LIST OF CONTRIBUTORS	v
CONTENTS OF PREVIOUS VOLUMES	xi

Synchronous Cell Differentiation

GEORGE M. PADILLA AND IVAN L. CAMERON

I. Introduction	1
II. Bacterial Systems	3
III. Fungal Systems	7
IV. Protistan Systems	15
V. Metazoan Cells	22
VI. Concluding Remarks	22
References	23

Mast Cells in the Nervous System

YNGVE OLSSON

I. Introduction	27
II. Mast Cells in the Central Nervous System	28
III. Mast Cells in the Peripheral Somatic Nervous System	32
IV. Mast Cells in the Peripheral Autonomous Nervous System	61
V. Concluding Remarks	62
References	63

Developmental Phases in Intermitosis and the Preparation for Mitosis of Mammalian Cells *in Vitro*

BLAGOJE A. NEŠKOVIĆ

I. Introduction	71
II. Methodological Problems of Synchronization	72
III. Phases of Intermitosis	73
IV. Functional Changes in Intermitosis	74
V. Morphological Changes during Intermitosis	77
VI. Some Results of Analyses of Intermitosis Applying the Concepts of Developmental Phases	84
References	96

Antimitotic Substances

GUY DEYSSON

I.	Introduction	99
II.	Methodology and Experimental Material	100
III.	Some Generalities about Antimitotic Substances	103
IV.	Spindle Poisons (Mitoclastic Agents)	105
V.	Chromosome Poisons (Chromatoclastic Agents)	121
VI.	Other Kinds of Antimitotic Action	138
VII.	Conclusions	140
	References	143

The Form and Function of the Sieve Tube: A Problem in Reconciliation

P. E. WEATHERLEY AND R. P. C. JOHNSON

I.	Introduction	149
II.	The Structure of the Sieve Tube	152
III.	Hypothetical Mechanisms in Relation to the Structure of the Sieve Tube and the Rate of Transport	171
IV.	The Physiology of Translocation	182
V.	Conclusions	187
	References	189

Analysis of Antibody Staining Patterns Obtained with Striated Myofibrils in Fluorescence Microscopy and Electron Microscopy

FRANK A. PEPE

I.	Introduction	193
II.	The Use of Antibodies for the Study of the Striated Myofibril	194
III.	General Considerations for the Interpretation of Antibody Staining Patterns	208
IV.	Analysis of Antibody Staining Patterns in Terms of Distribution, Organization, and Interaction of Protein Molecules in the Myofibril	215
	References	228

Cytology of Intestinal Epithelial Cells

PETER G. TONER

I.	General	233
II.	Epithelial Structure and Function	236

III. Cytopathology	307
IV. Conclusion	323
References	324

Liquid Junction Potentials and Their Effect on Potential Measurements in Biological Systems

P. C. CALDWELL

I. Introduction	345
II. Theoretical Treatment of Junction Potentials	347
III. Tests of Theories of Liquid Junction Potentials	352
IV. The Effects of Liquid Junction Potentials in Measurements of Resting Potentials in Nerve and Muscle	357
V. The Tip Potential of the Ling and Gerard Microcapillary Electrode	366
VI. Conclusion	368
References	370
 AUTHOR INDEX	 373
 SUBJECT INDEX	 396
