

# Contents

<i>Preface</i>	<i>xi</i>
<i>Introduction</i>	<i>xv</i>

## I

### Technology Forecasting

---

1. Technology Matters	3
2. The Structure of Technological Revolutions	7

## II

### Biggest Infrastructure Ever Built

---

3. Silicon Engines: The End of “Computers”	19
4. Information as Infrastructure	35

## III

### Revolutions in Technology’s Three Spheres: Information, Machines, Materials

---

5. The Information: The Knowledge Boom	57
6. The Information: Digitalizing Commerce	67
7. The Information: Digitalizing Science	81

8. The Materials: From Dematerializing to Rematerializing	89
9. The Materials: From Harvesting to Synthesizing	99
10. The Materials: The Energy Nexus	113
11. The Machines: Human Amplifiers	123
12. The Machines: The Magic in Movements	131
13. The Machines: Means of Production	147
14. The Machines: Energizing Everything	157
15. The Machines: Automation to Automatons	171

#### IV The Roaring 2020s

16. Work: The "End of Work" Myth	179
17. Work: The Servicification of Manufacturing	189
18. Work: Robotification of Services	203
19. Work: Freight Drones, Silicon Cars & Uber Air	213
20. Health: The Cure in the Code	227
21. Health: The Future Won't Be Like <i>Star Trek</i> ; It Will Be Better	237
22. Health: The Robotification of (Health) Services	249
23. Education and Entertainment: Down the (Same) Rabbit Hole?	257
24. Education: The Telecommuting Tutor	265
25. Education: Virtualizing "Soft" Skills for "Dirty Jobs"	275
26. Entertainment: From Euripides to E-Sports	285
27. Entertainment: The "Means" of Amusements	295
28. Science: The Pursuit of Miracles	303
29. Science: The "Neurotechnic" Era	317
Epilogue: What Could Possibly Go Wrong? Climate, China & Tech Barons	329
Appendix: The Business of Futurism	337
Acknowledgments	363
References & Notes	365
Index	423

#### FIGURES

<i>Figure 1.1</i>	U.S. Productivity Growth: A New Normal?
<i>Figure 1.2</i>	Revolutions at the Intersection of Three Spheres of Technology Progress
<i>Figure 2.1</i>	Perez Paradigm
<i>Figure 2.2</i>	The Smartphone and the Rule of Threes
<i>Figure 2.3</i>	Phase Changes and the Rule of Threes
<i>Figure 3.1</i>	Seventy Years of Computing Power: Maximum Computations Per Second
<i>Figure 3.2</i>	Beyond Moore's Law: The "Exponential" Era of Cheap Cloud Computation
<i>Figure 4.1</i>	New Network Paradigm: From Personal to Ubiquitous Enterprise Nodes
<i>Figure 4.2</i>	Network Growth Rates: From Radio to Smartphone
<i>Figure 4.3</i>	Information Infrastructures "as a Service"
<i>Figure 5.1</i>	Phase Change in Information Acquisition at the Intersection of Scale, Precision, and Time
<i>Figure 6.1</i>	Annual Spending by U.S. Businesses
<i>Figure 6.2</i>	The Coming Commercial Data Tsunami
<i>Figure 6.3</i>	Where Data Is Stored: The Cloud Era Inflection
<i>Figure 8.1</i>	Expanding Populations and Wealth Propel Global Material Use
<i>Figure 8.2</i>	Phase Change in Materials at the Intersection of Performance, Scale, and Information
<i>Figure 9.1</i>	Increasing the Information Content of Materials
<i>Figure 9.2</i>	Cumulative Number of Substances in the Chemical Abstract Services
<i>Figure 10.1</i>	Share of Global Energy from Renewables
<i>Figure 11.1</i>	Phase Change in Machines at the Intersection of Speed, Precision, and Information
<i>Figure 12.1</i>	Consumer SUV Preferences for Personal Transportation
<i>Figure 13.1</i>	Annual Global Purchases of Material Inputs
<i>Figure 14.1</i>	Driving with Lithium's Magic
<i>Figure 16.1</i>	Technology Progress, Wealth, and Unemployment

- Figure 19.1* Infrastructures for Machines That Move Things and People (U.S.)
- Figure 19.2* The Declining Cost of Speed: Machines That Move People
- Figure 20.1* Productivity Growth in America: The Great Healthcare Stagnation
- Figure 20.2* Where Venture Money Is Going in Digital Healthcare *circa* 2020
- Figure 22.1* Bending the Lifespan Curve by Surviving Nature's Assaults
- Figure 23.1* The Rise of Cloud Learning: Global Private Investment in EdTech
- Figure 24.1* Price Changes in Two Worlds: Services vs. Hardware
- Figure 27.1* International Tourist Arrivals
- Figure 28.1* Research in America: More Scientists, More Funding, and More Publications
- Figure 28.2* The Stokes Model: Pasteur's Quadrant
- Figure 28.3* The Mills Model: The Innovation Continuum
- Figure A.1* Dunning-Kruger Effect: The Less You Know, the More Confident You Are
- Figure A.2* Technology and Teaching: Giddy Prophecies *circa* Nineteenth Century
