

## **Content**

- Allocation of water loss to individual benefits provided by the Fláje reservoir - comparison of several procedures..... 9
- Safety of dams in crisis situations ..... 10
- Comparison of sorption efficiency of natural and MnO<sub>2</sub> coated zeolite for copper removal from model solutions . 11
- Use of geographic information systems in crisis management ..... 12
- Monitoring the impact of the Jeremenko pit on water quality in Ostravice ..... 14
- Handling of railway superstructure material at the end of the life cycle ..... 15
- Climate change, fires and their impact on safety ..... 16
- Technical condition of sewer networks in the Czech Republic ..... 17
- Screening of predominant microorganisms occurring on the concrete structures from selected locations..... 18
- Removal of selected pesticides from water using granular activated carbon..... 19
- The application of the latest territorial components for sustainable mobility in district cities ..... 21
- The use of glass waste cullet in the concrete production as an important factor in the circular economy ..... 22
- Surface treatments of recycled brick aggregate and their influence on selected properties of concrete ..... 23
- Use of vegetation for the removal of pollutants from wastewater as an alternative environmental technique for wastewater treatment..... 24

- The quality of bottom sediments in small water reservoirs located in agricultural watersheds ..... 25
- Assessment of environmental impacts and costs during life cycle stages of selected family houses ..... 26
- Comparison of standard methods for determining the color of water in several countries..... 27
- Fungicidal effects on cement composites with recycled glass from photovoltaic panels..... 28
- Identity, urbanity and division of housing estates in the Czech Republic ..... 29
- The impact of Covid-19 pandemic on water supplies and wastewater sewer system ..... 30
- Algae as a part of microorganisms involved in biocorrosion of cement composites with total replacement of natural aggregates by photovoltaic glass..... 31
- Review of the use of waste tires in concrete ..... 32
- Waste production and waste management in the EU ..... 33
- Intelligent and efficient parking solutions..... 34
- Monitoring the effectiveness of selected sorption materials in removing diclofenac from water ..... 35
- Enzyme production by soilborne fungal strains of *Aspergillus niger* isolated from different localities affected by mining ..... 36
- Contamination of the Burňa watercourse, by a dumps complex..... 37
- Intensification of water management during climate change ..... 38

- Wastewater recycling and the possibility of its technical use in practice ..... 39
- Environmental urbanism and sustainable cities ..... 40
- Treatment and utilization of artificial aggregate in the production of cement composites..... 41
- Water network functional analysis ..... 43
- European Green Deal as a matter of security ..... 44
- Condition of urban park infrastructure in the context of perceived security of park users ..... 45
- Analysis of CAFM software for construction companies in the Czech..... 46
- Microsimulation of pedestrian conflict with other transport modes ..... 47
- Change in dissolved oxygen concentrations during aeration and mixing using a combined system..... 48
- Radon monitoring in a historical building in Košice city, Slovakia – a case study..... 49
- Methodological development for teaching environmental management within the framework of the university research and teaching project in the Central of Heredia (March to September 2020), Costa Rica. A preliminary study ..... 50
- Changes in thermal stability of lignocelluloses waste aggregates long-term incorporated in composite ..... 51
- Revitalization of public space along the river Ostravice in the part of Ostrava ..... 52
- Soil contamination in the area of magnesite mining in urban and agrarian land ..... 53

- 
- The importance of innovation in terms of a sustainable entrepreneurship in environment..... 54
- Effective combination of management methods suppresses invasive Jerusalem artichoke..... 55
- Biosorption of chromium by dry algae *Chlorella kessleri* 56
- Evaluation of urban water networks - Case study..... 57
- Bioaccumulation of toxic metals by fungi of the genus *Aspergillus* isolated from the contaminated area of Ostramo Lagoons ..... 58
