Glossary	ix
----------	----

List of Abbreviations	xi
-----------------------	----

Part I. An Introduction to the Background Science

1. The Role of Nucleic Acid Analysis in Understanding Infectious Diseases	3
2. Some Common Factors Involved in Host-Pathogen Interactions	15

Part II. Bacterial Pathogens

3. The Three Great Pandemics of Plague	25
4. A Multifaceted Pathogen: <i>Escherichia coli</i>	31
5. Fever and Food Poisoning: The Two Faces of <i>Salmonella</i>	39
6. Understanding Pathogen Populations: <i>Klebsiella pneumoniae</i>	47
7. A Surprising Pathogen: <i>Vibrio cholerae</i>	53
8. The Accidental Pathogen: <i>Legionella pneumophila</i>	60
9. Two Related Pathogens: One Ancient, One Modern	67
10. <i>Helicobacter pylori</i> and Gastric Ulcers	74
11. A Tale of Two Pathogens: <i>Pseudomonas aeruginosa</i> and <i>Pseudomonas syringae</i>	81
12. The Enigmatic Pathogens: Syphilis, Yaws, Pinta, and Bejel	90
13. Mycobacterial Mysteries: Tuberculosis and Leprosy	99
14. Plasmids and Pathogenicity: The <i>Bacillus cereus</i> Complex	108

Contents

15. Tracking the Origins of <i>Clostridium difficile</i> Infections	117
16. Tracking Horizontal Gene Transfer: <i>Staphylococcus aureus</i>	124
17. The Inadvertent Pathogen: <i>Borrelia burgdorferi</i> and Lyme Disease	133
18. Phytoplasmas: Bacteria that Manipulate Plants and Insects	140
19. The Most Influential Bacterium: <i>Wolbachia pipientis</i>	148

Part III. Eukaryotic Pathogens

20. The Ubiquitous Pathogen: <i>Trichomonas vaginalis</i>	157
21. The Greatest Killer of All Time: The Malarial Parasite	164
22. An Environmental Opportunistic Pathogen: <i>Cryptococcus</i>	172
23. The Most Famous Plant Pathogen: <i>Phytophthora infestans</i>	179

Part IV. Viral Pathogens

24. A Virus That Promotes its Own Transfer: Tomato Spotted Wilt Virus	189
25. Morbilliviruses: Measles, Rinderpest, and Canine Distemper	196
26. Filovirus Haemorrhagic Fevers: Marburg Virus and Ebola	202
27. The Origins of HIV and the AIDS Pandemic	210
28. The Benefits of a Segmented Genome: Influenza	217
29. Third Time Unlucky: SARS, MERS, and COVID-19	224

Part V. Some Unifying Themes

30. Zoonotic Diseases	233
31. Some Common Pathogenicity Themes	239
