

## OBSAH

Marek **BALKO**, Michal **MACEK**

*Heat transfer by turbulent flow in experiment with rayleigh-bénard convection in cold helium* .....1

Adam **BLÁHA**, Aneta **KUZMÍKOVÁ**, Filip **TRNKA**

*Mutual interaction of the serially arranged stenoses at low Reynolds numbers* .....2

Dávid **BLEHO**, Róbert **OLŠIAK**, Branislav **KNÍŽAT**, Marek **MLKVIK**

*Numerical analysis of the radial load of a single blade pump*.....3

Tomáš **BLEJCHAŘ**, Václav **NEVRLÝ**, Michal **DOSTÁL**, Vít **KLEČKA**, Petr **BITALA**, Václav **VÁLEK**, Michal **VAŠINEK**, Jan **SUCHÁNEK**, Zdeněk **ZELINGER**, Jan **WILD**

*Numerical Simulation of The Combustion of Preheated Ultra-Lean Dimethyl Ether/Air Mixture* .....4

Petr **BRZEZINA**, Lumír **HRUŽÍK**, Adam **BUREČEK**, Filip **DÝRR**

*Simulation of energy saving testing of rotary hydraulic motors for different speeds* .....5

Ondrej **CEJPEK**, Milan **MALY**, Jan **JEDELSKY**

*Combined spray span factor from phase doppler anemometry and high-speed imaging*.....6

Nikola **ČAJOVÁ KANTOVÁ**, Alexander **ČAJA**, Zuzana **KOLKOVÁ**, Pavol **BELÁNY** and Peter **HRABOVSKÝ**

*The properties of wood pellets formed from biowaste* .....7

Mária **ČARNOGURSKÁ**, Miroslav **PŘÍHODA**

*Effects of temperature and pressure on the geometry of a gas pipeline* .....8

Daniel **DUDA**, Vitalii **YANOVYCH**, Václav **URUBA**

*Vortex profiles in grid turbulence observed by PIV*.....9

Filip **DUDA**, Natália **JASMINSKÁ**, Ivan **MIHÁLIK**, Šimon **HUDÁK**

*Design and stress analysis of low-pressure metalhydride vessels for storing hydrogen* ....10

Ladislav **DZURENDA**, Adrián **BANSKI**

*Model of emissions production from wood combustion in the creation of thermal comfort in a heated building depending on the climatic conditions of Slovakia*.....11
