List of Illustrations	xiii
Preface to the Second Edition	xvii
Acknowledgments	xxi
1 Introduction: Problems and Perspectives	1
<i>Plan of the Book</i>	8
2 China's Natural Environment and Early Human Settlement to 1000 BCE	15
<i>Natural Environment</i>	16
Landforms	16
China's Geographic Regions	18
Forests and Ecosystems	19
China's Climate	22
<i>Human Settlement and Pre-History</i>	26
The Origins of Agriculture in China	27
Rice Environments in Central and South China	28
Malaria	32
The Yangzi River Valley	32
The Environment for Millet in North China	33
Nitrogen and Fertilizer	36
Summary	37
<i>Prehistoric Environmental Change</i>	38
<i>The Formation of a Chinese Interaction Sphere, 4000–2000 BCE</i>	43
<i>Bronze-Age China: Technology and Environmental Change, 2000–1000 BCE</i>	45
The Bronze-Age Shang State, 1500–1050 BCE	47
Anyang	48
Shang Social Organization	48
Domestication and Extinction of Wild Cattle	49

Food	50
Shang "Civilization" and "Barbarian" Others	50
<i>Environmental Change, 1500–1000 BCE</i>	51
Energy Regime	55
Climate Change and the Fall of the Shang	56
<i>Conclusion</i>	57
 3 States, Wars, and Farms: Environmental Change in Ancient and Early Imperial China, 1000 BCE–300 CE	65
<i>States, War, and Environmental Change in Ancient China, ca. 1000–250 BCE</i>	65
Nomadic Pastoralists of the Steppe	68
Other Non-Chinese Peoples	72
The Zhou Conquest: Colonies and Forests, 1050–750 BCE	73
Wars, Warring States, and the Creation of the First Empire, 750–200 BCE	77
Iron and Steel in Ancient China	79
War and the Use of Natural Resources	81
The Warring States and Non-Chinese Peoples	82
Pastoral Nomads and Nomadic Invaders	83
Summary	85
<i>Environmental Change in the Early Empire, 221 BCE–220 CE</i>	85
Han Colonialism, the End of the Xiongnu Steppe Nomads, and the Beginnings of Desertification	87
Han Roads and the Opening of New Lands	90
Empire, Agriculture, and Deforestation	93
Water Control	96
The (Yellow) River	98
Cities and Eating	100
Imperial Hunting Parks	100
Summary	101
<i>Ancient Chinese Ideas about Nature and the Environment</i>	102
Confucius	104
Daoism	104
Later Confucians	105
Legalism	106
Resource Constraints and the Control of "Nature"	107
Epidemic Disease	108
<i>The End of the Early Empire</i>	109
<i>Conclusion</i>	110
 4 Deforesting the North and Colonizing the South in the Middle Imperial Period, 300–1300 CE	119
<i>North China: War, Depopulation, and the Environment, 300–600 CE</i>	122
<i>Environmental Change in the Yangzi River Valley</i>	127

Wet-Rice Cultivation	129
<i>North and South Reunited in the Middle Empire: The Sui, Tang, and Song Dynasties, 589–1279 CE</i>	132
War and Water in Reuniting China under the Sui Dynasty (589–618)	134
The Grand Canal	135
<i>Han Colonization of the South and Southeast</i>	137
“South of the Mountains”: Lingnan	138
The Southeast Coast	142
<i>Disease Regimes North and South</i>	143
Malaria in the South	143
Contagious and Epidemic Disease in the North	146
<i>New Agricultural Technologies and Environmental Change</i>	148
Weeds and Fish	152
Technological Diffusion	153
Landed Estates	154
Buddhist Monasteries	154
Tang-Era Attitudes (and Actions) toward Nature	157
<i>China’s Medieval Industrial Revolution</i>	158
<i>Colonizing Sichuan and Categorizing Others</i>	162
Organizational Context	164
Chinese Views of “Barbarians” and Others	165
The “Cooked” and the “Raw”	165
Animals	165
<i>Landscapes and Water “Control”</i>	166
North China	166
Yellow River Water Control	168
Environmental Decline on the North China Plain, 1048–1128	170
South China: The Making of the Pearl River Delta	172
Flood Control	174
Fields Captured from the Sea	176
<i>The Built Environment: Cities and Waste</i>	177
An Urban Exemplar: Tang Chang’an	178
Waste, Sustainability, and Nutrient Cycles	181
<i>Conclusion</i>	183
5 Empire and Environment: China’s Borderlands, Islands, and Inner Peripheries in the Late Imperial Period, 1300–1800 CE	191
<i>A New Historical and Institutional Context</i>	191
Population Size and Distribution	191
Markets	194
Climatic Changes	196
<i>Frontiers and Borderlands</i>	197
Environment and Identity	197
The Southwest	198
The Ordos Desert and the Great Wall	207
The Seventeenth-Century Crisis	210

The Great Hunt in the Northeast	212
China Marches West	214
<i>Islands and Their Ecological Transformations</i>	217
Hainan Island	217
The Island of Taiwan	222
<i>Land Cover, Land Use, and Land Ownership</i>	226
<i>Exploitation of Inner Peripheries</i>	228
Highland Specialists: The Hakka and the "Shack People"	228
The Central Yangzi Region—Hunan and Hubei Provinces	232
The Lower Yangzi Highlands	237
<i>The Ecological Limits of Empire</i>	240
China's Southwest and "Zomia"	244
Debates over Natural Resource Use (and Abuse)	244
<i>Conclusion: Population, Markets, the State, and the Environment</i>	246
6 Environmental Degradation in Modern China, 1800–1949	257
<i>Chinese Consumption and Its Ecological Shadows</i>	257
The Pacific Islands and Sandalwood	258
Siberia and Furs	259
The American West Coast: Sea Otter and Beaver Pelts	259
India and Opium	260
Opium and Global Epidemics	261
Opium and War	262
Foreign Imperialism and China's Environment	264
<i>Ecological Degradation and Environmental Crisis</i>	264
Northwest China	266
The Huai River Valley	269
The Yellow River and Grand Canal Region	269
The North China Plain	274
Yangzi River Valley	277
South China	278
Southwest China: Yunnan	279
West China: Sichuan	280
Tibetan/Qinghai High Mountain Plateau	281
<i>Agricultural Sustainability</i>	282
The Mulberry Tree and Fish Pond Combination	283
Resource Constraints, Environmental Management, and Social Conflict	285
Forests as Food Reservoirs	288
<i>Into the Twentieth Century</i>	289
ENSO Droughts and Chinese Famines	289
North China Famines and Migration to Manchuria and Inner Mongolia	291
Fujian Forests and Forestry	293
Fisheries	294

War's Environmental Catastrophes	295
<i>Conclusion</i>	297
7 "Controlling" Nature in the People's Republic of China, 1949–Present	307
<i>Socialist Industrialization and Subduing Nature</i>	307
Socialist Industrialization and Its Material Constraints	308
Depleted Soils	309
Foreign Opposition to Chinese Socialism	309
A Big and Growing Population (Is Good)	309
Shortages of Chemical Fertilizer	311
Chinese Communist Ideas about Nature	313
The Idea to Control Nature	313
Soviet Lysenkoism	314
Post-Mao Reform Era, 1978–Present	315
Breaks with Maoism	316
Chemical Fertilizer Plants	316
Population Control	316
<i>Changes to Forests and Land Use</i>	318
China's Official Forest-Cover Statistics	318
Forest Ownership Regimes	322
Collective Ownership	322
The Responsibility System of "Private" Ownership	324
State-Owned Forests	326
Deforestation during the PRC: "The Three Great Cuttings" Plus One	326
Great Cutting No. 1: The Great Leap Forward, 1958–60	327
Great Cutting No. 2: The Third Front and the Cultural Revolution, 1966–76	327
Great Cutting No. 3: Deng's Reform Era, 1978–88	329
Market-Driven Deforestation, 1992–99: The Last Great Cutting?	329
Grasslands and Desertification	331
Summary	336
<i>State Nature Preserves and the Protection of Biodiversity</i>	336
Nature Reserves	337
The "Great Green Wall" and Other Reforestation Projects	339
Wildlife, Consumption, and Epidemic Disease	341
<i>"Controlling" Water</i>	343
"Harness the Huai!"	343
Dam the Yellow River	344
Environmental Consequences of Dam Building	345
The Huai River Runs Black	346
Deep Drilling on the North China Plain	347
The South-to-North Water Transfer Project	348
The Three Gorges Dam	349
Historic Dujiangyan	350

The Three Parallel Rivers Region of Yunnan	351
“Develop the West”: The Struggle to Dominate Nature Continues	353
The Conquest of Malaria and the Building of Dams	354
<i>Polluting the Atmosphere</i>	357
Powering the Economic Surge—Mostly with Coal	357
Auto-Nation China	358
China and Global Climate Change	360
Tibet, Glaciers, and Desertification	362
Urbanization and Pigs	364
<i>Environmental Protests, Consciousness, Activism, and Movements</i>	366
Lake Tai and Crusading Villager Wu Lihong	367
For Clean Water, Peasants Protest a Fertilizer Factory in Gansu	368
A Large-Scale “Environmental Mass Incident”	368
State Responses to Environmental Problems	370
Green NGOs	371
Environmentalism and Democracy	372
Return to the “Angry” River	373
An “Ecological Civilization”?	375
<i>Conclusion</i>	376
8 Conclusion: China and Its Environment in World Historical Perspective	393
<i>Main Themes in China’s Environmental History</i>	394
Changes in Land Use and Land Cover	394
Climate Change	394
Water Control	395
Deforestation	396
Colonization	396
The Simplification of Ecosystems	396
<i>Species Extinction, Extirpation, and Conservation</i>	397
The Sustainability of Agriculture	398
The Problem of 1949: 3,000 Years versus 30	398
China’s Ecological Resilience	399
<i>The Driving Forces of China’s Environmental Change</i>	400
Agriculture and the Chinese State	401
Markets and Commerce	403
Technological Change	404
Cultural Ideas and Practices	405
Population Size and Dynamics	405
<i>China’s Environmental History in a World Historical Context</i>	406
Select Bibliography	413
Index	427
