

Contents

1 Introduction	1
The Basic Idea of Solar Geoengineering	5
Imagining Solar Geoengineering	7
Technoscience and the Sociotechnical	9
Historical Precursors	11
Knowledge-Power-Values	14
‘Official’ Assessments and Knowledge-Brokers	16
Outline of This Book	19
References	22
2 Geoengineering’s Past: From Mastery to Taboo	27
Geoengineering’s First Wave: Mastery	28
Geoengineering’s Hiatus	46
Why Attempts to Revive SGE Failed	55
Shifting Imaginaries of Climate, Nature and Globalisation	59
References	68
3 The Re-emergence of Solar Geoengineering	75
Climate Urgency and Emergency	76
Geoengineering’s Re-emergence	81

Respectable but Not Embraced	89
Rationales	96
Frames and Metaphors	100
Representations	105
An Inability to Normalise	108
References	112
4 Competing Imaginaries of Solar Geoengineering	123
Un-Natural: The Perils and Injustice of Geopiracy	124
Imperial: Acclimatising the World	129
Chemtrails: Secret Elites Poisoning the World	140
Convergences and Divergences in the Imaginaries	145
A Sociotechnical Imaginary Struggling to Be Born	151
The Imperial Imaginary's Quest for Legitimacy	154
References	156
5 Knowledge-Power-Values	163
Knowledge/s	164
Power	179
Values	194
References	202
6 Future Imaginings	213
The Climate of Power	214
A Technology of the Powerful	217
... And Also Disruptive	221
Attaching SGE to More 'Optimistic' Imaginaries	223
References	234
7 Conclusion	241
The Argument	243
What's Different?	244
What's Constraining SGE?	246
What's at Stake?	250

SGE's Shadow Presence in the Paris Agreement	256
Troubling Environmentalism	258
References	263

Index	267

Jeremy Baskin is a Senior Research Fellow at the School of Government of the University of Melbourne in Australia. His current work focuses on geoengineering and climate policy, on the Anthropocene and global justice, and on the role of experts and expertise as it relates to environmental policy. Before entering academia Jeremy was an anti-apartheid activist, then a post-apartheid civil servant, before working globally with leaders in business, government, NGOs and multilateral agencies on the challenges of environmental sustainability.
