A. A brief history of excavations of a Late Palaeolithic settlement at Moravany on the Váh and Piešť'iany-Banka	9
B. Geographical setting of Moravany on the Váh and Piešť'iany-Banka sites	15
C. Moravany-Žakovska (excavations 1991-1992)	21
1. Introduction	21
2. Site profile against the background of regional stratigraphy (by Maciej Pawlikowski)	23
3. Summary of the stratigraphic sequence: sedimentological and mineralogical analyses (by Maciej Pawlikowski)	27
4. Macroscopic and microscopic anthropogenic components in the site profile	30
5. Scatter-pattern of macro-finds and horizontal variability of anthropogenic indices	35
6. Evident structures from the investigations of L. F. Zotz and F. Prošek	42
7. Chipped stone artefacts	44
7.1. General inventory structure	44
7.2. Raw materials	45
7.3. Cores	47
7.4. Flakes and blades	49
7.5. Flake fragments and small flakes	54

7.6. Retouched tools	55
8. Ground stone tools	58
9. Mineral dyes (by Maciej Pawlikowski and Joanna Trąbska)	61
9.1. Results of field survey	65
9.2. Conclusions	74
10. Radiocarbon dating (by Anna Pazdur)	74
11. Anthracological analysis (by Maria Lityńska-Zajac)	74
12. The fauna with <i>Arianta arbustorum</i> L. (by Stefan W. Alexandrowicz)	81
13. Remains of fossil mammals (by Henryk Kubiak)	82
14. Discussion and conclusions	85
