Gram Staining and Its Molecular Mechanism

B. B. BISWAS, P. S. BASU, AND M. K. PAL

I. Introduction	1
II. Literature Review	2
III. A Proposed Mechanism for Gram Staining	16
IV. Conclusion	23
References	23

The Surface Coats of Animal Cells

A. MARTÍNEZ-PALOMO

I. Introduction	29
II. Electron Microscope Histochemical Methods Used for the Demonstration of Surface Coats	30
III. Cell Coats	37
IV. Basal Laminas	59
V. External Laminas	67
VI. Conclusions	67
References	68
Supplemental References Added in Proof	74

Carbohydrates in Cell Surfaces

RICHARD J. WINZLER

I. Introduction	77
II. Architecture of the Plasma Membrane	78
III. Microscopic Demonstration of Cell Surface Carbohydrates	83
IV. Carbohydrate Content of Plasma Membranes	84
V. Nature of Carbohydrate-Containing Components of Plasma Membranes	86
VI. Modification of Cell Surfaces with Enzymes	91
VII. Cell Agglutinins	94
VIII. Surface Antigens	97

IX.	Cell-Cell Recognition	103
X.	Contact Inhibition and Malignant Transformation.....	107
XI.	Biosynthesis of Carbohydrate-Containing Cell Membrane Components	109
XII.	Some Conclusions and Speculations	112
	References	114

Differential Gene Activation in Isolated Chromosomes

MARKUS LEZZI

I.	Introduction	127
II.	Isolated Interphase Chromosomes—The System	128
III.	Structural Aspects of Interphase Chromosomes	132
IV.	Chemical Composition of Interphase Chromosomes	133
V.	The Role of Different Chromosomal Components in Gene Activation and Gene Activity	134
VI.	Differential Gene Activation in Isolated Chromosomes—The Experiment.....	151
VII.	Biological Significance of the Ionic Effects on Chromosomal Template Activity	157
VIII.	Conclusion and Extrapolation	161
	References	162
	Note added in proof	167

Intraribosomal Environment of the Nascent Peptide Chain

HIDEKO KAJI

I.	Introduction	169
II.	Ribosomes.....	169
III.	Steps in Protein Synthesis	180
IV.	Summary	201
	References	202

Location and Measurement of Enzymes in Single Cells by Isotopic Methods

Part I. Principles and Light Microscope Applications

E. A. BARNARD

I.	Enzymes and the Single Cell	213
II.	Principles of the Labeled Inhibitor Method	215
III.	The Application of Radioautography	219
IV.	Applications to Specific Enzymes	224
V.	Validation of Radioautographic Measurements by Other Techniques	237
VI.	Advantages and Limitations of the Labeled Inhibitor Approach	239
	References	242

Location and Measurement of Enzymes in Single Cells by Isotopic Methods

Part II. Application to Electron Microscopy

G. C. BUDD

I.	Introduction	245
II.	Electron Microscope Radioautography	246
III.	Application to Specific Enzymes	250
	References	262

Neuronal and Glial Perikarya Preparations: An Appraisal of Present Methods

PATRICIA V. JOHNSTON AND BETTY I. ROOTS

I.	Introduction	265
II.	The Preparation of Neuronal and/or Glial Suspensions	267
III.	Isolation of Cell Types from Suspensions	268
IV.	Assessment of Purity of Fractions	269
V.	The Question of Cellular Integrity	271
VI.	The Future of Research on Isolated Neuronal and Glial Perikarya	276
	References	279

Functional Electron Microscopy of the Hypothalamic Median Eminence

HIDESHI KOBAYASHI, TOKUZO MATSUI, AND SUSUMU ISHII

I.	Introduction	282
II.	Methodological Considerations	285
III.	Anatomical Considerations Regarding the Median Eminence	286
IV.	Electron Microscopy of the Median Eminence	299
V.	Multiplicity of Granules in the Axons of the Median Eminence	321
VI.	Biologically Active Substances in the Median Eminence	325
VII.	Nature of the Granules or Vesicles in Median Eminence	331
VIII.	Functional Significance of the Biological Active Substances in the Median Eminence	342
IX.	Function of the Ependymal Cells of the Median Eminence	349
X.	Enzymes in the Median Eminence	361
XI.	Conclusions	371
	References	373

Early Development in Callus Cultures

MICHAEL M. YEOMAN

I. Introduction	383
II. Origin of the Callus	383
III. Induction of Growth	384
IV. Pattern of Growth	388
V. Concluding Remarks	406
References	406
