1	Introduction	7
2	Description and systematics	9
2.1	Nomenclature	9
2.2	Colouration, pattern and scalation.	9
2.3	Morphometric data.	14
2.4	Systematics and phylogeny	15
3	Distribution	38
3.1	General distribution	38
3.2	Distribution in Eurasia	39
3.3	Distribution in Great Britain.	48
4	The habitats	50
4.1	General habitat requirements	51
4.2	Basking sites.	54
4.3	Shelters and retreats	58
4.4	Egg-laying sites and winter quarters	59
4.5	Vegetation and habitat types	59
5	Lizards as predators and prey	62
5.1	Diet of sand lizards	62
5.1.1	Prey acquisition and hunting methods.	62
5.1.2	Prey spectrum and size.	63
5.1.3	Food quantity.	67
5.1.4	Water absorption	68
5.2	Adversities: predators, parasites and injuries	68
5.2.1	The anti-predatory strategy of the sand lizard	68
5.2.2	Autotomy.	69
5.2.3	Predators	71
5.2.4	Miscellaneous injuries.	72
5.2.5	Parasite infestations	73
6	Activity patterns and phenology	75
6.1	Thermoregulation	75
6.2	Detectability and activity.	77
6.3	Daily activity	79
6.4	Phenology	81
6.5	Hibernation	82
7	Reproduction	90
7.1	The mating period	90
7.1.1	Period of matings.	90

7.1.2	Male-male interactions	90
7.1.3	Mating behaviour	92
7.2	Sexual maturity and reproductive cost	94
7.2.1	Sexual maturity and participation in the reproduction	94
7.2.2	Reproductive cost and clutch sizes	96
7.3	From oviposition to hatching	98
7.3.1	Timing of oviposition.	98
7.3.2	Oviposition and parental care	98
7.3.3	Location and structure of oviposition sites	100
7.3.4	Incubation and hatching	102
8	Space utilisation.	105
8.1	Strategies of space utilisation	105
8.2	Home ranges of sand lizards.	109
8.3	Migration and dispersal potential.	115
9	The populations.	122
9.1	Age groups and growth rates	122
9.2	Life expectancy and mortality rates	124
9.3	Population structure	124
9.4	Population sizes and densities	127
9.5	Dispersal	131
9.6	Minimum habitat areas	132
10	Threats.	135
10.1	Status and Red Lists	135
10.2	Causes of decline	136
10.2.1	Loss of habitats	136
10.2.2	Isolation of habitats and inbreeding	138
10.2.3	Manipulation of populations.	140
10.2.4	Management and planning	141
10.2.5	Acoustic barriers	146
11	Conservation	149
11.1	General conservation and legislative protection	149
11.2	The sand lizard as an indicator and umbrella species	152
11.3	Habitat management	154
11.4	Creation, enhancement and connection of habitats	158
11.5	Mitigation measures	160
11.5.1	Legal requirements and avoiding harm in project planning.	160
11.5.2	Conservation of retained habitats with animals for recolonisation	162
11.5.3	Mitigation translocations.	164
11.6	Captive breeding and conservation translocation	174
12	References	176
