About the Author.....	xiii
Acknowledgements.....	xiv
Foreword	xv
Introduction.....	xvi

PART ONE – TRIZ Logic and the Tools for Innovation and Clarity of Thought

Chapter 1: TRIZ Tools for Creativity and Clever Solutions.....	3
What is TRIZ?	3
Who Uses TRIZ and Why?	4
TRIZ and Other Problem-Solving Toolkits.....	5
Innovation – Fool’s Gold or TRIZ?	6
What does TRIZ Offer?	7
TRIZ Delivers Systematic, Guaranteed Innovation and Creativity	7
TRIZ – Helps Us Understand the Problem and All its Solutions	7
TRIZ Simplifies Systems to Maximize Benefits and Minimize Costs and Harms.....	7
TRIZ Helps Us Overcome Psychological Inertia	8
How TRIZ Works.....	8
The Golden Rule of TRIZ.....	8
The TRIZ Toolkit.....	9
TRIZ Creativity Tools.....	14
TRIZ Creativity Triggers (to be applied at any/all stages as required).....	14
Creativity Prompts – Smart Little People and Size-Time-Cost.....	15
Smart Little People (SLP).....	15
Size-Time-Cost for Visualizing Solutions.....	18
TRIZ for Everyone – No Matter What Your Creativity	19
Chapter 2: TRIZ Knowledge Revolution to Access All the World’s Known Solutions	22
Problem Solving – Resolving Defined Problems.....	22
Limited Time for Understanding and Solving Important Problems.....	22
From Random to Systematic Problem Solving	24
Problems Vary – Some Are Easy, Some Are Difficult.....	25
TRIZ Five Levels of Inventiveness/Creativity	26
How to Access Our Own and the World’s Knowledge	29
TRIZ ‘Dictionary’ of the 100 World’s Conceptual Solutions to Any Engineering Problem.....	30
Back to First Principles	35
Conclusion: TRIZ Access to the World’s Knowledge.....	37
Case Study: TRIZ in Rolls-Royce.....	38

Chapter 3: Fundamentals of TRIZ Problem Solving43

What is Problem Solving?43

 Finding Solutions – Systematic or Eureka Moments?44

 I’m a Genius – I Don’t Need TRIZ Thinking.....45

TRIZ Conceptual Solutions.....46

 Thinking in Time and Scale47

 Many Solutions to Any Problem.....48

 TRIZ for Sharing Solutions49

Logic of TRIZ Problem Solving.....50

 Understand the Problem – Where’s the Fun in That? We Like Solutions.....51

 Spontaneous ‘BAD’ Solutions.....52

 Bad Solution Parks.....52

 TRIZ Innovation Audit Trails – Importance of Hindsight in Problem Solving.....54

TRIZ Basic logic – Improving Ideality55

 Choosing Systems to Meet All Needs56

 Systems Provide Functions Which Provide Benefits.....57

 Using the Bad Solution Park at All Stages of Problem Solving.....58

 Functions or Benefits? Functions Imply How We Get Something but
 Benefits Contain No Solutions in their Descriptions.....59

Avoiding Premature Solutions – Ask WHY?61

 Asking Why and How as Practical Problem Tools63

 How?.....63

 Simple Questions to Ask in Problem Solving64

Stakeholder needs and the Ideal.....65

 Start by Imagining an Ideal System.....67

Problem Solving at the Right Price with TRIZ – Use Trimming and Resources67

 TRIZ Trimming67

 Problem-Solving Steps – Before, During and After.....68

Chapter 4: Thinking in Time and Scale69

Talented Thinking69

 Time and Scale – Helps with All Problems Types71

Inventive Engineers – Thinking in Time and Scale for System Context and All Requirements71

Why Use Time and Scale?.....73

Time and Scale Can Be Used in at Least Four Ways74

 Context Map75

 Solution Maps.....77

 Needs Map.....79

 Causes and Effects and Hazards Maps81

Unidentified Manufacturing Problem – Scrap Rate Rises Dramatically87

Use 9-Boxes to Understand History/Context of a Problem.....89

Conclusion: TRIZ Aim is to Increase Ideality and Subdue Complexity.....90

 Time and Scale – an Important TRIZ Tool.....90

Case Study: Applying Time and Scale to Nuclear Decommissioning Research Sites
Restoration Limited– an Estimating Workshop92

PART TWO – The Contradiction Toolkit

Chapter 5: Uncovering and Solving Contradictions97

Contradictions – Solve or Compromise?97

What is a Contradiction?98

 Spotting Contradictions – But and And.....99

Systems Meet Needs	100
Compromise or Solve?	100
40 Inventive Principles	101
Fact or Fiction.....	101
What is a Contradiction.....	102
Technical Contradiction.....	102
Don't Compromise – or Choose Between Two Conflicting Solutions – Have Both	103
Physical Contradiction.....	104
40 Principles Solve All Contradictions	108
Contradiction Matrix	109
Solve Technical Contradictions with the Contradiction Matrix	109
Contradiction Definition from the 39 Technical Parameters	109
The 39 Technical Parameters.....	110
Understanding the 39 Technical Parameters	110
Using the Matrix.....	113
Logical Steps for Problem Solving Using the Contradiction Matrix – Start with	
Bad Solutions	115
Solving Problems.....	116
How Can We Match Our Solutions to the 39 Technical Parameters?.....	118
Solving Physical Contradictions.....	120
Separate in Time.....	120
Physical Contradictions are Everywhere in the Real World.....	122
Separate in Space	123
Separate on Condition	125
Separate by System	126
Physical Contradiction Examples.....	128
Finding Physical Contradictions.....	129
Physical or Technical Contradiction	131
Use the Separation Principles or Matrix?	131
Using the Contradiction Matrix to Solve the Physical Contradiction of the	
Board Pointer.....	131
Summary of Contradictions.....	133
Case Study: The Large and the Small of the Measurement of Acoustic Emissions in	
a Flying Aircraft Wing.....	133
Problem: The Measurement of Acoustic Emissions in a Flying Aircraft Wing	134
Appendix 5.1: 40 Principles: Theory of Inventive Problem Solving.....	140

PART THREE – Fast Thinking with the TRIZ Ideal Outcome

Chapter 6: The Ideal Solves the Problem.....	177
Simple Steps to Fast Resourceful Systematic Problem Solving.....	177
The Ideal as a Concept Has Four Major Roles in TRIZ Problem Solving.....	177
System We Want – The Acceptable Ideality	178
Ideal – Solves the Problem Itself	179
Traffic Control Systems – Ideal Self Systems.....	180
Define the Ideal – and Then Find the Resources to Create It	181
Quick Ideal Problem Solving.....	181
Ideal and Resources.....	182
Role of the Ideal Solution in the Problem-Solving Process.....	182
Ideal – Using Free Resources to Attract Customers.....	183
Genius, Resources and Ideal Thinking.....	183
TRIZ Helps Us Think Like Great Inventors Who Cleverly Use Resources	184

Contents

Ideal Solution Machine/User Manual to Uncover All Required Functions.....184

 Ideal Solution and Ideal User Manual for Public Toilets184

Systems – Get the Right System and Get the System Right.....185

Ideal Outcome to Help Us Appropriately Ignore/Subjugate Constraints186

Too Much Innovation?186

Ideal Outcome to Solve Problems.....187

Ideal and Constraints, Reality and Problem Solutions188

Constraints = Restrictions on How We Deliver (Not What We Want/Don’t Want)189

The Ideal Helps Test Our Real Constraints.....190

Start with Only Requirements – Initially Forget Both Systems and Constraints.....191

Ideal, Constraints – and the Appropriate Levels of Problem Solving.....192

 Where and When Do I Solve the Problem of Having a Bumpy Ride to

 Work on My Bike?193

Conclusion: Ideal Outcome Prompts Us to Understand Requirements and

Simultaneously Find Solutions195

Chapter 7: Resources: The Fuel of Innovation..... 196

Using Resources – How to Become a Resourceful Engineer.....196

Use the Resources We’ve Got197

 Transforming Harms198

 Minimize Inputs198

Locating and Defining Resources.....199

 Resource Hunts – Focussed by Functions Which Give Us ‘What We Want’199

Resources and Make or Buy Decisions200

Needs – the Beginning of Any Process – Engineering or Otherwise.....201

Requirements, Solutions and Resources201

TRIZ Helps Engineers Balance Ingenuity and Time to Encourage Innovation

in Design.....202

Functions = Solutions to Give Us What We Want to Deliver202

 Life and Death Solutions are Good Resources.....203

 Attitudes, Mood, Fears and Enthusiasm are Significant Resources Too203

TRIZ Problem Solving Using Resources.....204

Resource Hunt206

 Using Super-system Resources208

 Resources and Hazards209

 Resources When in Peril209

 Four Simple Steps to Using Resources More Effectively210

TRIZ Triggers Plus Resources for Practical Solutions211

 Clever Solutions Use the Right and Available Resources213

 Simple Steps to Resourceful Systematic Problem Solving.....214

 Quick Ideal Thinking.....214

 Ideal Outcome, Delivered by Essential Functions – Look for Relevant Resources214

The Ideal Solves the Problem Itself – Ideal Self Systems.....216

 Seeking Smart Resources to Achieve Certain (Often Opposite) Benefits216

Ideal Self Systems – Ideal Resources Used to Design a Tomato Sauce Bottle218

Best Use of Resources – Overall TRIZ Philosophy.....220

Chapter 8: Ideal and the Ideality Audit..... 221

Ideality Audit222

 Ideal in TRIZ Comes in a Number of Names and Tools222

 Ideal Outcome in the Bigger Picture223

 Ideality Audit Begins with the Ideal Outcome224

Benefit Capture Exercise	225
Undertaking an Ideality Audit	226
No System Yet?	228
Using the Ideal in Aerospace Problem-Solving Sessions	228
Thinking Up Solutions is More Fun than Meeting Needs	230
Different Stakeholders Have Different Ideal Outcomes	231
Ideality of All Stakeholders	232
TRIZ Embraces Solution-Mode Thinking	232
Defining the Ultimate Goal and Prime Benefit	233
Subtle Difference Between the Ultimate Goal and Primary Benefit	233
Identifying Opposite Primary Benefits	234
Ultimate Goal Achieved by Opposite Systems from Opposite Primary Benefits	234
Identifying Real Goals – Owning a Submarine Fleet	235
Ideal Outcome	236
Ideal Outcome and Inventing	236
Invention, Ideal Outcome and Science Fiction for Gathering of New Solutions	237
Using the Ideal to Invent Systems	237
Using the Ideal to Understand What We Want and Then Achieve It – Windows for Houses and Offices	238
1. Problem, Context and Initial Problem Statement + Constraints	238
2. Map Context in 9-Boxes	238
3. Ideal Outcome – What Do We Really, Really Want?	239
4. Ideality Audit	239
5. Ideal System – What does it do?	240
6. Define Ideal Functions (Delivered by X-Factor)	240
7. Seek Good Solutions	240
Conclusion	242

PART FOUR – TRIZ, Invention and Next Generation Systems

Chapter 9: System Development and Trends of Evolution	245
TRIZ Trends for Finding Future Systems	245
Perfecting Products	247
Origin of the TRIZ Trends of Evolution	248
TRIZ Trends and Lines of Evolution	249
Trends = Patterns = Laws of Evolution	249
Why Are They Useful?	250
Evolution – Including Technical	250
Successful Products Meet Needs	251
Using the Trends for Practical Problem Solving	251
The 8 Trends Map Natural Progression and Development	253
1. Ideality is the Most Fundamental of the 8 TRIZ Trends of Evolution	254
2. The Power of S-Curves	259
3. Less Human Involvement	263
4. Non-Uniform Development of Parts	266
5. Simplicity – Complication – Simplicity	268
6. Increasing Dynamism, Flexibility and Controllability	274
7. Increasing Segmentation and Increased Use of Fields	277
8. Matching and Mismatching of Parts	279
Ideality is Increased by Moving towards the Ideal Along Any or All of the TRIZ Trends	283

Chapter 10: Inventing with TRIZ.....284
How to Be a Great but Mundane Inventor with TRIZ.....290
TRIZ and Invention292
Product DNA Predicts Future Systems294
Development of the Breathalyzer295
TRIZ for Invention296
Interesting Gaps Between Inspirational Ideas and Scientific Proofs.....298
TRIZ and All Routes to Invention – Creating Systems.....300
TRIZ Helps with All the Major Routes to Invention.....301
 1. Meet Needs in New Ways with New and Old Systems302
 2. Find New Uses for New and Old Systems, Technologies, Functions.....305
Systematic Routes to Invention306
 Ariadne’s Thread – Don’t Lose the Way!.....306
 Capture Solutions – Top-of-the-Head Ideas.....306
 Flowcharts for Invention306
Corporate Innovation and Invention is Poorly Rewarded308

PART FIVE – TRIZ for System Analysis and Improvement

Chapter 11: Function Analysis for System Understanding.....311
Function Analysis and Maps for Problem Understanding312
 Why Draw Function Maps?312
Why Use TRIZ Function Analysis?.....313
What Can TRIZ Function Analysis Reveal at a Glance?.....313
Basic Building Blocks for Problem Solving – Defining Ideality314
 Don’t Miss Out or Skip the Ideality Audit315
For Problem Solving We Need Both the Ideality Audit and the Function Analysis.....315
Function Analysis of the Current System (System We’ve Got)316
 Step-by-Step Function Analysis – Drawing a TRIZ Function Map316
 Function Map – All the *Subject action Objects* together317
Function Analysis for Understanding and Solving Simple Problems317
Systems Develop to Deliver Benefits Better – Perfecting Functions to Deliver
Those Benefits.....319
Systems Develop in Response to Changing Needs.....320
Simple Rules of Function Analysis322
 Finding Your S-a-O is Not Always Easy322
 Systems Are Made Up of S-a-Os.....323
 Defining the Action Takes Careful Thought324
Function Maps Contain All the System and Relevant Environmental Elements324
 System Development Through Extra Functions325
Problem Solving from the Function Analysis Problem List.....326
Oxford Standard Solutions for Solving Problems Mapped in Function Analysis.....326
 Insufficiencies → 35 Standard Solutions for Improving a Function.....327
 Detection and Measurement → 17 Solutions328
 Harmful Actions → 24 Standard Solutions for Overcoming Harm.....329
Function Analysis at Every Stage and for Every Kind of Difficult Problem.....334
 Using Function Analysis on Real and Difficult Problems.....335
Function Analysis Identifies All Significant Problems336
 System Analysis and Function Analysis336
 Simple Answers to Simple Questions336

Example of Function Analysis of a Single Item – a Coffee Cup337

 1. Ideality Audit.....338

 2. Function List of all Components and Their Interactions338

Function Analysis For Locating and Dealing with the Causes of Problems –

Roadside Bombs343

 Problem of Detecting Roadside Bombs.....343

 Detecting Bombs in Time and Scale.....343

 Causes of ‘Successful’ Roadside Bombs344

 Successful Outcome from the Bomber’s Perspective344

 Outcome from the Bombee/Victim’s Perspective345

 Finding Solutions to Roadside Bombs.....346

 Some Suggested Solutions346

Conclusion347

Case study: Improving the Opening of the Bitesize Pouch at Mars.....348

Mars Enjoys Immediate Success of New Pouch Packaging Concept348

The Pouch Problem.....348

Solving the Pouch Problem with TRIZ350

 Finding Solution Concepts with TRIZ.....351

 Industrialization of the Concepts353

The Winning Idea and the Validation.....355

Patenting the Idea356

The Future.....357

Conclusion357

Appendix 11.1 – Oxford Standard Solutions These are the Traditional TRIZ 76 Standard

Solutions Re-Arranged into Three Categories358

Chapter 12: Classical TRIZ: Substance-Field Analysis and ARIZ375

ARIZ and Substance–Fields in Altshuller’s Development of TRIZ Tools.....376

Substance–Field Analysis376

Building Substance–Field Models.....377

 Four Basic Substance-Field Model Types.....379

76 Standard Solutions and Accessing Them with Substance–Field Models380

 Class 1: Building and Destruction of Substance–Field Models.....380

 Class 2: Development of Substance–Field Models381

 Class 3: Transition to Super-system and Micro Level.....381

 Class 4: Standards for Detection and Measuring381

 Class 5: Standards on Application of Standards.....381

Simple Steps for Applying Substance–Field Model Analysis to Problems.....382

 Simple Example of Substance–Field Analysis Using the Standard Solutions.....383

ARIZ – An Algorithm for Inventive Problem Solving384

 Using ARIZ on Challenging Problems384

Overall Structure of the ARIZ Algorithm385

 Step 1 ARIZ – Problem Definition385

 Step 2 ARIZ – Uncovering of System Contradictions388

 Step 3 ARIZ – Analysis of System Contradictions and Formulation of Mini-Problem391

 Step 4 ARIZ – Analysis of Resources392

 Step 5 ARIZ – Development of Conceptual Solutions.....393

ARIZ Summary393

Using ARIZ to Solve a Problem with Coal Blocking a Pipe394

 Step 1 ARIZ – Problem Definition395

 Step 2 ARIZ – Uncovering of System Contradictions396

Contents

Step 3 ARIZ – Analysis of Contradictions and Formulation of Mini-Problem396

Step 4 ARIZ – Search for Available Resources to Provide X-Factor.....399

Step 5 ARIZ – Development of Conceptual Solutions.....400

ARIZ on Coal Problem – Selecting a Resource402

Frame an Ideal Outcome/IFR of X-Factor.....402

Conclusion403

Appendix 12.1 – Traditional TRIZ 76 Standard Solutions.....405

PART SIX – How to Problem Solve with TRIZ – the Problem Solving Maps

Chapter 13: TRIZ Problem-solving Maps and Algorithms.....421

TRIZ for the Right Functions at the Right Time in the Right Places421

Where Do We Start with TRIZ? Which Tools When?.....422

TRIZ is Immediately Useful but Understanding Takes Time and Practice.....425

Two Fundamental Areas in Practical Technical Problem Solving427

 New Systems – Invention and Next Generation Systems428

 Improving Systems Delivering More Benefits, Reducing Inputs and Dealing
 with Any Problems429

 Ideality Tactics – Improve Outcomes, Reduce Harms and Reduce Costs429

Problem Understanding and Solving Routes and Applying the Ideality Tactics.....430

 Problem Understanding Steps430

 Applying the Ideality Tactics436

Case Study: BAE Systems ‘SRES’ Ducting Design.....451

Problem Context451

System Modelling and Analysis453

 Uncovering and Solving Physical and Technical Contradictions454

 Solutions – Physical Contradictions.....454

 Technical Contradictions456

 Applying the Standard Solutions for Dealing with Harm in Problem Solving461

 Apply Standard Solutions for Insufficiency (35 Ways)463

Final Solution.....465

Summary and Conclusions467

Benefits of TRIZ to the BAE Systems Team467

Appendix I: 39 Parameters of the Contradiction Matrix468

Appendix II: Contradiction Matrix471

Glossary473

Index479
