

Contents

Chapter 1	Flow patterns	1
1.1	Single phase	1
1.2	Multi phase	69
1.2.1	Solid-liquid systems	69
1.2.2	Gas-liquid systems	75
Chapter 2	Mixing time	85
2.1	Single phases	85
2.2	Multi phases	104
2.2.1	Solid-liquid systems	104
2.2.2	Gas-liquid systems	107
Chapter 3	Power draw and consumption	117
3.1	Single phase	117
3.2	Multi phase	197
3.2.1	Solid-liquid systems	197
3.2.2	Gas-liquid systems	199
3.2.3	Solid-liquid-gas systems	233
Chapter 4	Heat transfer	239
4.1	Single phase	239
4.2	Multi phase	278
4.2.1	Solid-liquid systems	278
4.2.2	Gas-liquid systems	284
4.2.3	Solid-liquid-gas systems	299
Chapter 5	Mass transfer	305
5.1	Solid-liquid systems	305
5.2	Liquid-liquid systems	319
5.3	Gas-liquid systems	332
5.4	Solid-liquid-gas systems	428
5.5	Mass transfer to free interface	456
Chapter 6	Scale-up rules	469
6.1	Single phase	469
6.2	Multi phase	479
6.2.1	Solid-liquid systems	479
6.2.2	Liquid-liquid systems	493
6.2.3	Gas-liquid systems	504
6.2.4	Solid-liquid-gas systems	509
Chapter 7	Other subjects related to multi-phase systems	513
7.1	Flooding	513
7.2	Hold-up	527
7.2.1	Liquid-liquid systems	527
7.2.2	Gas-liquid systems	531
7.2.3	Solid-liquid-gas systems	565
7.3	Critical agitation speed	569
7.3.1	Solid-liquid systems	569
7.3.2	Liquid-liquid systems	598
7.3.3	Gas-liquid systems	615
7.3.4	Solid-liquid-gas systems	616
7.4	Size and its distribution of dispersed phase	623
7.4.1	Drop size and drop-size distributions	623
7.4.2	Bubble size and bubble-size distributions	692
7.5	Breakage and coalescence	703
Chapter 8	Gas-inducing mechanically agitated systems	733
