Introduction	4
1. Theoretical Concepts for Brownfield Regeneration	5
1.1. Brownfields as a problem of spatial development	5
2. Brownfield area regeneration process	12
2.1. Benchmarking	12
2.1.1. Evaluation criteria	14
2.1.2. Diagnostics as an iterative evaluation process	16
2.2. Vision designing	17
2.3. Prediction	19
2.4. Implementation	21
2.5. Monitoring	21
3. The Concept of "People, Places, Space, Environment"	23
4. Interventions, Management, Capacities	26
5. Approach to Avoid Brownfields	33
6. Strategic planning system as a context for revitalization process management	35
6.1. Strategic planning of urban subject development support	36
6.2. Socio-economic development management of local level and its subjects	37
6.3. Citizen as a subject of socio-economic development planning	41
6.4. Legislative aspects and key documents	43
7. Practice Transfer in Brownfield Regeneration in the Slovak Republic and in the Czech Republic	49
8. Practice Transfer in Brownfield Regeneration from other countries	55
9. Brownfields as the cultural heritage	59
9.1. Cultural values	59
9.2. Converse reusing of brown fields	68
9.3. The situation in the V4 countries	70
9.4. Application in spatial and urban planning	77
9.5. Current trends in the countries of V4	81
Conclusions	85
