

## CONTENTS

<b>List of basic notations and symbols.....</b>	<b>6</b>
<b>1. Introduction to closed-loop control.....</b>	<b>12</b>
<b>2. Mathematical models of dynamic systems .....</b>	<b>19</b>
2.1 General mathematical models .....	19
2.2 Linear dynamic systems .....	22
<b>3. Mathematical models of linear dynamic systems .....</b>	<b>25</b>
3.1 Basic linear mathematical models .....	25
3.2 Linear dynamic system classification .....	37
3.3 Block diagram algebra.....	46
<b>4 Mathematical model simplification .....</b>	<b>57</b>
4.1 Linearization.....	57
4.2 Plant transfer function modification.....	62
<b>5 Closed-loop control systems .....</b>	<b>73</b>
5.1 Controllers.....	73
5.2 Stability .....	84
<b>6 Closed-loop control system synthesis.....</b>	<b>101</b>
6.1 Control performance.....	101
6.2 Controller tuning .....	110
6.3 Digital control.....	149
6.4 Cascade control .....	155
<b>7 State space control.....</b>	<b>168</b>
7.1 State space controller.....	168
7.2 State observer .....	175
<b>Appendix A – Laplace transform .....</b>	<b>184</b>
<b>References.....</b>	<b>203</b>
