Abstract	8
1 Introduction	9
2 Methodology	11
2.1 Research objectives	11
2.2 Research methodology	12
2.2.1 Sample characteristics	13
2.2.2 Survey methodology	14
3 The term Industry 4.0	17
3.1 The main characteristics of Industry 4.0	24
3.2 Smart factory	32
3.3 Internet of Things (IoT)	35
3.4 Internet of Services (IoS)	36
4 The importance of Industry 4.0 in the European Union	39
5 Industry 4.0 in the Czech Republic	45
5.1 Identification and evaluation of the resources of enterprises in the Czech Republic from the perspective of Industry 4.0	48
5.2 Technical and technological equipment of enterprises in the Czech Republic	50
5.3 Human resources	54
5.4 Efficient use of resources	59
6 Factors influencing the implementation of Industry 4.0	62
6.1 Employees	63
6.2 Process management	63
6.3 Know-how	64
6.4 Machinery and equipment	64

6.5	Financial planning	65
6.6	External environment	65
6.7	Phases of integrating Industry 4.0 into enterprises	66
7	Tools for economic assessment of the implementation of Industry 4.0 in enterprises	69
7.1	Evaluation of investment.	69
7.2	Methods of investment evaluation	70
7.3	Impact of investments on company performance indicators.	74
7.4	Evaluation of the efficiency of production factors – labour productivity	78
7.5	The impact of companies investment on competitiveness	80
7.6	The investment development from a sectoral perspective with a focus on industry	82
7.7	The evaluation of the investment activity of enterprises	83
7.7.1	The group of analysed companies.	83
7.7.2	Development of fixed assets.	83
7.7.3	Distribution of enterprises by investment growth.	85
7.7.4	Capital intensity of enterprises	87
7.7.5	Investment activity in relation to enterprise performance	88
8	The current state of Industry 4.0 in enterprises in the chosen sectors in the Czech Republic – results of questionnaire surveys.	90
8.1	Industrial enterprises – results of the first survey	90
8.1.1	Long-term development	90
8.1.2	Competitive advantage	93
8.1.3	Barriers and constraints.	96
8.1.4	Future investments	100
8.1.5	Reasons for the technology introduction	102
8.1.6	Robotization	105
8.1.7	Summary of results	108
8.2	Food businesses – results of the second survey	109
8.2.1	Barriers to the implementation of Industry 4.0.	109
8.2.2	Staff competences in IT and digital technologies	113
8.2.3	Readiness of enterprises to implement Industry 4.0	114
8.2.4	Summary	119

9 Software tool to assess the readiness of companies for Industry 4.0	122
9.1 Industry 4.0 Implementation Index (IPP4.0)	123
9.1.1 Level of implementation of Industry 4.0 technologies (Technology)	123
9.1.2 Level of digitalization of processes (Processes)	125
9.1.3 Barriers to the introduction of Industry 4.0 (Resources)	126
9.1.4 Competitive advantage (Impacts)	127
9.1.5 Internal properties (Advantages)	128
9.2 Structure of the IPP4.0 software tool	129
9.3 Using the IPP4.0 software tool	132
10 Conclusion	136
