Contributors	vi
Preface	x
Acknowledgments	xi
SECTION I. Introduction	1
1 Preliminary Evaluation	2
2 Optical Considerations in Contact Lens Practice	36
SECTION II. Gas-Permeable Lenses	69
3 Corneal Topography	70
4 Material Selection	108
5 Gas-Permeable Lens Design, Fitting, and Evaluation	134
6 Gas-Permeable Lens Care and Patient Education	186
7 Verification	223
8 Gas-Permeable Lens Problem-Solving	238
9 Modification of Gas-Permeable Corneal and Scleral Lenses	266
SECTION III. Soft Lenses	287
10 Soft Material Selection (Hydrogel and Silicone Hydrogel)	288
11 Soft Contact Lens Fitting and Evaluation	311
12 Soft Lens Care and Patient Education	330
13 Soft Lens Problem-Solving	355
SECTION IV. Challenging Cases	387
14 Correction of Astigmatism	388
15 Multifocal Contact Lenses	440

16	Overnight Contact Lens Wear	492
17	Pediatric Contact Lens Fitting	531
18	Keratoconus	558
19	Postsurgical Contact Lens Fitting	644
20	Scleral Lenses	685
21	Myopia Control	732
22	Orthokeratology	742
23	Prosthetic Contact Lenses	769
24	Management of Contact Lens–Associated or Lens–Induced Pathology	787
25	Contact Lens Practice Management	808
26	Specialty Contact Lens Coding and Billing	833
