CONTRIBUTORS TO VOLUME III.....	v
---------------------------------	---

Comparative Biochemistry and Virology

BY SEYMOUR S. COHEN

Children's Hospital of Philadelphia (Department of Pediatrics), and Department of Physiological Chemistry, University of Pennsylvania, School of Medicine, Philadelphia, Pennsylvania

I. Introduction.....	1
II. On Biochemical Variability.....	2
III. Parasitic Patterns in Virus-Infected Cells.....	8
IV. The Form and Composition of the Viruses.....	11
V. On the Fine Structure of Viral Constituents.....	22
VI. The Metabolic Equipment of the Viruses.....	29
VII. Some Relations of Virus Structure and Enzyme Content to Virus Entrance and Release.....	32
VIII. On the Metabolic Consequence of a New Building Block: 5-(Hydroxymethyl)cytosine in the T-even Phages.....	35
IX. Conclusion.....	43
References.....	43

The Chemotherapy of Viruses

BY R. E. F. MATTHEWS AND J. D. SMITH

Virus Research Unit, Agricultural Research Council, Molteno Institute, Cambridge, England

I. Introduction.....	51
II. Methods of Testing Compounds for Virus Inhibition.....	52
III. Structure and Multiplication of Viruses in Relation to Chemotherapy..	61
IV. Effects of Purine and Pyrimidine Analogues on Viruses.....	74
V. Virus Inhibition by Other Types of Compounds.....	108
VI. Incorporation Phenomena in Relation to Antimetabolite Action.....	137
VII. General Discussion.....	140
References.....	142

Tumor Viruses

BY J. W. BEARD, D. G. SHARP, AND EDWARD A. ECKERT

Department of Surgery, Duke University School of Medicine, Durham, North Carolina

I. Introduction.....	149
II. Rabbit Papillomatosis and Avian Leukosis.....	151
III. Purification.....	155
IV. Physical and Chemical Properties.....	158
V. Virus Infectivity and Host Response.....	173

VI. Conclusion.....	191
References.....	193

Morphology and Development of Insect Viruses

BY KENNETH M. SMITH

*Virus Research Unit, Agricultural Research Council, Molteno Institute,
Cambridge, England*

I. Introduction.....	199
II. The Polyhedral Viruses: Nuclear Type.....	200
III. The Polyhedral Viruses: Cytoplasmic Type.....	205
IV. The Granuloses or Capsular Diseases.....	207
V. Viruses without Intracellular Inclusions.....	210
VI. Apparent Viruses, Insufficiently Studied.....	211
VII. Development of Insect Viruses.....	214
References.....	219

Multiplication of Plant Viruses in Insect Vectors

BY KARL MARAMOROSCH

The Rockefeller Institute for Medical Research, New York, New York

I. Introduction.....	221
II. Rice Stunt Virus.....	223
III. Aster Yellows Virus.....	225
IV. Clover Club Leaf Virus.....	233
V. Wound Tumor Virus.....	235
VI. Corn Stunt Virus.....	237
VII. Curly Top Virus.....	238
VIII. Possible Multiplication in Nonvector Species of Leafhoppers.....	241
IX. Possible Multiplication in Other Groups of Arthropod Vectors.....	243
X. Conclusions.....	245
References.....	248

Cross Protection Between Strains of Yellows-type Viruses

BY L. O. KUNKEL

The Rockefeller Institute for Medical Research, New York, New York

I. Introduction.....	251
II. Identification of California Aster Yellows.....	254
III. Cross Protection Experiments with <i>Vinca rosea</i> Plants.....	262
IV. Cross Protection in Leafhoppers.....	263
V. Discussion.....	269
VI. Summary.....	272
References.....	272

Current Status of Bacterial Transformations

BY HARRIETT EPHRUSSI-TAYLOR

*Laboratoire de Génétique de la Faculté des Sciences, Paris, France, et du
Centre Nationale de la Recherche Scientifique*

I. Introduction.....	275
II. General Biological Description of Transformation.....	276
III. Chemical and Physical Properties of Transforming Agents.....	278
IV. Mechanism of Transformation.....	282
V. Genetic Recombination between Transforming Factors.....	293

References.....	307
AUTHOR INDEX.....	309
SUBJECT INDEX.....	319
CONTENTS OF VOLUMES I-II.....	339
