

CONTENTS

CONTRIBUTORS TO VOLUME 10	v
-------------------------------------	---

Interferon

ALICK ISAACS

I. Introduction.	1
II. Production by Different Cells and Viruses	4
III. Properties	10
IV. Purification	14
V. Mode of Action	15
VI. Interferon and Recovery from Virus Infection	26
VII. The Role of Interferon in Normal Cells	33
VIII. Interferon as a Possible Therapeutic Agent	34
References	35

Mechanism of Recovery from Viral Infection

SAMUEL BARON

I. Introduction.	39
II. Role of Immune and Nonimmune Reactions in Resistance and Recovery.	40
III. Interferon and Nonspecific Reactions	46
IV. Role of Interferon in Naturally Occurring Infections	56
V. Conclusions	58
Addendum	58
References to Addendum	59
References	60

Biophysical Characterization of Bacteriophage Nucleic Acid

IRWIN J. BENDET

I. Introduction	65
II. Size, Shape, and Molecular Weight of the Nucleic Acid	68
III. Orientation of the Nucleic Acid within Bacteriophage.	89
IV. Conclusions	96
References	96

Virus Structure Revealed by Negative Staining

R. W. HORNE AND P. WILDY

I. Introduction	102
II. General Features of Virus Particles	103
III. Preparative Techniques for the Electron Microscope	109
IV. Virus Particles with Icosahedral Symmetry	123
V. Other Viruses Which Possibly Have Icosahedral Symmetry	135
VI. Viruses with Helical Symmetry	140

VII. Viruses with Other Structural Patterns	146
VIII. Viruses with No Evident Symmetry	155
IX. Quantitative Studies with Negative Staining	157
X. Interaction of Virus and Cells	160
XI. The Contribution Made by Negative Staining: Its Future.	162
References	165

Inactivation and Denaturation of Plant Viruses

W. C. PRICE

I. Introduction	171
II. Assay of Plant Viruses.	172
III. Denaturation by Heat.	173
IV. High Pressure	184
V. Supersonics	186
VI. Denaturation by Chemicals	188
VII. Ionizing and Nonionizing Radiation	200
VIII. Conclusions	213
References	214

Interactions of Viruses in Plants

B. KASSANIS

I. Introduction	219
II. Interactions Affecting Lesion Number (Initiation of Virus Infection).	220
III. Interactions Affecting Virus Concentration and Disease Development.	235
IV. Other Interactions.	243
V. Conclusion	250
References	253
