List of tables and figures	8
INTRODUCTION	11
1 LITERATURE REVIEW	13
1.1 Flax (<i>Linum usitatissimum</i>)	13
1.1.1 Flax characteristics	13
1.1.2 Nutritional composition of flax seeds.....	15
1.1.3 Importance and use of flax	22
1.2 Pumpkin (<i>Cucurbita</i> sp.).....	33
1.2.1 Characteristic of pumpkin	33
1.2.2 Nutritional composition of pumpkin	34
1.2.3 Importance and use of pumpkin	39
1.3 Current status on the oil seeds market.....	45
1.3.1 Production parameters of flax and pumpkin in the world, EU and in the SR ..45	
1.4 Poultry nutrition and fattening	48
1.4.1 Technology of broiler chickens fattening.....	48
1.4.2 Basic nutritional components of feed	50
1.4.3 Use of antibiotics in broiler chicken production.....	51
1.4.4 Plant residues in animal feed	56
1.4 Meat performance of broiler chickens.....	58
1.5 Nutritional quality of chicken meat.....	63
1.5.1 Proteins and amino acids	64
1.5.2 Lipids and fatty acids.....	65
1.5.3 Minerals and trace elements	68
1.6 Organoleptic quality of chicken meat	69
1.6.1 Meat colour.....	69
1.6.2 Meat juiciness	71
1.6.3 Meat texture.....	71
1.6.4 Meat flavour.....	73
2 AIM OF THE WORK	75
3 MATERIAL AND METHODS	76
3.1 Object of research.....	76

3.2 Technical realization of the experiment	76
3.2.1 Housing system.....	76
3.2.2 Feed mixtures.....	77
3.3 Monitored indicators of the experiment	78
3.4 Methods and principles for monitoring experiment indicators	79
3.4.1 LBW, giblets weight and carcass yield of broiler chickens at the end of the experiment.....	79
3.4.2 Chemical composition of chicken meat.....	79
3.4.3 Sensory evaluation of the most valuable parts of carcass—breasts and thighs.....	79
3.5 Statistical methods.....	80
4 RESULTS AND DISCUSSION.....	81
4.1. Live body weight of the chickens at the end of fattening and selected meat performance indicators	81
4.2 Chemical composition of chicken meat	87
4.3. Sensory evaluation of chicken meat.....	94
CONCLUSION.....	98
Abstrakt v slovenskom jazyku	101
Abstract in english.....	102
