textiles</i>	<i>xvii</i>
	<i>Introduction</i>	<i>xxvii</i>
1	Types of fabric and their joining requirements J. McLOUGHLIN and S. HAYES, Manchester Metropolitan University, UK	1
1.1	Introduction	1
1.2	The main types of natural fibre	2
1.3	Synthetic fibres	8
1.4	High performance fibres	12
1.5	The process of creating fabrics from fibres	14
1.6	Woven fabric structures	16
1.7	Knitted fabric structures	21
1.8	Non-woven fabrics	27
1.9	Joining fabrics: seams and stitches	28
1.10	Stitching in practice: the case of high performance fabrics	33
1.11	Alternative methods of joining fabrics: welded seams	39
1.12	Ultrasonic welding	41
1.13	Conclusions	43
1.14	Acknowledgements	43
1.15	References and further reading	44
Part I	Sewing technology	45
2	The mechanics of stitching G. K. STYLIOU, Heriot-Watt University, UK	47
2.1	Introduction	47
2.2	The principles of stitching	48
2.3	Conclusion	59
2.4	References	59
2.5	Appendix: nomenclature and notation	60

vi	Contents	
3	The sewing of textiles S. HAYES and J. McLOUGHLIN, Manchester Metropolitan University, UK	62
3.1	Introduction	62
3.2	Types of sewing machine	63
3.3	Machine feeding systems	68
3.4	Machine settings and sewing quality	73
3.5	Needle size and point type	83
3.6	Stitch classification and applications	86
3.7	Seam classification and applications	89
3.8	Sewing threads	93
3.9	Seaming quality problems	101
3.10	Seam pucker: causes and prevention	104
3.11	Thread breakage: causes and prevention	106
3.12	Needle breakage	108
3.13	Slipped/missed stitching: causes and prevention	108
3.14	Uneven seams: causes and prevention	110
3.15	Comparing welded and sewn seams	111
3.16	Future trends	120
3.17	References and further reading	120
4	Mechanisms of sewing machines J. McLOUGHLIN and A. MITCHELL, Manchester Metropolitan University, UK	123
4.1	Introduction	123
4.2	The evolution of the sewing machine	124
4.3	Machine categorisation	126
4.4	Integrated stitching unit (ISU)	127
4.5	Types of motors used in sewing machines	132
4.6	Three-thread overlock with a microprocessor	134
4.7	Mechanised sewing machines	135
4.8	Semi-automatic machines, automated workstations and transfer lines	138
4.9	Advantages and limitations of machine automation	144
4.10	Computer numerical control (CNC)	145
4.11	Achieving fully automated apparel manufacture through the application of robotics	145
4.12	Conclusion	146
4.13	Sources of further information and advice	148
4.14	References and further reading	148

5	Problems relating to sewing M. CARVALHO, H. CARVALHO and L. F. SILVA, University of Minho, Portugal	149
5.1	Introduction	149
5.2	Seam elasticity	150
5.3	Seam failure	150
5.4	Seam problems related to material feeding	160
5.5	Problems in stitch formation	162
5.6	Seam pucker and other surface distortions	167
5.7	Future trends	169
5.8	Sources of further information and advice	171
5.9	References	171
6	The quality and performance of sewn seams A. MUKHOPADHYAY and V. K. MIDHA, National Institute of Technology Jalandhar, India	175
6.1	Introduction	175
6.2	Seam strength	176
6.3	Seam extensibility and recovery	187
6.4	Seam puckering	189
6.5	Seam slippage	194
6.6	Drape and bending	195
6.7	Seam grinning/gaping	197
6.8	Barrier properties of seams	198
6.9	Flame retardancy of seams	199
6.10	Degradation/damage of seams	200
6.11	Sources of further information and advice	203
6.12	References	203
7	Intelligent sewing systems for garment automation and robotics G. K. STYLIOU, Heriot-Watt University, UK	208
7.1	Introduction	208
7.2	Developments in the automation of sewing	208
7.3	Operational principles of the intelligent sewability environment (ISE)	218
7.4	Conclusions	220
7.5	References	221

Part II	Adhesive bonding of textiles	223
8	Adhesive bonding of textiles: principles, types of adhesive and methods of use E. M. PETRIE, Independent Consultant, USA	225
8.1	Introduction to adhesives in the textile industry	225
8.2	Reasons for the success and failure of adhesives	235
8.3	Classification of adhesives used in textile applications	243
8.4	Bonding processes	252
8.5	Trends in adhesive types	264
8.6	References	274
9	Adhesives bonding of textiles: applications E. STAMMEN and K. DILGER, Technical University Braunschweig, Germany	275
9.1	Introduction: textiles and adhesive joining	275
9.2	Adhesives and adhesive applications	282
9.3	Properties achieved by adhesive joining	293
9.4	Examples of adhesive use	297
9.5	Future trends	306
9.6	Acknowledgements	307
9.7	References	307
10	Bonding requirements in coating and laminating of textiles E. SHIM, North Carolina State University, USA	309
10.1	Introduction	309
10.2	Materials and adhesives in coating and laminating	313
10.3	Coating process	321
10.4	Laminating process	332
10.5	Properties and applications of coated and laminated fabrics	336
10.6	Conclusion	345
10.7	Further reading	346
10.8	References	347
Part III	Welding technologies	353
11	The use of heat sealing, hot air and hot wedge to join textile materials I. JONES, TWI Ltd, UK	355
11.1	Heat sealing of textiles: introduction	355
11.2	Equipment for heat sealing	356

11.3	Factors affecting the quality of heat sealing	359
11.4	Applications of heat sealing in textiles	362
11.5	Hot air wedge and hot wedge welding of textiles: introduction	362
11.6	Equipment for hot air/wedge welding	363
11.7	Factors affecting the quality of hot air/wedge welding	368
11.8	Applications of hot air/wedge welding in textiles	371
11.9	References and further reading	372
12	Ultrasonic and dielectric welding of textiles I. JONES, TWI Ltd, UK	374
12.1	Ultrasonic welding: an introduction	374
12.2	Equipment for ultrasonic welding	375
12.3	Factors affecting the quality of ultrasonic welding	379
12.4	Applications of ultrasonic welding in textiles	385
12.5	Dielectric welding: an introduction	388
12.6	Equipment for dielectric welding	390
12.7	Factors affecting the quality of dielectric welding	394
12.8	Applications of dielectric welding	394
12.9	References and further reading	395
13	Laser seaming of fabrics I. JONES, TWI Ltd, UK and A. PATIL, Vascutek Ltd, UK	398
13.1	Introduction	398
13.2	The laser welding process	398
13.3	The main processing parameters in laser welding and their effects	401
13.4	Equipment in laser welding	405
13.5	Textile materials that can be laser welded	414
13.6	Joint designs in laser welding	416
13.7	Monitoring and quality control in laser welding	418
13.8	Comparison between stitched and laser welded seams	420
13.9	Applications of laser welding	425
13.10	Future trends	433
13.11	References	434
14	Properties and performance of welded or bonded seams E. VUJASINOVIC and D. ROGALE, University of Zagreb, Croatia	435
14.1	Introduction	435
14.2	Performance properties of seams	436
14.3	Quality evaluation of welded or bonded seams	457

x	Contents	
14.4	Conclusion	458
14.5	References	461
	Part IV Applications of joining textiles	465
15	The appearance of seams in non-iron shirts G. K. STYLIOS, Heriot-Watt University, UK	467
15.1	Introduction	467
15.2	Wrinkle-free fabrics	467
15.3	Non-iron shirts and seam pucker	468
15.4	Interlinings as sewing aids	470
15.5	The stitching of non-iron shirts	471
15.6	Discussion and conclusion	473
15.7	Acknowledgements	475
15.8	Appendix: key terms and definitions	476
16	Seams in car seat coverings: properties and performance S. KOVAČEVIĆ and D. UJEVIĆ, University of Zagreb, Croatia	478
16.1	Introduction	478
16.2	Materials and machines for sewing car seat covers	479
16.3	Influence of the seam on materials for making car seat covers	490
16.4	Seaming problems in car seat covers and their solution	498
16.5	Future trends	501
16.6	Conclusions	503
16.7	Acknowledgement	504
16.8	References	504
17	Joining of wearable electronic components D. J. TYLER, Manchester Metropolitan University, UK	507
17.1	Introduction	507
17.2	Conducting fibres	510
17.3	Conducting yarns	511
17.4	Fabrics and composites	512
17.5	Connecting technologies	514
17.6	Requirements of electronic interconnects	522
17.7	Applications	526
17.8	Future trends	530
17.9	Sources of further information and advice	532
17.10	Acknowledgements	533
17.11	References	533

18	Joining of technical textiles with stringent seam demands	536
	S. KOVAČEVIĆ and D. UJEVIĆ, University of Zagreb, Croatia	
18.1	Introduction	536
18.2	Joining techniques for textiles with stringent seam demands	538
18.3	Applications of stringent seams in technical textiles	545
18.4	Future trends	562
18.5	Sources of further information and advice	562
18.6	Acknowledgement	563
18.7	References	563
19	Nonwoven materials and joining techniques	565
	A. POURMOHAMMADI, University of Payame Noor, Iran	
19.1	Introduction	565
19.2	Principles of nonwovens	565
19.3	Raw materials	570
19.4	Web formation technology	571
19.5	Web bonding technology	574
19.6	Nonwoven fabric finishing	575
19.7	Techniques for joining nonwoven materials	575
19.8	Future trends in the nonwoven market	578
19.9	Acknowledgements	581
19.10	References	581
20	Epilogue: joining textiles	582
	I. JONES, TWI Ltd, UK and G. K. STYLIOU, Heriot-Watt University, UK
