CONTRIBUTORS TO VOLUME I.....	v
PREFACE.....	vii

The Properties of Bacteriophages

BY HERMAN T. EPSTEIN

Department of Biophysics, University of Pittsburgh, Pittsburgh, Pennsylvania

I. Introduction.....	1
II. Some Basic Biological Information about Phages.....	3
III. Biophysical Properties.....	6
IV. Biochemistry of the Phages.....	10
V. Genetics.....	17
VI. The Life Cycle of a Phage.....	20
VII. Further Aspects of Phage Multiplication.....	32
References.....	35

Interactions between Viruses and Virus Strains

BY C. W. BENNETT

Bureau of Plant Industry, Soils, and Agricultural Engineering, U.S. Department of Agriculture, Riverside, California

I. Interactions between Unrelated Viruses.....	40
II. Interactions between Virus Strains.....	44
References.....	65

Transmission of Plant Viruses by Cicadellids

BY L. M. BLACK

Brooklyn Botanic Garden, Brooklyn, New York

Introduction.....	69
Latent or Incubation Period in the Vector.....	71
Transmission without Evidence of Virus Multiplication in the Vector.....	72
Transmission with Evidence of Virus Multiplication in the Vector.....	72
Common Relationships between Virus and Leafhopper Vector.....	75
Passage through the Vector Egg.....	76
Vector Range.....	76
Specialization of Virus Varieties in Relation to Vectors.....	77
Genetics of Vector Ability.....	78
Transmission Process.....	78
Effect of Virus on Vector.....	82
Transmission of More Than One Virus by a Vector.....	82
Independence of Each Inoculation by a Cicadellid.....	82
Plant Resistance to Inoculation by Cicadellids.....	83
Ecology of Transmission.....	83
Symptoms Ascribed to Insect Toxins.....	84
Conclusion.....	85
References.....	85

Insect Viruses

BY G. H. BERGOLD

Laboratory of Insect Pathology, Sault Ste. Marie, Ontario, Canada

I. Introduction.....	91
II. Pathology.....	92
III. Isolation of the Virus.....	95
IV. Inclusion Body Proteins.....	101
V. Viruses.....	106
VI. Relationship between Inclusion Body Protein, Virus, and Host.....	121
VII. Relationship between Virus and Host.....	123
VIII. Classification and Nomenclature of Insect Viruses.....	130
References.....	132

Multiplication of Influenza Virus in the Entodermal Cells of the Allantois of the Chick Embryo

BY WERNER HENLE

*Division of Virology, Department of Public Health and Preventive Medicine, School of
Medicine, University of Pennsylvania, and The Children's Hospital of Philadelphia,
Philadelphia, Pennsylvania*

I. Introduction.....	142
II. The Host.....	143
III. The Virus.....	146
IV. Experimental Data Contributing to the Understanding of Viral Multiplica- tion.....	164
V. Analysis of Various Phases of the Growth Cycle.....	195
VI. Concluding Remarks.....	221
References.....	223

Poliomyelitis

BY JOSEPH L. MELNICK

Yale University School of Medicine, New Haven, Connecticut

I. Immunologic Types of Poliomyelitis Virus.....	229
II. Poliomyelitis Viruses in Tissue Culture.....	231
III. Tissue-Culture Techniques in Poliomyelitis.....	237
IV. Cytopathogenic Agents Other Than Poliomyelitis Virus Isolated in Tissue Culture.....	239
V. Growth Curves of Poliomyelitis Virus.....	241
VI. Intracellular Localization of Poliomyelitis Virus.....	242
VII. Biosynthesis of Poliomyelitis Virus.....	245
VIII. Host-Virus Relationships in Poliomyelitis After Natural Routes of Infec- tion.....	248
IX. Cortisone Enhancement of Experimental Poliomyelitis.....	251
X. Antibodies and Immunity in Laboratory Animals.....	253
XI. Gamma Globulin as a Prophylactic Agent for Poliomyelitis in Man.....	254
XII. Serological Epidemiology of Poliomyelitis.....	257
XIII. Complement Fixation Test for Poliomyelitis Virus.....	264
XIV. Recent Work on Properties of the Virus.....	265
XV. Type 3 (Leon) Virus in Mice and Type 2 (MEF1) Virus in Chick Embryos.....	267
XVI. Poliomyelitis and Coxsackie (C) Viruses.....	269
References.....	270

Purification and Properties of Animal Viruses

BY D. GORDON SHARP

Biophysicist, Department of Surgery, Duke University School of Medicine and Duke Hospital, Durham, North Carolina

I. Introduction.....	277
II. Purification and Properties of Some Animal Viruses.....	280
III. Purification of Animal Viruses—General Methods.....	296
IV. Purity of Purified Virus.....	299
V. Properties of Purified Virus.....	303
VI. Visualization of Viruses.....	307
References.....	309

Virus Nucleic Acids

BY ROY MARKHAM

Agricultural Research Council, Plant Virus Research Unit, Molteno Institute, Cambridge, England

I. Introduction.....	315
II. Some of the Properties of the Nucleic Acids.....	317
III. The Composition of Virus Nucleic Acids.....	320
IV. The Nucleic Acids of the Bacteriophages.....	325
V. The Nucleic Acids of Animal Viruses.....	325
VI. The Linkage between the Virus Nucleic Acids and the Virus Proteins.....	326
VII. The Function of the Nucleic Acids in Viruses.....	329
References.....	331
Author Index.....	333
Subject Index.....	344
