

CONTENTS

PART 1. MECHANISMS OF NANOPARTICLE CYTOTOXICITY AND EFFECTS ON CELLULAR RESPONSE

Chapter 1	Alcohol induces toxic damage of rat brain astroglia associated with lipid peroxidation affected by hydrated forms of C60 fullerene	6
Chapter 2	Astroglial and neuronal cytoskeleton disorders in rat brain induced by chronic exposure to ethanol: hydrated C60 fullerene effects	22
Chapter 3	Effects of nanostructures of hydrated C60 fullerene on reproductive function in male rats: streptozotocin-diabetic model	41

PART 2. MOLECULAR AND CELLULAR ASPECTS OF INTESTINE BARRIER SYSTEM DISORDER

Chapter 4	Indices of colostral immunity in calves during the first months of life	79
Chapter 5	Molecular features of plasmalemma's proteins in the cattle enterocytes in the late foetal period	88
Chapter 6	The dynamic relationship between enzymatic activity and structural polypeptides of enterocyte membranes in cattle foetus	100
Chapter 7	Biochemical parameters of porcine epidemic diarrhoea pathogenesis	110
