

CONTENTS

1	Introduction	5
2	Theoretical Basis	6
2.1	Scientific Field Development	6
2.2	State of Art	6
3	Objectives of This Work	7
4	Analysis of the Field Emission Emitter Behavior	8
4.1	Characteristics of Material Parameters	8
4.2	Electron Emitters Based on Field Emission	8
5	Experimental Results	11
5.1	Preparation Method	11
5.2	Automated Etching System	13
5.3	Characterization of the Prepared Field Emitter	15
5.3.1	Characterization of the Epoxy Coating	16
5.4	Measurement Setup for Emission Properties	17
5.5	Fowler-Nordheim Analysis	18
5.6	Band Diagram of the Sample Cathode	19
5.7	Finite Element Modelling using Comsol	22
5.8	Results of the Noise Analysis	24
6	Conclusions and Contributions of the Work	25
	Bibliography	27
