It is especially in deriving the normative nature of current (democratic) political regimes where we encounter the need for a more fundamental theoretical argument that would enable us to respond to their dynamic, often contradictory development. Productivity of this effort is enhanced by the situational framework of quite specific conditions, within which and through which solutions to various problems of a political, economic and legal nature are specified, including the variable classification of historical experience.

Within addressing the tasks of the VEGA 1/0129/18 scientific grant, the topic of *Open Society-a Political Project of the Modern World or a Productive Metaphor in the Intellectual Tradition of the Search for a Better Human and the World?* offered for the authors of the presented
