

CONTENTS

1 Introduction.....	5
2 Composite Materials based on Renewable Raw Materials	7
2.1 Concept of bio-composites	7
2.2 Particleboards from wood	7
2.3 Commercially produced particleboards from post-harvest residues.....	9
3 Lignocellulosic Range used in Particleboards	10
3.1 Rapeseed straw.....	11
3.2 Other lignocellulosic materials.....	12
4 Surface Modifications	14
4.1 Chemical modification	15
4.2 Plasma modification.....	16
5 Production Process of Particleboards from Post-Harvest Residues.....	18
5.1 Raw material harvest.....	18
5.2 Storage of raw material.....	19
5.2.1 Storage of material for the production of particles.....	19
5.2.2 Storage of wet particles	20
5.2.3 Storage of dry particles.....	21
5.3 Disintegration of raw material	22
5.3.1 Production of wood particles	22
5.3.2 Case study: straw disintegration	23
5.4 Drying particles.....	24
5.4.1 Drying wood particles	24
5.4.2 Case study: straw particle drying.....	25
5.5 Sorting and secondary grinding of particles.....	25
5.5.1 Sorting and secondary grinding of wood particles	25
5.5.2 Case study: sorting and secondary grinding of straw particles.....	26
5.6 Application of adhesive mixture.....	26
5.6.1 Application of adhesive mixture in the manufacture of particleboards	26
5.6.2 Case study: application of an adhesive mixture to straw particles.....	27
5.7 Forming of mattress.....	28
5.7.1 Forming of mattress in the manufacture of particleboards.....	28
5.7.2 Case study of forming of mattress from straw particles	29
5.8 Pressing.....	30
5.8.1 Mattress from wood pressing	30
5.8.2 Case study: mattress from straw pressing.....	30
5.9 Finishing of particleboards	33
6 Competitive Industry for Production of Straw Particleboards and the Price of Raw Material.....	34
6.1 Competitive industry for production of straw particleboards.....	34
6.1.1 Bioethanol production.....	34
6.1.2 Analysis of production and manufacturing of bioethanol.....	34
6.2 Price of raw material.....	35

7 Properties of Composites from Alternative Raw Materials37

7.1 Technological parameters.....37

7.1.1 Methodology37

7.1.2 Results.....41

7.2 Quality parameters of composites.....54

7.2.1 Methodology54

7.2.2 Results55

8. Conclusion.....60

9. References.....61

10. Supplement.....66
