Color Plate Legends ix

Foreword by Gerard J. Demaison xiii

Preface xv

Abbreviations xvii

PART I Introduction 1

1 The Development of Petroleum Geochemistry 2

Petroleum Generative
Depressions 5

2 Carbon and the Origin of Life 10

The Primitive Earth 11

Primitive Life 13

Petroleum Potential of
Precambrian Rocks 16
Inventory of Carbon in
Sedimentary Rocks 18

3 Petroleum and Its Products 23

Molecular Size Variation 24

Molecular Type Variation 25

The Composition and Uses of
Petroleum 33

Stable Isotopes 53

PART 2 Origin and Migration 59

4 How Oil Forms: Natural Hydrocarbons 60

The Composition of Living
Organisms 62

The Biological Markers 64

Odd-Even Periodicity in Straight-
Chain Hydrocarbons 65

Chlorophyll 80

The C₅-C₄₅ Acyclic Isoprenoids 81

Terpenoids: The Cyclic
Isoprenoids 84

Steroids, C₁₉-C₃₀ 99

Distribution of Biomarkers 106

5 How Oil Forms: Generated Hydrocarbons 111

- Diagenesis of Organic Matter 112
- Catagenesis of Organic Matter 127
- Metagenesis and Metamorphism 137
- Distribution of Hydrocarbons in Fine-Grained Rocks 137

6 Modeling Petroleum Generation 141

- Determining Kinetic Parameters for Oil Generation 144
- Variations in Kinetic Parameters with Kerogen Type 146
- A Graphical Method for Modeling the Oil and Gas Windows 150
- Case Studies 157
- Comments on Using TTI_{ARR} Graphs 175

7 The Origin of Natural Gas 185

- Sources of Natural Gases 186
- Bacterial Source 188
- Kerogen Source 203
- Coal Source 210
- Oil Source 212
- Evaluation of Gas Source and Maturity 216
- Nonhydrocarbon Gases 221
- Gas Distribution in Basins 232

8 Migration and Accumulation 238

- Water 239
- Oil-field Waters 240
- Porosity of Shales 244
- Porosity of Carbonates and Evaporites 252
- Pore Diameters and Oil Expulsion 254

Mechanisms of Primary Migration 257

- Permeability of Source Rocks 268
- Mineralogy of Shale Source Rocks 269
- Secondary Migration 271
- Migration Pathways 273
- Petroleum Traps and Seals 277
- Direction and Distances of Secondary Migration 281

9 Abnormal Pressures 289

- Two Types of Overpressures 291
- Characteristics of Pressure Compartments 294
- Case Studies: Underpressures 296
- Case Studies: Overpressures 298
- Fluid Compartment Seals 309
- Petroleum Source Rocks in Fluid Compartments 310
- Processes Generating Deep Overpressures 312

PART 3 Habitat 321

10 The Source Rock 322

- Quantity of Organic Matter 323
- Quality of Organic Matter 329
- Maturation of Organic Matter 332
- Pyrolysis 340
- Other Maturation Indicators 358
- Vitrinite Reflectance (% R_o) 365
- Biomarker Maturation Indicators 380

11 Coals, Oil Shales, and Other Terrestrial Source Rocks 395

- Gas from Coal 396
- Oil from Coals and Coaly Shales 397

Oil Shales and Other Terrestrial Source Rocks	405	Correlating Heavy Oils and Asphalts	541
Absorption–Migration of Hydrocarbons from Coal and Terrestrial Kerogen	408	Correlation of Source Rocks and Crude Oils	545
12 Petroleum in the Reservoir	412	Biomarker Ratios for Correlation	550
Biodegradation and Water Washing	413	Correlations Using C ₇ Hydrocarbons	567
Thermal Alteration	423	Stable Isotope Ratios for Correlation	571
Phase Changes in Oil and Associated Gas	431	Correlating Reservoir Gases	584
Oil to Gas and Pyrobitumen	437	16 Prospect Evaluation	590
PART 4 Applications	447	The Petroleum System	592
13 Seeps and Surface Geochemical Exploration	448	Mass Balance	595
Seeps: Onshore	449	Hydrocarbon Accumulations on the Southern Norwegian Shelf: A Geochemical Model Study	604
Seeps: Offshore	455	Genetic Classification of Petroleum Systems	614
Surface Geochemical Exploration	461	Effective Petroleum Source Rocks of the World	620
14 A Geochemical Program for Petroleum Exploration	469	Appendix 1: Units of Measurement	627
Surface Reconnaissance	470	Appendix 2: Geologic Time Scale	630
Hydrocarbon Mud Logging	472	Glossary	633
Wireline Logs	478	References	642
Geochemical Logs	483	Name Index	709
Problems and Pitfalls	484	Subject Index	715
15 Crude Oil Correlation	520		
Correlating Oil Families	521		
Correlating Reservoir Oils	536
