

Three Dimensional CFD Model of a Single Rising Bubble in Stagnant Liquids <i>Ing. Jakub Crha</i>	7
Multiphase Flow of Taylor Bubbles in Rectangular Microchannels <i>Ing. Dominik Regner</i>	9
Application of Hydrodynamic Cavitation in Brewing <i>Ing. Jiří Štěrba</i>	11
Solvent Assisted 2D Mesoporous g-C ₃ N ₄ Modification for Catalytic Application <i>Susmita Dolai</i>	12
Modular Synthesis of Dendritic Amphiphiles <i>Ing. Antonín Edr</i>	14
Deoxyfluorinated N-acetyllactosamines as Tailored Carbohydrate-based Probes for Human Galectins <i>Ing. Martin Kurfiřt</i>	16
Synthesis and Cytotoxicity of Fluorinated Amino Saccharides <i>Ing. et Ing. Vojtěch Hamala</i>	18
Supercritical Impregnation of Natural Extracts in Polymer <i>Anežka Komárková</i>	20
Selective Enzymatic Hydrolysis of Triglycerides in Supercritical Carbon Dioxide in Continuous-Flow Packed-Bed Reactor <i>Ing. Ondřej Pleskač</i>	22
Ionanofluids Prepared from a Series of Ionic Liquids: Preparation, Heat Capacity Measurement and Advanced Data Analysis by Mathematical Gnostics <i>Nirmal Parmar, MSc</i>	24
NMR Metabolomics in Toxicology: Effect of NPs Inhalation on Blood Plasma and Exhaled Breath Condensate Profiles <i>Lenka Michálková MSc.</i>	26
Electrochemical Investigation of Ureido-Sulfonamidic Receptors, Supramolecular Structures for Binding Phosphates <i>Ing. Karolína Salvadori</i>	28
Ambient Organic Aerosol Origin at Rural Background Site in the Czech Republic <i>Mgr. Radek Lhotka</i>	30

The Influence of Air Humidity on the Optical Properties of Aerosol Particles	
<i>Mgr. Lenka Suchánková</i>	32
New Perspectives for Sewage Sludge Treatment	
<i>Matěj Hušek</i>	34
Optimization of Acid Extraction and Recovery of Metals from Municipal Solid Waste Incineration Fly Ash	
<i>Ing. Mgr. Ekaterina Korotenko</i>	36
Efficiency of Mercury Vapour Removal from Model Gases by Means of Sulfur Impregnated Sorbents	
<i>Ing. Tomáš Ružovič</i>	38
Material Flow Analysis of Textile Waste: A Case Study of the Czech Republic	
<i>Ing. Anastasia Shtukaturova</i>	40
High Temperature Removal of Halogenated Compounds from Pyrolysis of Waste Plastic Polymers	
<i>Ing. Vít Šrámek</i>	42
Electrocoagulation of Microalga <i>Chlorella vulgaris</i> in Laboratory and Bench Scale	
<i>Ing. Simona Lucáková</i>	44
Removal of Contaminants from Water	
<i>Ing. Markéta Spáčilová</i>	46
Separation of Racemic D,L-Tryptophan Using Chiral Membranes	
<i>Ing. Jan Čížek</i>	48
Catalytic Wet Air Oxidation of Antibiotics over Supported Platinum on Different Supports Fractions Based CeO ₂ and ZrO ₂	
<i>Mahdi Bourassi</i>	50
