

M. Hajžman, P. Polach: Multibody modelling methodology of the railway vehicle for heavy loads transport .....	7
J. Horáček, V. Radolf, V. Bula, J. Košina, A. Geneid, A.-M. Laukkanen: Estimation of damping in human vocal folds vibration: measurements <i>in vivo</i> and on model .....	11
S. Chindada, P. Šnábl, L. Pešek: Experimental and numerical evaluation of blade cascade instabilitz using traveling wave mode approach .....	17
G. Chwalik-Pilszyk. M.S. Kozień: Using the Wan-Schimmels model to simulate modal characteristics of a human who use a wheelchair .....	23
L. Lacny: Numerical calculation of Joule heat losses inside a current-pulsed hollow cylinder using Fourier series approach .....	27
D. Maturkanič, P. Procházka, R. Hodbod', M.L. Mekhalfia: Identification of the blade tip position and measurement techniques using the BTT method .....	29
M.L. Mekhalfia, P. Procházka, E.B. Tchawou Tchuisseu, D. Maturkanič, R. Hodbod: Vibration mode shape extraction of blade disk .....	39
M.L. Mekhalfia, P. Procházka, E.B. Tchawou Tchuisseu, D. Maturkanič, R. Hodbod: Two-way fluid structure interaction study of aero-engine compressor blade vibration under air excitation .....	43
L. Pešek, P. Šnábl: Turbine blade linkages in reduced modal synthesis model .....	47
L. Pešek, C.S. Prasad, P. Šnábl: Measurement and analysis of vibration and acoustic emissions of a railway wheel under defined dynamic excitations .....	55
P. Piekaj, G. Ciepok: Experimental test of milling in the antiresonance vibratory mill of a quasi-circular movement trajectory .....	61
P. Procházka, P. Antoš, P. Šnábl: Aeroacoustic noise source investigation in the case of the blade cascade .....	65
J. Rendl, Š. Dyk, R. Bulín, M. Hajžman: Influence of contact stiffness in ball-and-socket on tilting-pad journal bearings characteristics .....	69

P. Šulc, P. Šnábl, L. Pešek, V. Bula: Identification of material constants of rubber damping segments by modal analysis for railway rubber-resilient wheels .....	73
J. Zapoměl, J. Kozánek, J. Košina, J. Cibulka: Approaches to dynamical analysis of rotors with parameters OF uncertain magnitudes .....	79
I. Zolotarev, V. Bula, P. Šnábl: Experimental investigation of the frequency-modal properties of the measuring container for "LUNA mission" .....	81
W. Żmuda W., P. Czubak.: Transport possibilities of the new vibratory conveyor .....	87
Author index .....	91
