List of abbreviations and symbols.....	7
Introduction.....	9
<b>1 Buildings and building constructions.....</b>	<b>11</b>
1.1 Building products .....	11
1.1.1 <i>Classification procedure</i> .....	11
1.2 Structural elements .....	13
1.3 Construction systems .....	15
1.4 Wooden buildings .....	21
1.5 Requirements of Eurocodes on design of timber structure especially from the fire safety point of view .....	24
1.5.1 <i>Safety requirements</i> .....	26
1.5.2 <i>Design procedure</i> .....	26
1.5.3 <i>Design aids</i> .....	27
<b>2 Compartment fire dynamics .....</b>	<b>28</b>
2.1 Effect of changes in temperature and heat release rate on fire development.....	30
2.2 Fire scenarios.....	31
<b>3 Effect of thermal loading on wooden beams properties.....</b>	<b>35</b>
3.1 Tests of fire resistance.....	35
3.1.1 <i>Analysis of parts of the structure</i> .....	36
3.2 Response of structural elements exposed to the fire loading .....	36
3.3 Wood properties affecting its fire resistance .....	36
3.4 Effect of air relative humidity on the wood moisture content.....	42
3.5 Wood properties affecting fire initiation and propagation .....	44
3.5.1 <i>Fire initiation phase</i> .....	45
3.5.2 <i>Fire propagation phase</i> .....	45
<b>4 Computer aided modelling as a progressive tool   in fire safety of buildings .....</b>	<b>47</b>
4.1 Fire models .....	47
4.1.1 <i>Empirical models</i> .....	47
4.1.2 <i>Physical models</i> .....	48
4.1.3 <i>Mathematical models</i> .....	48

4.2	Input data to the fire modelling.....	50
4.2.1	<i>Wood thermal conductivity</i> .....	50
4.3	Phase changes and heat conduction theory.....	53
4.4	Effect of moisture content on thermal conductivity of wood.....	57
4.5	Homogenization of wood.....	59
<b>5</b>	<b>Engineering simulations in ANSYS</b> .....	<b>62</b>
5.1	Model development.....	62
5.2	Database of materials.....	63
5.2.1	<i>Defining Material Properties</i> .....	64
5.3	Finite element mesh.....	64
5.4	Types of meshing.....	65
5.5	Meshing method.....	66
5.6	Statistics group.....	67
5.7	Boundary conditions.....	72
5.8	Calculation system settings.....	73
5.9	Results processing.....	75
5.10	Analysing thermal phenomena.....	75
5.10.1	<i>Steady-State Analysis</i> .....	76
5.10.2	<i>Transient Thermal Analysis</i> .....	76
5.10.3	<i>Applying loads</i> .....	76
5.10.4	<i>Convection</i> .....	77
5.10.5	<i>Radiation</i> .....	77
5.10.6	<i>Heat flow rates</i> .....	78
5.10.7	<i>Heat fluxes</i> .....	79
5.10.8	<i>Heat generation rates</i> .....	79
5.10.9	<i>Constant temperature boundaries</i> .....	79
<b>6</b>	<b>Experiment</b> .....	<b>80</b>
6.1	Selection of structural elements for testing based on predefined criteria.....	80
6.2	Implementation of small and medium-scale fire tests.....	80
6.2.1	<i>Determination of wood density</i> .....	81
6.2.2	<i>Determination of flammability in a hot air furnace according to STN ISO 871</i> .....	81
6.2.3	<i>Determination of mass loss</i> .....	82
6.2.4	<i>Small-scale fire tests</i> .....	82
6.2.5	<i>Medium-scale fire tests of wooden beams</i> .....	83
6.2.6	<i>Determination of gross and net calorific value</i> .....	87

6.3	Selection and verification of suitable fire models.....	87
6.4	Computer fire model creation in ANSYS.....	88
6.4.1	<i>Finite element analysis model</i> .....	88
6.4.2	<i>Model simplification</i> .....	88
6.4.3	<i>Finite element analysis optimization</i> .....	89
6.4.4	<i>Effective removal of negligible bodies</i> .....	89
6.4.5	<i>Proper meshing</i> .....	89
6.4.6	<i>Entering loading into simulations</i> .....	90
6.5	Modeling the behaviour of structural elements in fire in ANSYS .....	91
6.5.1	<i>Input data on material properties</i> .....	91
6.5.2	<i>Geometry of the model</i> .....	94
6.5.3	<i>Model</i> .....	94
6.5.4	<i>Simulation settings</i> .....	96
6.5.5	<i>Setting the method of solution and processing of results</i> .....	97
6.5.6	<i>Validation of applied fire models using the results of medium-scale fire tests</i> .....	97
6.6	Results of realised experiments .....	98
6.6.1	<i>Determination of basic physical and fire properties of wood</i> .....	98
6.6.2	<i>Results from small-scale fire tests</i> .....	101
6.6.3	<i>Comparison of results from medium-scale fire tests and simulations</i> .....	104
6.6.4	<i>Comparison of the charred layer</i> .....	125
6.6.5	<i>Depth and rate wood charring</i> .....	130
6.7	Results discussion.....	132
7	Conclusions .....	136
	Summary.....	140
	Glosary.....	142
	References.....	144
	About the authors .....	158
	Subject index .....	159
