## CONTENTS

| 1  | Overview and introduction to skill performance and learning                       | 1   |
|----|---|-----|
| 2  | (Re)organising movement system degrees of freedom to achieve task goals           | 8   |
| 3  | An ecological dynamics rationale for a nonlinear pedagogy                         | 25  |
| 4  | Nonlinear pedagogy: An overview of key principles                                 | 45  |
| 5  | The role of functional, adaptive variability in promoting individualised learning | 66  |
| 6  | Specificity of transfer and representative learning design                        | 89  |
| 7  | Provision of information to stabilise perception—action couplings                 | 102 |
| 8  | Manipulating instructional constraints to encourage exploratory learning          | 120 |
| 9  | Practice task organisation and movement variability                               | 134 |
| 10 | Relations between nonlinear pedagogy and games-based teaching approaches          | 160 |
