
CONTENTS

CONTENTS	1
INTRODUCTION	1
1 THEORETICAL BASICS	4
1.1 Natural disasters and natural hazards	4
1.2 Basic terminology in the field of risk analysis	6
1.3 Classification of Natural Hazards and Disasters	11
2 RISK MANAGEMENT	16
2.1 Risk management in general ..	16
2.2 Flood risk management	17
2.3 Cycle of flood risk management	18
2.3.1 Legislation of Slovak Republic on the flood risks management	19
3 ASSESSING RISK	22
3.1 Risk assessment on a general basis	22
3.2 Assessment of flood risk in conditions of the Slovak republic	26
3.3 Risk Analysis.....	29
3.3.1 Procedure for Risk Analysis	30
4 CURRENT METHODS OF RISK ANALYSIS	33
4.1 Basic division of risk analysis methods	33
4.2 Quantitative methods.....	34
4.2.1 Analysis of the interrelationship.....	36
4.2.2 Multi-criteria Evaluation.....	39
4.3 Qualitative Methods	41
4.3.1 Risk identification and assessment of qualitative methods	43
4.3.2 Procedure and evaluation criteria assessed subject.....	43
4.3.3 The resulting degree of exposure of the subject	45
4.3.4 Determination of the significance of risk	48
4.4 Principle of risk assessment	50
5 GIS in risk analysis of flood events	54
5.1 Basic definition of GIS.....	54

5.2	Future of GIS	57
5.3	GIS application in flood risk analyzing	57
5.3.1	GIS analysis tools	59
5.3.2	Basic concepts and principles in the art hydrological modeling	66
5.4	The use of hydrodynamic modeling for risk analysis of flood events	68
5.4.1	HEC-RAS	72
5.4.2	Description of the essential elements of the user interface and control program	78
5.4.3	MIKE 11	81
5.4.4	Description of the essential elements of the user interface MIKE 11	83
5.5	GIS Linking hydrological models and GIS	88
6	EMPIRICAL PART OF THE SOLUTION	90
6.1	Basic information about the state of the environment the area of interest	90
6.1.1	Geomorphological conditions	90
6.1.2	Geological structure	91
6.1.3	Geodynamic phenomena	92
6.1.4	Mineral deposits	92
6.1.5	Climatic conditions	92
6.2	Hydrological conditions	93
6.3	Structure and scenery	94
6.4	Processing of data in the process of risk analysis	95
6.4.1	Geodetic processing	95
6.4.2	Simulation processing	101
6.4.3	Visualization processing	107
6.5	Proposal for risk analysis of the selected area	111
6.5.1	Methodology processing	113
	CONCLUSION	120
